

## FCC Labels placement

### Robot Label (FCC ID: 2AFKS-WLTHYMIO)

If possible, we would like the label to keep the simple version (A). If this is not accepted, we can add the statement (B).

The label for the robot is placed underneath it as shown on the picture:

### Dongle label (FCC ID: 2AFKS-WLDON)

This label is pasted under the USB dongle:

All labels are non-removable stickers. It is not etched in the injection mold because the same mold is used for different products.

The FCC compliance statement is in the user manual as well.
