solid light.

Maintenance

- Before and after use, please wipe clean the testing window.
- Please put the cap on after use to avoid dust and dirt.

Storage

- Store it in the pouch when it's not be used, keep it in cool dry place, protect it from light. Avoid contacting with hard objects, prevent from damage. Do not store it in wet or humid environment, otherwise it may affect the product function.
- Power off while not using. Continuously charging may cause battery decrease.
- If you not used it for a long time, you must release the battery power completely every 6 months, then recharge until fully charged.
- As aged lithium batteries can not be repaired, when the device is scrapped, please do not throw away the battery freely. Return it to the recycle station to avoid environment pollution.

FAQs

Please pay attention:

- Gently place the testing window against skin and do not push too hard. Take picture when you can see skin texture clearly, otherwise the accuracy may be affected.
- Sunscreen test can recognize most sunscreen and SPF, there are very few chemical sunblock could not be detected.

How do I know if the picture is clear?

- When you preview the image on the screen, you can see clearly the skin texture, equal light distribution, no blur on any part, thus it is a clear picture. Do not press too hard on the skin, it may cause image deformation.

Is the test result accurate if wearing make-up?

- Testing with make-up will affect the results of complexion and smoothness, we highly suggest you to test without wearing any make-up, therefore, it reflects real skin condition precisely.

How to observe skin when you move device on skin?

- We suggest to hold device with testing window below testing probes direction. When you move the device up and down on skin, the image shown on screen moves in the same direction; when you move the device left and right on skin, you will see the image on screen moves in opposite directions.

Why is it failed to power on?

- Please check if the battery is fully charged, if it's not used for a long time, it may be low battery that caused unable to power on, please fully charge the battery before use.

Unable to connect device

- It may because of low battery, please fully charge the device first.

Why can't it be shut off?

- In case of special circumstances that the device cannot be shut off by holding power button for 2.5 secs, please hold the power button for 10 seconds.

Why is it not able to be charged?

- Please check if the groove on the device is contacting the metal parts on the cord perfectly. If not, please plug the metal part into the groove again.

- If the device is not used for long time, the battery may enter the state of protection, it takes 15mins charging to activate it, after 15mins, the charging light will be on indicating the device is charging. If you still cannot charge your device, please contact CosBeauty after sale service.

Network swiched in Android system

- In AP(Access point) mode, Android system does not support Wi-Fi and carrier network in the same time. when Android phone connected to aiDirect pro device, it is not connected to network, for your convenience, we offered automatic switching function, due to system limitation, the connection speed is rather slow, we suggest to finish all the testing first, then you can check other articles and activities in the APP.
- If the APP is not connected for long time, you can manually connect to "CBS006_XXXXXX" WiFi in setting.

Upgrade

- Please refer to CosBeauty official website for product hardware upgrade information: <http://www.cos-beauty.com>
App is upgrading all the time, please subject to App guidance if any changes appear.

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
