

## USER MANUAL

### Welcome

Thank you for purchasing the mJoose 3-in-1 Case. Our patented technology alleviates dropped calls and delivers great reception, while our Quick Charge extended battery gives you twice as long to talk, text and surf.

### Package Contains:

- mJoose 3-in-1 Case for 1) Signal Joose, 2) Battery Boost 3) Drop Proof
- Micro USB Cable
- Headphone extender cable
- Quick start guide and user manual

### Operations:

#### **Inserting your iPhone into the case**

Simply slide your phone into the lightening connector and snap the top of your iPhone into the case.

#### **Removing your iPhone**

Release the case from your iPhone by using your fingers to push the iPhone out through the camera hole. Once the top of the phone releases, slide the phone up to carefully remove it from the lightening connector.

Note: If the phone is not removed carefully, it may cause damage to the Apple lightening connector.

## Signal Joose Switch for signal amplification

- Slide the switch to turn on the signal amp whenever you're in a weak signal coverage area. The light bars are only to show you that it's on not to measure signal strength.
- While the signal is strengthened as soon as you flip the switch, the bars on your iPhone will go up once a phone call is initiated. The bars are only updated every couple of minutes or for an event, placing a call becomes that event.
- The signal amp can be left on or turned off when not in use. It does not add any significant drain to the case battery and no drain to the iPhone battery. However, it is best to turn the signal amp off when your iPhone will not be used for an extended period of time.

## Battery Boost on/off Boost Switch

- Start the Quick Charge for your iPhone with the mJoose 3-in-1 Case by sliding the battery switch on -- you will see the iPhone's charging icon indicate the charge has started. At turn on, the LEDs will light up to indicate the case's battery level.
- The battery life indicator lights illuminate blue every time the battery switch is turned on. You can confirm that the case is charging your iPhone by checking the battery icon on your iPhone.
- You can check the case's battery level by counting the number of LED lights that illuminate when you turn the phone on, one light bar 25% charged, two lights 50%, three 75% and fully lit, fully charged 100%.

## **Priority Charging and Sync**

- Connect the Micro USB cable to the side of the mJoose 3-in-1 Case and plug into your computer or any USB power source. Your phone recharges first and then the case recharges.
- Our mJoose 3-in-1 Case enables pass-through sync and charging while connected to a computer.
- The battery on/off switch light will turn red when you plug it in and it's being charged and the red light will turn off when it's fully charged.
- The battery on/off switch light will blink blue when the case needs to be recharged.

## **Warranty**

At mJoose, our goal is the highest quality manufacturing standards. All our cases come with a 1-year warranty from the purchase date. It is important to register your product and keep your receipt as not being able to prove your purchase may void the warranty.

## **Exclusions and Limitations**

Except for the limited warranty expressly set forth, or to the extent restricted or prohibited by applicable law, mJoose expressly disclaims any and all other warranties express or implied, including any warranty of quality, merchantability, or fitness for a particular purpose, and you specifically agree that mJoose shall not be liable for any special, incidental, indirect, punitive or consequential damages for breach of any warranty of any type on any mJoose product. In addition to and without limiting the generality of the foregoing disclaimers, the limited warranty does not under any circumstances cover the replacement or cost of any electronic device or personal property inside or outside of the mJoose product.

Signal strength and voice quality may vary depending on the carrier and user location.

## **Warning**

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages ("Purchaser"), and not mJoose ("Manufacturer") are responsible.

- 1) Don't store the case in high temperature environments including direct sunlight. Never place in a fire, oven or other dangerously hot places.
- 2) Do not replace any parts of the mJoose case.

3) Be advised that if your case is compromised by a dent, gash, corrosion or any other method that exposes the battery immediately discontinue use. If the case is excessively hot or demonstrating an abnormal phenomenon also discontinue use. Then contact a local battery-recycling center for proper disposal. Never dispose the battery case in the garbage as that is illegal according to state and federal laws.

4) Do not attempt to re-use the battery for any other purpose.

5) This case isn't waterproof so do not emerge in water.

6) Please charge the battery according to our instructions. Trying to charge in other non-compliant methods could damage your case and void the warranty.

7) When purchasing for a minor, Purchaser must give detailed instructions on these warnings and intended use of the mJoose 3-in-1 case. Failure to do so is the sole responsibility of the Purchaser who agrees to indemnify mJoose for any misuse of the case.

## Legal

This battery is meant for use only in conjunction with the appropriate device. Please consult your device packaging to determine whether this battery is compatible with your particular mobile device.

Manufacturer is not responsible for any damage to any mobile device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this battery in conjunction with any device or accessory other than the appropriate mobile device for which this battery is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse this battery as outlined above. If you are responsible for battery use with an unintended mobile device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third part(ies).

The trademark "iPhone" is used with a license from Apple Inc. "made for iPhone" means that an electronic accessory has been designed to connect specifically to iPhone, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of the accessory with iPhone may affect wireless performance. All rights reserved.

This device complies with FCC Part 15 and Industry Canada license exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This device complies with Health Canada's Safety Code. The installer of this device should ensure that RF radiation is not emitted in excess of the Health Canada's requirement.

"Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment."

MODIFICATION: Any changes or modifications of this device could void the warranty.
