

Testing Tomorrow's Technology

April 28, 2015

To Whom it May Concern:

Based upon the attached attestation from Nivis, LLC that no changes other than a change to the shield construction as described have been made to their Model VN 210 Radio Module since it was originally tested in May of 2009, it is our opinion that US Tech Report Number 09-0156, with issue date of May 13, 2009 remains valid for this model. After reviewing the original test data and photographs and comparing this with photographs of the new shield, which is the same size and material as the original shield, in our opinion, the two part shield should not affect emissions if it is well-sealed.

If you have any questions, please don't hesitate to call. Thank you for your business.

Sincerely,

A handwritten signature in cursive script, reading "Alan Ghasiani", is shown in a light gray rectangular box.
