Getting Started

Step 1

Download the app from the app store for apple devices or google play for android devices.

Step 2

Use the username and password supplied to login to the app.

Step 3

Once you login the "Hunt Locations screen will display.

On the bottom of the screen touch "Devices"

Step 4

Turn on Bluetooth on your smartphone or tablet.

Power on the receiver and place next to your smartphone or tablet.

On the devices page touch "Pair Receiver".

Step 5

Power on a **single collar** and place next to your smartphone or tablet and the receiver.

On the devices page touch "Pair Collar".

Step 6

Name and select color for collar.

Step 7

Power off paired collar and repeat steps 5 through 7 to pair additional collars.

Only one collar can be powered on at a time during pairing.

Getting Started Continued

Step 8

After pairing all of your collars touch “Hunt Locations” on the bottom of the screen.

Step 9

Touch “Add Hunt Location”

Step 10

IMPORTANT NOTE:

Stream Map is used for getting familiar with the system.

Preload Map should be used for an actual hunt and must be downloaded while on WI-FI prior to the hunt. When selecting preload map make sure hunt location address or GPS coordinates is near the center of the hunt location.

The Pre-Hunt screen will appear. Name the location, enter address or select use current location, select map style, and choose stream map or preload map and touch “Start Hunt”

Step 11

While outdoors power on paired collars and wait for receiver and collars to acquire a satellite signal.

Step 12

Verify both collar and receiver have acquired satellites by having a blinking green light, and dog icon pulses approximately every 10 seconds on the map.

Step 13

You are now ready to hunt if you have completed steps 1 through 12 and have downloaded a hunt area map on WI-FI.
