

The image consists of two photographs of a disassembled electronic device, likely a small handheld unit or a component of a larger system. The top photograph shows the device's casing (left) and back cover (right) with a ruler for scale. The casing is black and contains a white circuit board with various components, including a large square component in the center. The back cover is black and features a silver-colored metal mesh. The bottom photograph shows the internal circuit board (left) and a battery component (right). The circuit board is white and populated with numerous electronic components, including resistors, capacitors, and integrated circuits. The battery is a rectangular, silver-colored component.
