Subject: Attestation Statement

To whom it may concern,

This is to attest that the VTB module, FCC ID 2AEAI-VTB1, while being on charge, if rechargeable batteries are fitted, is not to be used to communicate to its associated receiver, thus ensuring it does not transmit. The module will not be used with a receiver as per instructed in the host product user manual:

"If rechargeable batteries are used, do not operate the VTB module whilst charging."

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'S. Braithwaite', written over a horizontal line.

Managing Director  
Steve Braithwaite
