

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a white test bench holds a spectrum analyzer. A power cord runs from a wall outlet to a power supply unit on the floor. A wooden table on the right has a smartphone and a power adapter on it. The floor is a light-colored, slightly reflective surface.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The interior walls are covered with white, cross-shaped electromagnetic absorbers. In the center, a black metal frame holds a test table. On the table, a small electronic device is being tested. The floor is marked with yellow and blue caution tape. A computer monitor is visible on the right side of the chamber.

Radiation Emission Test Setup (30MHz to1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz range. The test chamber is lined with white, cross-shaped electromagnetic absorbers. A white, rectangular test fixture is positioned on a black, oval-shaped mat on the floor. The floor is marked with blue and yellow striped caution tape. A metal frame structure is visible on the right side of the chamber.
Radiation Emission Test Setup (1GHz to18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz range. The test chamber is lined with white, cross-shaped electromagnetic absorbers. A white, rectangular test fixture is positioned on a black, oval-shaped mat on the floor. The floor is marked with blue and yellow striped caution tape. A metal frame structure is visible on the right side of the chamber. A black, pointed object is visible in the foreground.

**Radiation Emission
Test Setup (Above18GHz)**
