

## Technical Description

TX-3E Coding IC and the peripheral oscillation modulation amplification circuit is composed. When the function button is pressed by the IC encoded into a set of binary serial code, by the modulation circuit to load the encoded signal into the carrier, amplified by amplification circuit and emitted by the antenna. Crystal:  
49.860MHz(X1)

Radio parameters

Antenna gain: 3.0dBi

Frequency: 49.86MHz
