[Turn Power On/Off]

[On]

■ Press the power button for more than one second. All the LED lights will blink three times simultaneously. Then the Bluetooth LED will blink turning into standby pairing mode.

■ Once it's paired up with a smartphone, whenever the power turns on, the Air Cube will automatically start to measure once every fifteen(15) seconds. In addition, the device will measure once more if you shake the device.

[Off]

■ Press the power button for more than two seconds. All the LED lights will blink once and the device will turn off.

Dangerous	85 ~	2001 ~	201 ~

[Air Cube Application]

Using the Air Cube app, you can check the air quality conditions measured by Air Cube in real time. In addition, the Air Cube app provides action guide in accordance with each air quality level.
You can easily download the mobile application from our Air Cube website (www.aircube.io).
After installing the app, you can use it with the Air Cube device. Air Cube app offers convenient features such as setting country-specific air quality standards or alarm notifications depending on the user's environment.

[Bluetooth Pairing (connection)]

1. Press the power button more than one second.

2. Bluetooth LED will turn to blue and blink, turning into standby pairing mode.

3. When running the air check application, you can activate the smartphone's Bluetooth simply by following the instructions.

4. In the application settings menu, choose the available pairing device. Then, press the 'pair' button. It is paired up when the message 'connected with the Air cube' is displayed.

5. When it's paired up, Bluetooth LED will turn to blue.

When running the Air Cube application, you won't need to pair up your Air Cube and the smartphone again if you have paired it up once before.

(Bluetooth 4.0 or above / Coverage: maximum 11 meters)

[Charging]

You can charge the device with a micro 5-pin smartphone charger or micro USB cable. The power LED will turn red while charging and it turns green when it is complete. If the battery LED flashes, it means that the battery has less than 10% power. Please charge the device immediately then.
