RE: Justification for label location regarding application for certification of

FCC ID: 2AELP-RFID01
IC Number: 24333- RFID01

To Whom It May Concern:

This letter is to justify the choice of label location for the device bearing the above FCC ID and IC Number. The location was chosen to be on the top of the device to give visibility and for ease of finding the label and all of the components are fastened to this part of the device. The front and side of the device what the end user sees during normal operation. Keycafe Inc. wants to reserve these areas for marketing information (eg. Brand or trademark) and does not want label information on this areas. For these reasons, the top of the device is the only choice.

The device is assembled with all parts installed and will be marketed in that configuration. With the secure lock on this device, the end user will not have any access to the components. As noted above, the label will be visible at the top of the device. For these reasons, the label will be readily viewable to the device's purchaser and to the end user. Please contact the undersigned if you have any questions or need any further information.

Regards,
