

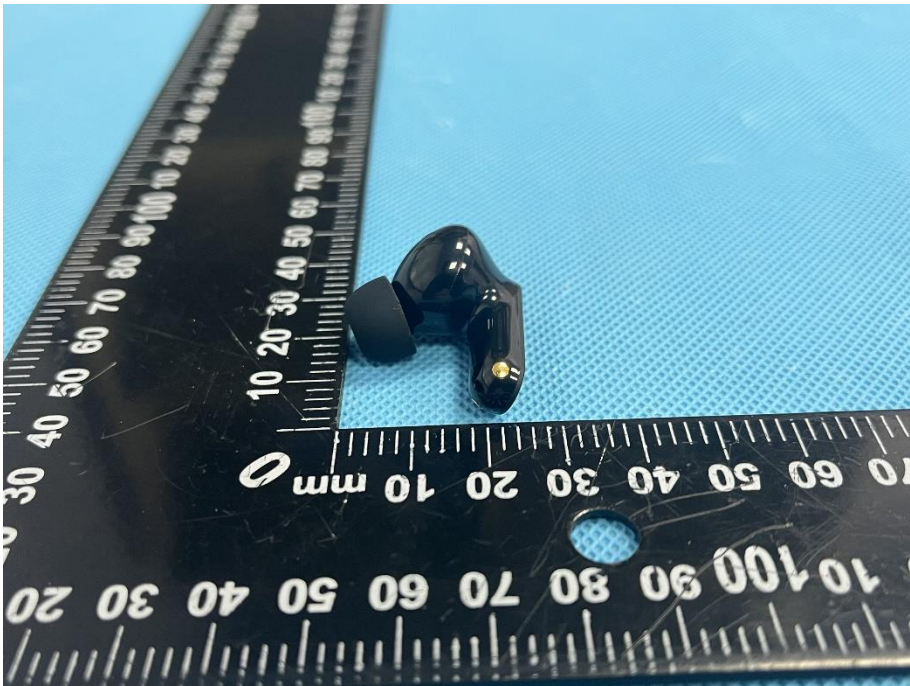

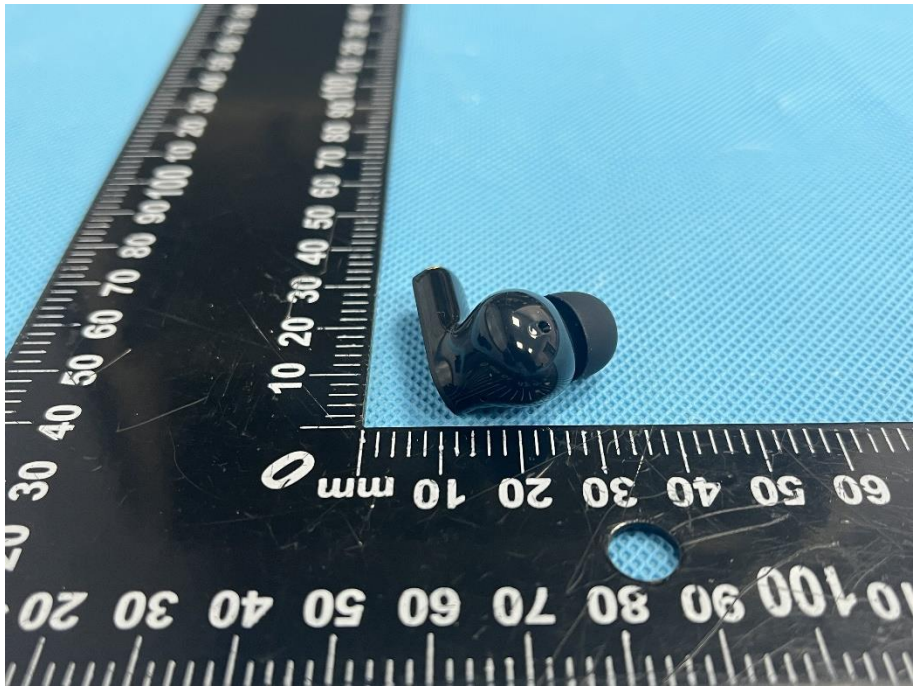

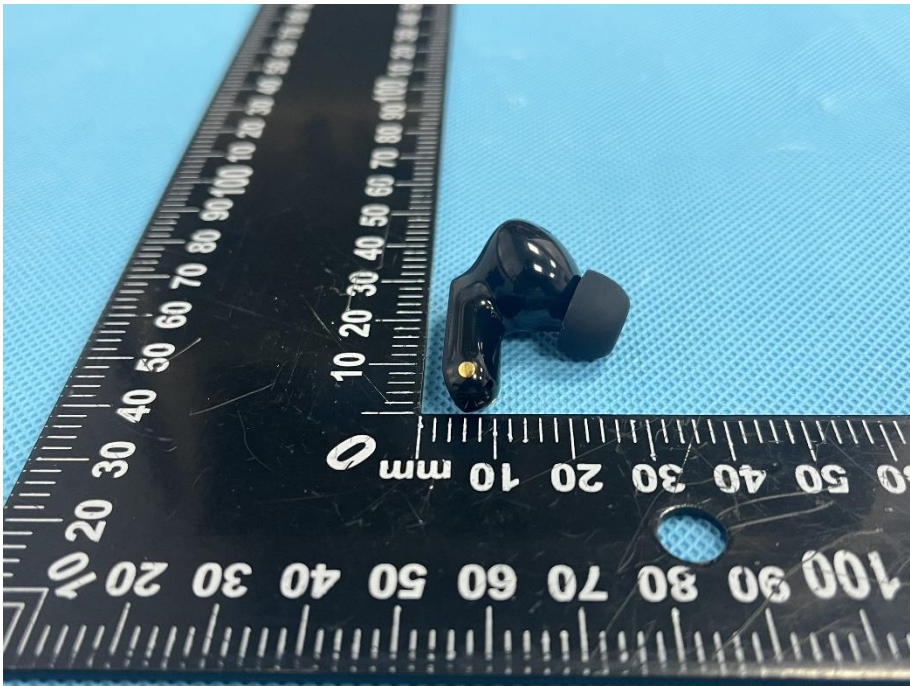

## EXHIBIT 2 - EUT EXTERNAL PHOTOGRAPHS

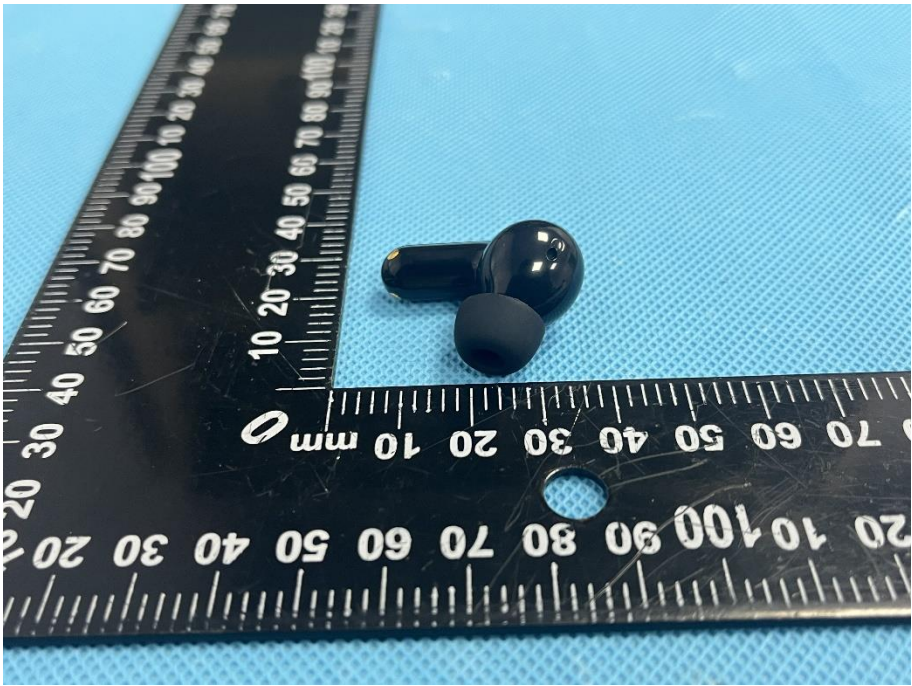

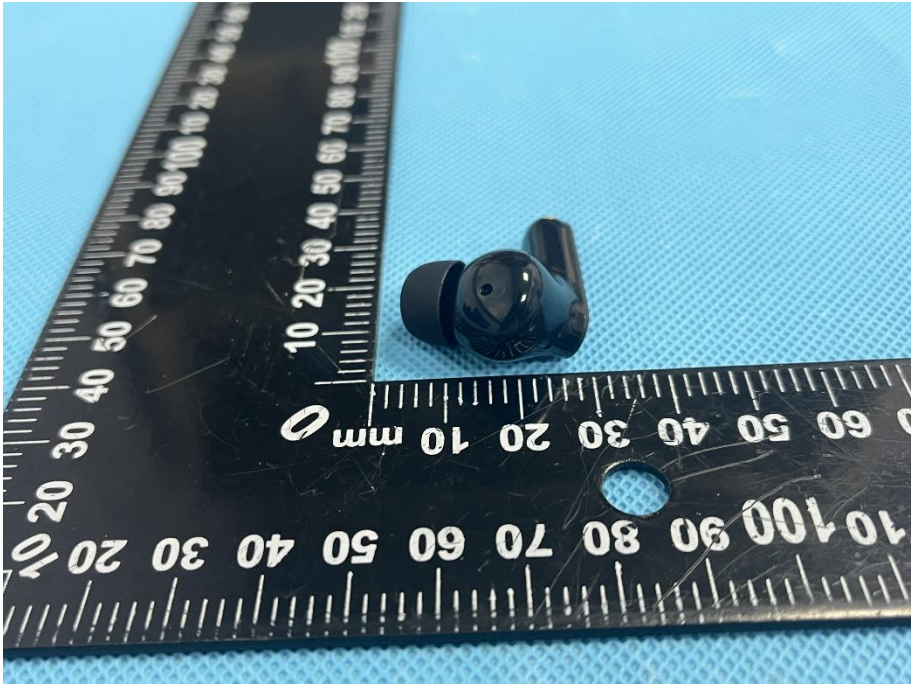

<p>EUT View 1</p>	 A photograph showing the closed, black, rounded rectangular charging case for Urbanista earbuds. The case is positioned on a light blue textured surface. To the left of the case is a black ruler with white markings, showing centimeters and millimeters. The case is approximately 40 mm wide and 25 mm high. The brand name "urbanista" is printed in white on the front of the case.
<p>EUT View 2</p>	 A photograph showing the open, black, rounded rectangular charging case for Urbanista earbuds. The case is positioned on a light blue textured surface. To the left of the case is a black ruler with white markings, showing centimeters and millimeters. The case is approximately 40 mm wide and 25 mm high. The brand name "urbanista" is printed in white on the front of the case. Two black earbuds are placed to the right of the case. The earbuds have a sleek, ergonomic design with a small gold-colored detail on the side.

<p>EUT View 6</p>	

<p>EUT View 7</p>	
<p>EUT View 8</p>	

<p>EUT View 9</p>	 A black earbud with a gold contact point is shown next to a 100mm ruler for scale. The earbud is positioned vertically, with the gold contact point at the bottom. The ruler is marked in millimeters, with the 0 mark at the bottom and the 100 mark at the top. The earbud is approximately 15mm long. The background is a blue textured surface.
<p>EUT View 10</p>	 A black earbud with a gold contact point is shown next to a 100mm ruler for scale. The earbud is positioned horizontally, with the gold contact point on the left. The ruler is marked in millimeters, with the 0 mark on the left and the 100 mark on the right. The earbud is approximately 15mm long. The background is a blue textured surface.

<p>EUT View 11</p>	 A black electronic component, likely a connector or probe tip, is shown against a blue textured background. The component has a spherical end and a cylindrical base. A black ruler with white markings is placed below the component for scale. The ruler shows markings in millimeters, with the component's length being approximately 10 mm.
<p>EUT View 12</p>	 A different view of the same black electronic component is shown. It is positioned next to a black ruler with white markings for scale. The component's profile is clearly visible, showing its cylindrical base and spherical end. The ruler indicates the component is approximately 10 mm long.

<p>EUT View 13</p>	 A photograph showing a small, black, L-shaped component. The component has a cylindrical base with a small hole at the end and a curved top section. It is placed on a black L-shaped ruler with white markings in millimeters. The ruler is set against a blue textured background. The component is positioned near the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler.
<p>EUT View 14</p>	 A photograph showing the same black L-shaped component from a different angle. The component is placed on the same black L-shaped ruler and blue textured background. In this view, the curved top section of the component is more prominent, and the word "urbanista" is visible on the cylindrical base. The component is positioned near the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler.
