Trouble shooting

If you fails in connecting the headset to your mobile phone or it can not be used normally, please try the following steps:

- Please confirm whether the Bluetooth function of your mobile phone is opened, and whether the headset has been paired with your mobile phone.
- Please check whether the distance between the headset and your mobile phone exceeds 10m, and whether there is any signal interference, such as electronic products or power supply.
- Please pair with headset again as the headset can store 8 pairing devices, or pairing list of Bluetooth headset has been full.
- In case the headset can not be connected to mobile phone automatically or disconnects when listening to music, please recharge your headset or start it and pair again.
- In case the music has no sound at all, please check carefully whether the volume of your device is at the minimum.
- Please check whether the battery has been charged fully, if so, the blue light shall turn on for a long time.

Maintenance and repair

Turn off the headset first before putting it into your pocket or bag, to avoid pressing headset function key by accident. It is strictly forbidden to expose the headset in the liquid or wet places. It is strictly forbidden to use abrasive solvent to clean the headset.
