**RE: President Electronics USA, FCC ID: 2AEOCPC209**

This is a Class II Permissive Change Request for FCC ID: **2AEOCPC209**, HVIN: **RANDY III FCC**. The RANDY III FCC is identical to the RANDY II FCC, FCC ID: **2AEOCPC209**, with the exception that the audio circuits have been modified to increase the audio performance. This change required minor audio circuit and PCB changes. The transceiver of the RANDY III FCC is identical in all aspects to the RANDY II FCC. The enclosure, external controls and enclosure form-factor are identical. The scope of this investigation was to evaluate the radiated Rx and Tx spurious emissions, antenna port conducted power and antenna port spurious emissions, to ensure compliance to the rule parts cited in the test report. It was determined that the RANDY III FCC meets those requirements.

Since the output of the RANDY III FCC is the same as the RANDY II FCC, and the RANDY II FCC was previously evaluated for RF Exposure, it was deemed that an RF Exposure evaluation of the RANDY III FCC was unnecessary.

Should there be any questions or concerns with this filing, please feel free to contact me.

Sincerely,

**Art Voss, P.Eng., BS EE**  
**Technical Manager**
