Noted: Some parts of Bluetooth receiver have magnetic, please don't put it with your credit card or other storage media. Prevent information from being deleted.

## Charging the battery

Before using the Stereo Bluetooth receiver for the first time, you need to charge the receiver for approximately 1.5 hours. Strongly recommend to use the cable inside the package.

- 1 Plug the charger into a power outlet.
- 2 Plug one end of the USB cable into the charger (or into the USB port of a computer).
- 3 Plug the other end of the cable into the Micro USB port on your Smartbean Bluetooth Receiver

Notification light will display the charging status after you turn off the receiver.

## To manually pair the Adapter with your phone

- 1 Make sure your phone has the Bluetooth function turned on.
- 2 Receiver: Press and hold until the notification light flashes blue and red.
- 3 Phone: Scan for Bluetooth devices, then select N9 in the available devices list.
- 4 Follow the pairing instructions that appear on your phone. If a passcode is required, enter 0000.

## Multipoint technology

Use Multipoint technology to connect your receiver to two Bluetooth devices simultaneously. For example, if you connect your receiver with two phones, you can receive calls from both phones without having to disconnect and reconnect.

Noted: Multipoint mode consumes more battery power than Singlepoint mode.

Imaging there are 2 mobile phones: A and B

- 1 Pairing receiver with A then turns the receiver off
- 2 Pairing receiver with B, Keep the Bluetooth mode on both mobile phones
- 3 Turn receiver off and then put it on pairing status (Blue light flashing). Now receiver connects with both devices.

## Call handling

## Correct disposal of this product

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

In order to comply with RF exposure requirements, a minimum distance of 5mm must be maintained between the antenna and all persons
