A detailed photograph of the N160DAL01_MB_V10 motherboard. The board is populated with a central CPU, several memory modules (RAM), and various integrated circuits. The text 'N160DAL01_MB_V10' is printed on the right side of the board. The components are mounted on a dark green PCB. The image shows the top side of the board, with the CPU and memory modules being the most prominent features. The board is populated with various components, including capacitors, resistors, and integrated circuits. The text 'N160DAL01_MB_V10' is printed on the right side of the board. The components are mounted on a dark green PCB. The image shows the top side of the board, with the CPU and memory modules being the most prominent features.
