

**Regarding Requirements of Paragraph 15.212(a)(1)****Shielding 15.212(a)(1)(i)**

The oscillator/transmitter circuitry is housed under a metal shield soldered to the circuit board.

**Buffered Modulation/Data Input 15.212(a)(1)(ii)**

All signals are buffered as required.

**Power Regulation 15.212(a)(1)(iii)**

The RF components are powered by regulated 2.85 and 3.3 V sources taking power from a 3.6 to 6.0 V battery.

**Antenna Construction 15.212(a)(1)(iv)**

The antenna ports use U.FL style connectors. Antenna(s) supplied for use with this module are listed in the user's manual.

**Test Configuration 15.212(a)(1)(v)**

The device was tested stand-alone with no external shielding. All power is self-contained.

**Labeling 15.212(a)(1)(vi)**

The module is labeled with the FCC ID using a permanently applied label as depicted in other supporting documentation. The user manual contains instructions for external labeling when the module is enclosed in a final configuration.

**Applicable Requirements on Final Configuration 15.212(a)(1)(vii)**

The user manual includes instructions that explain the requirements of marking and the instructions that need to be conveyed to the final configuration.

**Compliance to RF Exposure Requirements in Final Configuration 15.212(a)(1)(viii)**

The user manual includes instructions on the warnings required for the final configuration.
