Re: Subpac FCC ID: 2AEJU-X1A and 2AEJU-C1A

Subject: Indoor Use Only Product

This system is designed to only be used indoors. The UWB audio it transmitted from the Subpac C1 part of the system only. The Subpac C1 is a desk-mounted device intended to be connected to a recording console or DAW (digital audio workstation) – devices which are only used indoors. In addition, the C1 is not weather resistance at all and should not be used outside.

Sincerely,

Sharon Hoffman
