Solder
Board-Component
View 1

Solder Board-Component View 2	 A photograph of a small, irregularly shaped green printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component features a USB-A connector on the left side, several small surface-mount components, and a circular cutout in the center. The text "VCC" is visible on the board.
Solder Board-Component View 3	 A photograph of the same green PCB component from a different perspective. The component is placed on the same blue textured surface. A black ruler with white markings is positioned horizontally below it, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). This view shows the underside of the component, revealing various surface-mount components, including a large black integrated circuit (IC) and several smaller components. The text "MS 24" and "018-B2525" are visible on the board.

Solder Board-Component View 6	 A photograph showing a small blue printed circuit board (PCB) component with various electronic components (chips, capacitors, and solder joints) mounted on it. The component is placed on a black surface next to a white ruler with millimeter markings. The ruler shows measurements from 0 to 50 mm. The background is a blue textured surface.
Antenna View	BT Antenna  A photograph showing a small black rectangular component, identified as a BT Antenna, resting on a blue textured surface. A red rectangular box highlights a specific area on the component, and a red line points from the label "BT Antenna" to this box. The component has some internal components visible through a transparent section.
