Re: RF exposure information for:

Product name: Hand terminal with FCC ID 2AE3QJE785

To Whom It May Concern:

Hand terminal is a portable device intended for use within 20 cm of humans and must demonstrate compliance to the either relevant SAR limits or demonstrate a maximum conducted output power less than the SAR exclusion thresholds pursuant to "KDB 447498 D01 General RF Exposure Guidance v05" at the specified distance to user and frequency range.

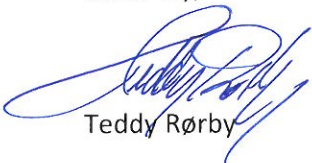

The properties of Hand terminal are as follows:

- Maximum conducted output power: 0.06 mW (quasi peak)
- Distance to user: 5 mm
- Frequency range: 902 to 928 MHz

Power threshold according to KDB 447498 §4.3.1: 15.6 mW

The power threshold for SAR exclusion is respected hence Hand terminal is compliant.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Teddy Rørby', is written over the printed name.

Teddy Rørby
