

Quick Start Guide

NOKIA FastMile 5G Gateway

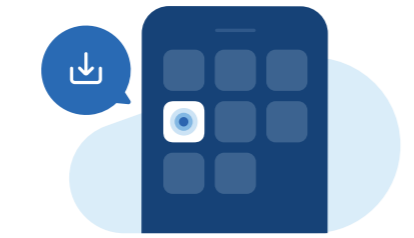

Thank you for purchasing Nokia FastMile 5G Gateway

In the box you will find:

1x Nokia FastMile 5G Gateway	1x Quick Start Guide
1x Power supply	1x Safety information

Download the mobile app

Optional: For additional help, it is recommended to download the free **Nokia WiFi** App to your smartphone to guide you through the installation with details.

1. Insert SIM

Unbox and place your FastMile 5G Gateway in an area with few obstructions, ideally near a window. Make sure there is a nearby power outlet. If not pre-installed by your service provider, remove the SIM tray and place the SIM card securely in the tray and reinsert it into the gateway. Copy also the SSID and WiFi password printed to label for future use.

2. Power on

Plug in the power adaptor and then connect it to your gateway. Push the on/off button, the LED on the front of the gateway will turn on. When LED starts blinking your Nokia FastMile 5G

3. Check status lights

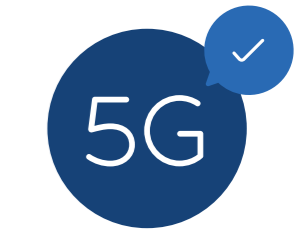

When LED is green or yellow, you are connected to the 5G or 4G network and the quality is good. If LED is red the signal strength is poor, please try another location. Power off the gateway and move it to better location, e.g. higher, near window or opposite side of house. Please contact your service provider if you don't find a good signal. Once you've got a good signal, it's recommended that you don't reposition or turn the gateway.

4. Connect to Wi-Fi

Connect devices to your gateway using the SSID and Wi-Fi key printed on the bottom of the gateway. It is recommended to change WiFi password for your security.

Enjoy your 5G Home Broadband

To manage your Wi-Fi network, use the mobile app or visit <https://192.168.1.1> or <http://192.168.1.1> in your browser. For additional guidance please visit www.nokia.com/fastmile
