Notice

Drone Battery Charging

Please read this instruction manual carefully before operating the product.
Please do not operate the product in the gale.

Notice

The flying ground should be the local field and legal for remote control flying. Please do not operate the product in forbidden zone or around people or animals.

Keep the aircraft a certain distance (at least 2-3 meters) from others when playing together.

Care and Maintenance

Notice

Always use dry and soft cloth to clean this product.

Avoid this product from being exposed to sunlight or heat.

Avoid immersing these toys in water, otherwise, the electronic parts may be damaged.

Check regularly and inspect the plug and other accessories. If any damages are discovered, please stop using immediately, until it is completely repaired in good working condition.

When the flight has ended, the power supply of the remote control should be switched off and also switch off the power supply of the product.

Avoid placing the batteries in places in high temperatures and avoid exposure to heat.

When young children are operating the product, it shall be ensured that the adults are guiding and making sure the product control is within the viewing range of the controller (or instructor) so that it makes the control of the drone more convenient.

When the product is not in use, please switch off the power supplies of both the aircraft and the remote control, and remove the batteries from the remote control.

Please note that we won't take any responsibility for any wrong operation as this may result in severe injury or loss of property, and we cannot control the operating process during the time when the user assembles or uses this product.

Once this product is sold, we won't be responsible for any safety responsibility during the time the user operates or uses controls this products.

Warning

This product is suitable to be used by people who has operating experience in flying model or aged no less than 14 years old.

This product is not a toy but a precise equipment integrating mechanics and electronics with expertise of aerodynamics and high-frequency transmitting. It requires correct assembly and debug so as to prevent the accident from happening. The user should operate or control it in a safe way.

Please do not put the product in your mouth to prevent choking hazard of small parts.

Please do not put the finger into available interspaces.

Please do not play the product in a brutal way such as throwing, crashing or twisting it.

Please store the smaller-sized product accessories in places that are out of reach of children, in order to avoid the occurrence of accidents.

The product is very powerful. When flying for the first time, observe carefully. The joystick must be slowly pushed in order to prevent the product from ascending too quickly and result in unnecessary collision and damages.

When the flight has ended, the power supply of the remote control should be switched off and also switch off the power supply of the product.

Avoid placing the batteries in places in high temperatures and avoid exposure to heat.

When young children are operating the product, it shall be ensured that the adults are guiding and making sure the product control is within the viewing range of the controller (or instructor) so that it makes the control of the drone more convenient.

When the product is not in use, please switch off the power supplies of both the aircraft and the remote control, and remove the batteries from the remote control.

Please note that we won't take any responsibility for any wrong operation as this may result in severe injury or loss of property, and we cannot control the operating process during the time when the user assembles or uses this product.

Once this product is sold, we won't be responsible for any safety responsibility during the time the user operates or uses controls this products.

FCC Statement

This device complies with the part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with instructions may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on. The user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or experienced radio/TV technician for help.

RF Warning Statement:
The device has been evaluated to meet general RF exposure requirement.
This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
