

The steps of Installation

After the completion of the assembly, please check and confirm that there is no serious shaking, then enjoy it.

Step One: Install the Bottom-tube in the front and rear

1: Raise the frame of the bike slightly, close the front bottom-tube to the location under the watts shape piece in front of the bike frame, use Square neck bolt、spacer and nut cap to fix tightly.

2: Close another bottom-tube to the rear of the bike frame, use Square neck bolt、spacer and nut cap to fix tightly.

Step two: Install the pedal of both sides

Install the left and right pedals onto the crank on both sides respectively, please note that according to the following steps, if not there may be something damaged.

1: There is a R marker on the axis of the right pedal, so is the crank on the right, please fix them tightly after checking the consistency of the pedal and the crank.

2: There is a L marker on the axis of the left pedal, so is the crank on the left, please fix them tightly after checking the consistency of them.

Step Three: Install the seat cushion

Install the saddle pipe above the saddle, fix the rotary knob tightly. Install the seat cushion into the pipe of cushion, fix the nut cap under the seat cushion tightly.

Step Four: Install the hand grip and bike frame

Put the hand grip on the bike frame, put the tablet stents above the hand grip, put a gasket, insert the screws, using L tool to tighten (Please make sure to focus on the screw holes, be careful of the wires in the handle when using screws, or they may be get stuck) .

Step Five: Connect the data cable

Tip the audio line into the control box according to the label color.

Install video

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
