

A	Wireless output
B	USB-C connector

Product Specifications

Name	PowerBase III 15W Wireless Charger
Item Number	CY4058PPWIR, CY4059PPWIR, CY4060PPWIR, CY4061PPWIR
USB-C Input	5.0V=3.0A (15.0W), 9.0V=2.22A (20.0W), 12.0V=1.67A (20.0W)
Wireless Output	5.0W, 7.5W, 10.0W, 15.0W (15.0W Max)
Total output	15.0W Max
Working Frequency Band	112-205kHz After evaluation, the product satisfied with RED Directive RF exposure required while used 20cm away from the human body.
Max Output Power	-18.5dBμA/m@10m
FCC ID	2AEDZCY40XXPPWIR

Installation instructions

Using the integrated USB-C cable, insert the USB-C connector (B) into a compatible USB-C charger (not included). Place your wireless charging device onto the wireless charging output (A) and your device should begin to wirelessly charge automatically.

To achieve fast charging, please ensure you are using a charger that is capable of fast charging at least 20W. For optimum charge speed, adjust your device so that it is aligned to the centre of the wireless charging output. Please ensure that the case on your phone is not affecting the wireless charging by removing it and checking the performance. Some cases interfere with wireless charging if they contain metallic material or are overly thick.

FCC RF RADIATION EXPOSURE STATEMENT CAUTION

To maintain compliance with the FCC’s RF exposure guideline, place the product at least 20cm from nearby persons.

Indicator Light	Status
Flashes 3 times and turns off	Powered on and on standby
Solid green	Wirelessly charging a device
Solid red	Fully charged a device
Flashing Red	Foreign object detected on wireless output

Caution

Please read all warnings for your safety and optimal user experience. Please read and follow these instructions carefully and retain for your records.

- Do not disassemble or throw into fire or water.
- Do not expose to extreme weather conditions.
- Do not use this product if you observe visible defects.
- Do not short circuit the product or store it in a receptacle where it may be short circuited by other metallic or conductive objects.
- Do not operate the product if it has been wet or otherwise damaged, to prevent against electric shock, explosion and/or injury.
- Never attempt to dismantle the unit.
- Children should be supervised to ensure that they do not play with the product.
- Do not use if broken, damaged, or exposed to liquids.
- Not to be used in extremely high ambient temperatures.
- Do not use with damaged or faulty accessories.
- Do not place near any sources of heat, open flame or liquid.
- Do not place close to a magnetic strip or strip card as it could cause magnetic failure.
- Please keep charger a safe distance of at least 80cm from any implantable medial devices to avoid medical device interference.
- In the case of the device overheating, place disconnect immediately.

Please note that changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to connect the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separate between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
