Attention: Director of Certification

RE: SAR Exemption information per KDB 447498 D01v05 Clause 4.3.1.1 using 5mm separation distance

$[(\text{max. power of channel, including tune-up tolerance, mW}) / (\text{min test separation distance, mm})] \cdot [\sqrt{f(\text{GHz})}] \leq 3.0$

- $f_{(\text{GHz})}$ is the RF channel transmit frequency in GHz
- Power and distance are rounded to the nearest mW and mm before calculation
- The result is rounded to one decimal place for comparison

Calculation (max power including tune up tolerance = 0.414mW):

$$[(0.414 \text{mW}) / (5, \text{mm})] \cdot [\sqrt{2.48}] \leq 3.0$$
$$0.13 \leq 3.0$$

Therefore, the device meets the FCC SAR exemption requirements.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Juan Manuel Gonzalez'.
