Device name

Allow you to set the name of the device .

Share device

Allow you to share the device with your family . Add your family' s account in App.

Note: Firstly ensure family' s account already registered in Tuya App.

Power management settings

This function is it will push a notification if the battery is low .You can set the low battery alarm threshold (0% to 30%).

Note: Firstly please enable Tuya App notification in mobile setting .

Basic function settings

Flip screen setting. The function is to flip the screen angle.

Talk mode setting .Select one-way communication or two-way talk you want.

PIR

OFF means you shut down the function. Also ,you can set the PIR sensitivity for Low,Medium,High.

The camera will take pictures and videos automatically when it is triggered by the PIR sensor' s detection of activity in the area it covers. Meanwhile, it will push a notification to your phone when PIR is triggered.

IMPORTANT

Reducing the False Alarms

- 1.Make sure the PIR sensor of the camera is not facing bright lights(including sunshine ,bright lamps, etc), mirror, windows or glass.
- 2.Do not mount the camera in a place with moving vehicles or streaming people.
- 3.Stay away from air vents of air conditioner or heating sources like stove, lights and refrigerator, etc. To avoid wireless interference.

4. Please do not scratch or squeeze the PIR sensor to avoid lowering its detection sensitivity.

5. A mounting height of 2M is recommended to reduce false alarms caused by the movements of small animals on the ground. If it's required, please mount the camera at a height around 1.5M.

6. When mounting the camera an appropriate angle between the PIR sensor and the monitoring area is recommended.

7. The effective distance between the PIR sensor of the camera and the moving objects is 2M to 8M.

CAMERA INSTALLATION

Please fix the iron ball bracket to the wall with screws, and then magnetize the camera to the iron ball. It is very convenient and easy to adjust the angle.

FAQ

Q1.The camera can't connect to Wi-Fi.

Make sure you select the right Wi-Fi network and enter the right password.

Make sure your Wi-Fi is 2.4GHz.

Make sure the camera and your mobile device are close to the router.

Q2. How can I reset the camera?

Please press the Reset button .There is beeping sound after a successful reset and the RED LED will flash slowly.

Q3. Why can't I receive the push notifications of the alarms?

Make sure you have allowed Tuya App to push notifications in the settings of your mobile device.

Q4. Why there is no video recorded?

Make sure you have installed a Micro-SD card with enough capacity into the camera or you have subscribed a cloud plan.

SPECIFICATIONS

Lens	FO V/130°W ide-angle lens (4Glass)
Infrared LEDs	10 pcs Infrared LED s with 8 meters flash distance
PIR Motion Sensor	6 meters PIR distance
Storage	Up to 128GB Micro SD card
Connectivity	802.11b/g/n Wi-Fi@2.4G
Power consumption	Standby 200uA Working 220mA
Battery	2x18650 batteries
USB	DC 5V
Wi-Fi distance	60 meters (open space without obstacle)15 meters (indoor)
Video Compression	H.264
Voice Intercom	Two-way audio with noise cancellation
Video resolution	1920*1080@15fps
Working Temperature	-10~ 55 °C
Storage Temperature	-20~ 60 °C

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement.

The distance between user and products should be no less than 20cm.

If you have any questions or problems.

Please contact us by email: babymonitor@whomeshop.com

We will offer prompt and authoritative reply within 24 hours, and try our best to resolve your problem ASAP.
