To Whom It May Concern:

I, the undersigned, hereby declare the differences between the Twist Speaker (TWST-SPKR-001) and Twist Light (TWST-LED-001) for the purposes of data reuse. The model TWST-LED-001 is a LED bulb with BLE only variant of TWST-SPKR-001, having the 802.11b/g/n, audio amplifier and the speaker removed. The PCBA containing the 802.11b/g/n and audio amplifier is replaced with a passive PCBA (no components) to connect the AC/DC PCBA to the BLE PCBA. The BLE RF conducted data of the TWST-SPKR-001 unit is thus applicable to the TWST-LED-001, as the BLE PCBA is identical.

Astro, Inc. accepts full responsibility for ensuring the PCBA and BLE RF firmware are identical between the TWST-SPKR-001 and TWST-LED-001, and the reuse of data for the TWST-LED-001 to represent compliance.

Sincerely Yours,

A handwritten signature in black ink, appearing to read "Lander M Bravo". It is positioned above a solid horizontal line.
