

Below is a representation of how the Model number, FCC ID, and IC ID numbers will appear on the Fiera™ Arouser for Her™ product.

The font size is a 4pt font; character height is approximately 1mm. The information will be laser etched on the white part of the product as shown (it will not be a label applied to the product). There is a serial number, a 2D scanable code, and the CE mark that are also applied to the product using this same process.
