

COCCIHELLA Manual

Name: **COCCIHELLA**

Model: PLIM

Operation instructions

1. After matching the key to the car, press 1 the unlock key for 2 seconds to open the door and press 2 the lock key for 2 seconds to close the door.
2. The Bell key is used to find the car.

Technical Parameters:

Working voltage: DC9V (3 x CR2016 batteries)

Working frequency: 433.92MHz

Frequency stabilization method: sound meter stabilization

Coding method: learning code eV1527

Standby current: 0mA

Output power: $\leq 12\text{mW}$

Transmission distance: >100m (receiving above -100dbm in open area)

Modulation method: OOK (amplitude modulation)

Working temperature: -20°C ~ +70°C

Number of keys: 4 keys

Note: When using, the receiving frequency and decoding method should match the remote control

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
