- Buzzer test,
- keypad test ,
- MSR Test ,
- ICC Test ,
- Tamper Test.

## Connectivity

### - Bluetooth

By default the Bluetooth (BT) will be **ON** as soon as you power on the terminal after which. After the BT is set to ON, the device name will be visible for other devices to pair with. The terminal needs to be paired with a mobile/tablet/PC/laptop on which the Jio Money mPOS application is installed to perform payment transactions.

## - USB

JioPay 2800 terminal can be connected to a PC using  $\mu$ USB cable provided inside the box for performing payment transactions.

Required device drivers need to be installed on PC before connecting the device. The device drivers can be downloaded from the link below:

<http://>

## **TROUBLESHOOTING**

### ● **Terminal starts and shuts down**

*Checks the battery level, chances are battery is low*

### ● **Problems with reading payment cards**

*For MSR cards*

*-Make sure the magnetic stripe on card is facing correctly as shown in the section of MSR*

*-Swipe again the card with a constant speed, not too slow or not too fast*

*For Chip based cards*

*-Make sure chip on the card is facing correctly as shown in ICC section*

*-Chip should not be in worn out state*

*For NFC cards/Mobiles*

*-Card/Mobile should be tapped on the back cover of terminal*

### ● **Problem connecting with Bluetooth**

### ● **Verify that BT is set to ON**

*Check if the third party mobile's Bluetooth is ON.*

*If problem still persists even after rebooting JioPay 2800, please contact Customer Care.*

- **Bluetooth connectivity is not established**

1. *Make sure that the BT is on*
2. *Check if the third party mobile's bluetooth is on*

If problem still persist, after rebooting jiopay 2800 Contact customer care.

## How to clean your terminal

**WARNING:** DO NOT USE UNDILUTED AMMONIA OR ANY CORROSIVE CHEMICALS, ABRASIVE CLEANERS

1. Disconnect all cables and make sure the terminal is powered off before beginning any cleaning.
2. Apply denatured alcohol to a clean, soft, non-abrasive, low-lint cloth. Carefully wipe the entire terminal.
3. To ensure perfect operation, it is important to clean the card reader regularly using a cleaning card. You are recommended to clean the terminal whenever read problems occur, but at least once a month. To do so, you should use damp cleaning cards which you pull through the card reader five to ten times on each side.

## WARRANTY CERTIFICATE

---

Please note that the battery is excluded from the warranty and is guaranteed for 1 year.

Battery performance will degrade over time and you may eventually need to purchase a new one and get it replaced at the acquirer's authorized service center only for device safety and correct disposal of the battery.

### Safety

---

#### CE

DO NOT disassemble or replace the battery. If you suspect there is something wrong with the battery, please carry the unit to the service centre for help.

**CAUTION:** RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

The battery should not be disposed together with other waste. The battery has to be disposed at an authorized place for recycling of electrical and electronic appliances. By collecting and recycling waste, you help save natural resources, and make sure the product is disposed in an environmental friendly and healthy way.

The operating temperature: 40°C

The rating input (for battery charge function): 5V, 2000mA

### FCC Compliance & Warning

---

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference,
- 2) This device must accept any interference received, including interference that may cause undesired operation.

**Note 1:** However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Note 2:** The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate this equipment.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## Declaration of Conformity (DoC)
