Pairing Instructions

1. Turn on the power toggle switch, the Power Indicator will turn on for 3 seconds and then shut off.

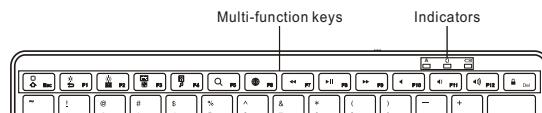

2. Press the connect button, the Bluetooth Indicator will start to flash. The keyboard case is now ready to connect to your device.

3. Activate your device's Bluetooth function and search for the device.
4. Click on its name to connect once the Bluetooth keyboard has been found.
5. Enter the password code as displayed on the screen. Then you can use the keyboard.
6. Troubleshooting if unable to connect.
 - Make sure the power switch is on
 - Make sure the keyboard cover is within operating distance
 - Make sure the battery still holds a charge
 - Make sure your Bluetooth device is enabled
 - Make sure the keyboard cover is paired to your device successfully.

Charging Instructions

When battery power is low, the Charge Indicator will turn red and begin to blink, indicating that it is time to recharge the keyboard case.

1. Connect the micro end of the USB power cable to the micro USB port on the keyboard case.
2. Connect the other end of the cable to a power adapter or the USB port of a computer.
3. The Charge Indicator will turn red while the keyboard case is charging. Once it is fully charged, the Charge Indication will turn off.
4. The built-in lithium battery has no memory effect, so feel free to charge your keyboard case whenever necessary. If the case will not be used for an extended period of time, we recommend that you turn the power switch off in order to conserve power and extend battery life.
5. Unable to change the keyboard case:
 - Make sure the USB power cable is connected, properly to the keyboard case and the power source.
 - Make sure the wall charger is connected properly to the power outlet.

KAMOR®

Kamor Bluetooth Rechargeable Keyboard

Made In China

FCC Information and Copyright

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,

uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference

to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does

cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
