RE: FCC ID: 2AEDQODSY001
IC: 20022-ODSY001
ODYSSEY-MAX10-KIT Odyssey Max 10 FPGA and BLE Sensor Kit
Macnica Americas Inc.
380 Stevens Ave. STE 206
Solana Beach, CA 92075

By my signature below, I attest:

- That the EUT (Equipment Under Test) is a Bluetooth LE wireless interface to a compatible client and not a computer peripheral directly connected via USB.
- That the USB port is mainly used for powering the EUT in addition to either using battery power or solderless bread board. USB cable is not supplied with the kits.
- That the only time the USB port is connected to a PC is to upload initial configuration files or use the Console Menu which is not the intended normal use.

Sincerely,

A handwritten signature in black ink, appearing to read "Ferdinand S. Custodio".

Ferdinand S. Custodio
EMC/Senior Wireless Test Engineer
