While all the efforts have been made to ensure the accuracy of contents in this manual, we presume no responsibility for errors or omissions or statements of any kind, whether such errors are omissions or statements resulting from negligence, accidents, or any other cause.

We operate a policy of continuous development and reserve the right to make changes, modifications and improvements to the device, device features/specifications or any of its parts without prior notice. Your device may have preinstalled bookmarks and links for third party internet sites and may allow you to access third party sites. These are no affiliated with our company, and we don't endorse or assume liability for them. If you access such sites, take precautions for security or content.

The limited warranty does not cover user manuals or any third party software, settings, content, data or links, whether included/downloaded in the product, whether included during installment, assembly, shipping or any other time in the delivery chain or otherwise and in any way acquired by you.

To the extent permitted by applicable law(s), we don't warrant that any other software will meet your requirements, will work in combination with any hardware or software applications provided by a third party, that the operations of the software will be uninterrupted or error free or that any defects in the software are correctable or will be corrected.

☛*User's Manual is provided just to guide the user about the functionality of the device. This does not seem to be any certificate of technology. Some functions may vary due to modifications and up-gradations of software or due to printing mistake.*

SAFETY PRECAUTIONS

Please read the following safety guidelines before using the device.

- Do not use the tablet while you are driving.
- Do not place magnetic storage media near your tablet. Radiation from the tablet may erase the information stored on them.
- Keep your tablet and its accessories away from children.
- Tablets can interfere with the functioning of medical devices such as hearing aids or pacemakers. People having active medical implants should keep their cell tablet at least 15 cm away from the implant.
- Permanent hearing loss may occur if you use eartablets or headtablets at high volume.
- Use a wireless hands-free system (headtablet/ headset) with a low power Bluetooth emitter.
- Keep your calls short or send a text message (SMS) instead. This advice applies specially to children adolescents and pregnant women.
- Use cell tablet when the signal quality is good.

Notice:

- Do not dismantle the device or accessories otherwise, manufacturer is not liable to pay for damages as the device and accessories are not covered by warranty. Use only original batteries and charging devices.
- Please back up your important data timely and keep them properly. The company is not liable for any failure to call or loss of data due to mis-operation, poor signal or power cut, etc.
- All the screens in this manual are for reference only, and some contents actually displayed may depend upon the presetting of the service provider or the network operator, or the SIM card. If any functions referred to in this manual are different from those of your device, please follow your device.
- Do not put use it in a place with flammable gas such as a petrol pumps. The temperature recommended for using the device is 5-35℃. Do not touch the charger, power cable or socket with wet hands. This may cause an electric shock.

☛*If your tablet or any of its accessories do not function normally, then please visit your nearest authorized service facility. The qualified personnel will assist you, and if necessary, will arrange for the service*.

7. Your device call voice is low?

Possible Reasons for Malfunction	Solutions
1. Call volume is low.	Please adjust your tablet call volume to louder.

8. The other party can't hear your voice?

Possible Reasons for Malfunction	Solutions
1. Mic is too far away from the sound source.	Place the mic near your mouth.
2. The signal is poor or unstable.	Please move to the open areas with good signal.

3. Antenna is assemblied not properly.	Please contact the local service centre and check.

9. The call alert doesn't ring when a call coming in?

Possible Reasons for Malfunction	Solutions
1. Incoming call alert is set as silent.	Please re-set the incoming call alert as a sound alert.
2. The ring volume is set too low.	Please increase the tablet call volume.
3. You set up call forwarding.	Please cancel call forwarding.

10. Battery can't charge?

Possible Reasons for Malfunction	Solutions
1. Battery power runs out or not used for a long time.	Please charge in time after the Note of "Low Power".
2. Battery is not good with the tablet connection.	Please install battery properly.
3. Charger is not good with the tablet connection.	Please connect the charger and device properly till it displays the charging icon on the screen.
4. Perhaps the charger or batter is damaged.	Please contact the designated repair centre.
5. The surrounding temperature is too low or high.	Make sure temperature is normal during charging.

11. Device displays no network?

Possible Reasons for Malfunction	Solutions
1. SIM card is not installed properly.	Please install SIM card properly.
2. There are impurities on the device and SIM card contacts.	Please ensure that SIM card & device contacts are clean.
3. The SIM card is invalid	Please check whether SIM card has been expired
4. The network is in a weak-signal areas.	Pls move to the strong-signal areas to use device.

12. Device can't detect the memory card?

Possible Reasons for Malfunction	Solutions
1. T-Flash card is not installed properly.	Please install T-Flash card properly.
2. T-Flash card is damaged.	Please change T-Flash card.

13. Device is out of memory?

Possible Reasons for Malfunction	Solutions

1. MMS or SMS takes up too much storage space.	Please delete the unwanted SMS or MMS to release space.
2. The browsing history takes up too much storage space.	Select "Browser - Settings - Privacy Settings - to clear the cache to release space.
3. Running too many programs leads to lack of space.	Enter “Settings –Applications—Manage applications” or “Settings –Applications—Running services”, force stop some running applications or services.
4. You have installed applications in your device.	Enter “Settings – Applications — Manage applications”, choose and touch the applications installed to uninstall them to release space.

FCC Statement:

This tablet complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user‘s authority to operate the equipment.

The manufacturer is not responsible for any radio or tv interference caused by unauthorized modifications to this equipment. Such modifications could void the user’s authority to operate the equipment.

FCC RF Exposure Information (SAR):
This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.
During SAR testing, this is set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage near the body with the separation of 0 cm. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.
The exposure standard for wireless s employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.
Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.
The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model device is on file with the FCC and can be found under the Display Grant section of HYPERLINK "http://www.fcc.gov/oet/ea/fccid" www.fcc.gov/oet/ea/fccid
after searching on: FCC ID: 2AE4P-SKY70Q
SAR compliance for body operation is based on a separation distance of 0 cm between the device and the human body. During use, the actual SAR values for this device are usually well below the values stated above. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your device is automatically decreased when full power is not needed. The lower the power output of the device, the lower its SAR value.
Body-worn SAR testing has been carried out at a separation distance of 0 cm. If you are not using an approved accessory ensure that whatever product is used is free of any metal and that it positions the device the indicated distance away from the body.
