Hey Rebel, meet Robin.

ROBIN NEVER RUNS OUT OF SPACE. HOW?
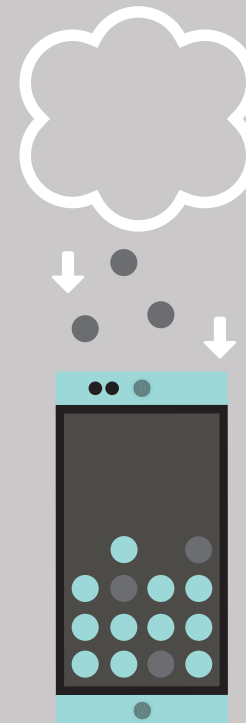

1 When Robin is charging and connected to Wi-Fi, it backs up all your apps and photos to the cloud.

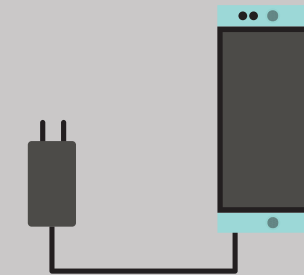

**2** When you need more space, Robin archives the stuff you never open.

3 When you want to restore something that's been archived, tap to open it like you normally would. Robin will bring it back from the cloud right away.

1 Plug in Robin to charge it. It's so easy with USB C*.
*charger sold separately

2 Press the SIM pin into the hole and remove the tray. Pop your SIM card in.

3 Press and hold the power key. (It's the fingerprint sensor too!)
