Request for assistance with FCC certification

GasSecure AS hereby requests Nemko A/S to assist us in necessary steps to update FCC certificate 2AEJXGSo1AA (Class II permissive change) on our product GS01 according to FCC CFR 47 part 15C. This includes:

- Adding variant GS01-EA to the certificate
- performing verification tests,
- writing test reports
- submitting documents to TCB

GS01/GS01-EA is a battery-powered hydrocarbon gas sensor with a radio interface. Its intended functionality is point detection of unwanted hydrocarbon gas leaks in industrial and offshore installations.

For GasSecure:

Pål Nordbryhn
senior design engineer.
