Charging the Visor Speaker

- Connect the supplied cable to DC jack of the Visor Speaker and other end to USB power outlet or to a 12V charging port of your vehicle.
- Please make sure battery is fully charged before using. For best results (or to charge faster) don't use the unit while charging.

Pairing your device to the Visor Speaker

- Press and hold the  (Power/Call button) for 3 seconds to power on the unit. The Led indicator light will flash
- From your smartphone under "Wireless Connections" tab, activate the BT and scan for "LI-T50137BT" then pair.
- Now the LED indicator light will be solid blue confirming your device has been paired successfully.
- Wireless range up to 30 Feet
- Suggested Mic range while using hands free up to 18"

Visor Speaker Controls for Calls

- Press  to receive or disconnect call on connected smartphone
- Press  twice to redial last dialed number.
- Press and hold the "-" or "+" buttons to adjust sound volume.
- Use Mute button to mute speaker and take call privately while connected to unit.

Note:

- Your Visor Speaker can only be connected to one Device at a time.
- In order to connect to another device, you must disconnect from current connection.
- Follow the above steps for new connection.

Warnings

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
