

Let's get started.

Quick Start Guide

In-app Setup

1. Make sure your Alarm is disarmed.
2. In the app, tap **Set Up a Device** and find the **Motion Detector** in the **Security Devices** menu.
3. Follow the in-app instructions to complete setup.

Installation

1. Install the Detector on a wall or in a corner about 7.5 feet above the floor.
2. Clean the area before you attach the Detector.

Avoid false alarms by making sure you don't aim the Motion Detector at heat sources, like a fireplace or sunny window, and that your pets can't get close to it by climbing on furniture.
