Re: FCC ID: 2AE26-1229-Request for Confidential Treatment

**To Whom it May Concern:**

For the product marked FCC ID: 2AE26-1229 Horton L.L.C. requests the confidential treatment of the documents listed below. Each document is attached as an exhibit to the equipment authorization application for the above referenced FCC ID. This request is made pursuant to 47 C.F.R. §§ 0.457, 0.459.

**Short-Term Confidentiality**

Horton L.L.C. requests, from the grant date of the equipment authorization for FCC ID 2AE26-1229, confidential treatment for 180 days of the following confidential documents:

1. Quick Start Guide and User Manual;
2. Test Setup Photos;
3. Internal Photos;
4. External Photos.

The above referenced materials contain proprietary information about the device that is not available to the public. This information is only shared with third parties who maintain the confidentiality of such material. Disclosure of the proprietary information prior to marketing our device would be disastrous to our business and to the successful launch of the device.

**Long-Term Confidentiality**

Horton L.L.C. requests permanent confidential treatment to the following materials included with our applications:

1. Specifications-Antenna;
2. Block Diagram;
3. Schematics;
4. Operational descriptions.

3/24/2016

The above referenced documents included sensitive design and technical information specific to our device that is shared on a limited basis, subject to confidentiality agreements that are maintained before and after the marketing and selling of the device. Disclosure of this information would grant our competitors unfair advantage by learning about our product design and development process. This type of disclosure would harm our ability to compete in an already competitive market.

If any questions please do not hesitate to contact me.

Yours Truly,

Armia Crumity  
HORTON L.L.C.
