Warranty

Register now to get your ClipTooth™ warranty activated

To activate your ClipTooth™ warranty you will need to send us an email at warranty@cliptooth.com within 30 days from date of purchase with the following information: 1. Name 2. Place of purchase 3. Date of purchase 4. Telephone number.

Product Warranty Terms

Your ClipTooth™ carries a one-year limited warranty against defects in materials and workmanship.

What Isn't Covered

The warranty will not cover product failure due to any defect or malfunction that is a result of misuse, failure to follow operating instructions, abuse, or use with improper or faulty equipment. It will not cover incidental damages. The warranty is void if the product itself is opened or disassembled by the user or any third party. This warranty does not provide service or support for any of the third party products used with the ClipTooth™, including, but not limited to mobile phones and tablets.

Documentation and Submitting a Claim

To help ensure warranty claims are for the genuine ClipTooth™, our warranty support department may require a receipt to complete your claim. If a receipt is required, you will be emailed requesting a copy be attached and sent to us via email. To submit a claim email us at warranty@cliptooth.com with the following details: 1. Name 2. Place of purchase 3. Date of purchase 4. Telephone number 5. What problems or defect you are experiencing with your ClipTooth™. We will, at our discretion, repair or replace any product that proves to be defective in material or workmanship. If your product is no longer being manufactured or is out of stock, we may replace your product with a similar or better product at our option.

How to Practically Operate your ClipTooth™

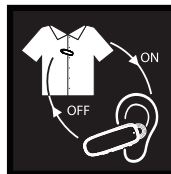

your ClipTooth™ has great unique features – the first unique feature is that the whole unit is a clip which clips on your clothes bags etc for easy carrying and immediate accessibility! the second unique feature is that when you turn it ON it automatically connects to your mobile device and automatically answers an incoming call all in approximately 2-3 seconds.

- the unique recommended practical way to use your ClipTooth™

make sure you are ClipTooth™ is OFF. clip it on your shirt, bag, clothing etc.

when receiving a call simply unclip, turn ON, place in your ear & start talking! (your ClipTooth™ automatically connects to your mobile device & answers your call in 2 – 3 seconds!). when you finish your call turn your ClipTooth™ OFF & clip it back on! SO EASY, SO CONVENIENT, SO SIMPLE, SO SAFE! & the great feature is that because your ClipTooth™ is OFF when it is clipped on, you have infinite standby time & you save the battery life of your ClipTooth™ & your mobile device!

If you want to make a call simply unclip, turn ON, place in your ear, dial or select your number and make your call! (your ClipTooth™ automatically connects to your mobile device in 2 – 3 seconds!). when you finish your call turn your ClipTooth™ OFF & clip it back on! SO EASY, SO CONVENIENT, SO SIMPLE, SO SAFE!

easy to use-when receiving call unclip turn ON & talk, turn OFF & clip on when finished

How to Practically Operate your ClipTooth™ continued..

- when you are in your car we recommend that you use your ClipTooth™ as follows:

before you start driving unclip your ClipTooth™, turn it ON and place it in your ear, it will automatically connect to your mobile phone and you will hear "your headset is connected", keep your ClipTooth™ in your ear for the entire duration of your driving.

place your mobile phone on a reliable car mount so that you can clearly see the screen without having to move close to it or touch it.

when a call comes in you will hear the ringing sound through your ClipTooth™ in your ear and you will answer by pressing the multifunction button (see 4 below). When your call is complete you can terminate it by pressing the multifunction button again.

- avoid any contact with your mobile phone whilst driving
- avoid making any calls - if it is absolutely necessary to make a call stop your car slowly in a safe area far away from any danger or traffic, dial your number and once your call is active through your ClipTooth™ you can start driving again. be extra careful when entering traffic again. you can also make a call by using Siri (iphone ios) or other speech recognition features of your mobile device by double tapping the volume "+" button on your ClipTooth™
- answer only calls that are absolutely necessary - if a call comes in and you absolutely have to take it, answer it as specified above

Note: some countries prohibit using a mobile phone in the car even with a bluetooth headset so make sure you are aware of your local country laws.

your safety and the safety of others around you comes first & is a priority !

when you have finished driving, take your ClipTooth™ out of your ear, turn it OFF, clip it on your clothes, bag etc and exit your car.

1. Thank You

Congratulations on purchasing your ClipTooth™. ClipTooth™ is the first Bluetooth® earpiece with fully integrated patented clip functionality. Thank you for your purchase and be sure to use your ClipTooth™ as shown in this user manual so that you can enjoy the maximum safety and convenience benefits.

2. What Your ClipTooth™ Does

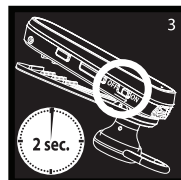

- Make and receive calls from your mobile device wirelessly and hands free
- Listen to music and audio from your mobile device wirelessly and hands free
- Single earphone, clip & Bluetooth® unit that allows you to clip it conveniently on your clothing, bags and other items for easy and immediate accessibility when receiving a call
- 2-3 second automatic phone connect and call answer which allows you to keep your ClipTooth™ off when not in use for extended standby time
- Plays the audio from popular apps such as facetime, google maps, gps, skype, youtube, wechat, viber, facebook chat & others
- Voice prompts for easy use
- Volume and track controls
- Voice Range Isolation technology focuses sound to within a 6-inch radius of the microphone eliminating background noise
- Supports voice command/speech recognition features of your mobile device
- Multi point-can be used for 2 mobile devices simultaneously
- Alert if phone is out of range
- Stereo headset when used with earpiece accessory (included)
- Works with all Bluetooth® enabled devices
- Independent answer button when powered on

3. 4 Key Features of Your ClipTooth™

Earpiece & clip 1 single unit

2-3 second automatic phone connect & call answer when switched ON

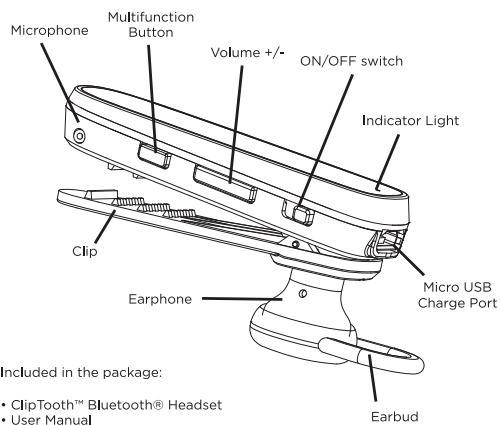

Clips on clothes, bags etc for easy use and carrying

Easy to use-when receiving call undip turn ON & talk turn OFF & clip on when finished

4. About Your ClipTooth™

Included in the package:

- ClipTooth™ Bluetooth® Headset
- User Manual
- Stereo Earpiece Accessory
- USB Charging Cable
- Earbud (7 pcs) + Earhook (2pcs)

5. Getting Started

Please attend to the following items before using your ClipTooth™:

- Charge your ClipTooth™ (see 6 below)
- Activate the Bluetooth® function on your mobile device (refer to the manual of your mobile device)
- Pair your ClipTooth™ with your mobile phone/mobile device (see 8 below)

6. Charging Your ClipTooth™

(Please refer to the diagram in 4 above)

- Make sure that the **ON/OFF** switch of your ClipTooth™ is in the **OFF** position
- Insert one end of the **USB Charging Cable** into the **Micro USB Charge Port** of your ClipTooth™ and the other end into the USB port of your computer or other charger with USB port
- When the ClipTooth™ starts to charge the **indicator light** will turn on with a red color
- Fully charges in less than 2 hours

7. Turning Your ClipTooth™ ON & OFF

(Please refer to the diagram in 4 above)

- To turn your ClipTooth™ **ON** simply push the **ON/OFF** switch to the right in the **ON** position
- To turn your ClipTooth™ **OFF** simply push the **ON/OFF** switch to the left in the **OFF** position
- A red color will indicate the **OFF** position
- A blue color will indicate the **ON** position

8. Pairing Your ClipTooth™ to Your Mobile Device

Your ClipTooth™ connects to **all** Bluetooth® enabled devices using a procedure called "pairing" which can be done easily and quickly by following these steps:

- Make sure the Bluetooth® feature of your device is turned on and that your mobile device and ClipTooth™ are close to each other (10cm – 20cm)
- Turn your ClipTooth™ to the **ON** position. The indicator light will start flashing red & blue alternately and the **voice prompt** will say "**pairing**" indicating that your ClipTooth™ is now ready to pair
- Open the Bluetooth® menu of your mobile device and "search for new devices" and in a few seconds you will see "ClipTooth™"
- Choose "ClipTooth™" and wait until your mobile device and your ClipTooth™ connect. If your mobile device asks for a pass code please enter 0000
- As soon as connection is achieved the **voice prompt** of your ClipTooth™ will say "**your headset is connected**"

Note:

- Make sure you complete the above steps within **3 minutes** of switching your ClipTooth™ **ON** as it remains in pairing mode for maximum **3 minutes**
- Repeat the above steps should pairing not be successful on your first try

9. Pairing Your ClipTooth™ to a Second Mobile Device

Your ClipTooth™ can be used with 2 mobile devices simultaneously by following these steps:

- After successfully pairing with your **first mobile device** as specified in 8 above turn your **first mobile device OFF** or deactivate the Bluetooth® feature of this device and then turn your ClipTooth™ **OFF**
- Make sure the Bluetooth® feature of your **second mobile device** is turned on and that your second mobile device and ClipTooth™ are close to each other (10cm - 20cm)
- Turn your ClipTooth™ to the **ON** position. The indicator light will start flashing red & blue alternately and the voice prompt will say "**pairing**". Your ClipTooth™ is now ready to pair
- Open the Bluetooth® menu of your **second mobile device** and "search for new devices" and in a few seconds you will see "**ClipTooth™**"
- Choose "**ClipTooth™**" and wait until your **second mobile device** and your ClipTooth™ connect.
- If your **second mobile device** asks for a pass code please enter 0000. As soon as connection is achieved the voice prompt of your ClipTooth™ will say "**your headset is connected**"

Once paired with the **second mobile device**, turn your ClipTooth™ **OFF**. Then make sure that **both mobile devices** are turned **ON** with the Bluetooth® function activated. Turn your ClipTooth™ **ON** and it will automatically connect to both mobile devices & you will hear the voice prompt "**your headset is connected**" for each time it connects with each mobile device. If one of your devices does not automatically connect with your ClipTooth™, switch your ClipTooth™ **OFF** and then switch it back on again. If the device still does not automatically connect, navigate to the Bluetooth® settings of this device, make sure that the Bluetooth® feature is activated and connect manually to your ClipTooth™ by pressing "**ClipTooth™**" on the list of paired devices.

If you continue to have pairing problems we suggest that you reset your ClipTooth™ (see 22 below), delete ClipTooth™ as a device from the paired list on both your mobile devices and then follow the steps in 8 & 9 again.

10. How to Answer, Terminate, Reject & Redial a Call

- **Answering a call** – You can answer a call in 2 ways with your ClipTooth™. The first way is by simply turning it **ON**. It will automatically connect with your mobile phone and answer your call in 2-3 seconds. The second way is by simply pressing the **multifunction button** (this way requires that your ClipTooth™ is already switched **ON** before your call comes in)
- **Terminating a call** – You can terminate a call in 2 ways with your ClipTooth™. The first way is by simply pressing the **multifunction button**. The second way is by pressing the end/termination button on your mobile phone
- **Rejecting a call** – If your ClipTooth™ is switched **ON** before your call comes in you can reject it by double pressing the **multifunction button**
- **Redialing a call** – You can redial a call by double pressing the **multifunction button**

11. How to Adjust the Volume of Your ClipTooth™

You can adjust the volume of your ClipTooth™ during a call or whilst listening to audio/music by simply long pressing the **volume “+” or “-”**. Once the volume reaches the maximum or minimum level you will hear a beep. We suggest that you also adjust the volume control directly from your mobile phone by pressing the volume buttons usually found on the side of your mobile device.

12. Using Your ClipTooth™ to Play Music/Audio From Your Device

- **Play music** - You can hear your music played from your mobile device on your ClipTooth™. Make sure your ClipTooth™ is turned **ON** and connected to your mobile device. Select the song/s you want to hear and press **play** on your mobile device. You can pause the song by short pressing the **multifunction button** and short pressing it again to resume playback.
- **Changing tracks** - You can change tracks to the next song by short pressing the **volume "+"** button and change tracks to the previous song by short pressing the **volume "-"** button
- **Adjusting the volume** - see 11 above on how to adjust the volume
- **Stereo listening** - Your ClipTooth™ comes with a stereo earpiece accessory which allows you to listen to your music/audio in stereo. Simply connect the Micro USB Connector of the stereo earpiece accessory to the Micro USB Charge Port of your ClipTooth™, place the earpiece accessory in one ear and the ClipTooth™ in the other and listen to your music/audio in stereo.
- **Listening to app audio** - you can hear the audio of popular apps such as facetime, google maps, gps, skype, youtube, wechat, viber, facebook chat & others on your ClipTooth™. Simply turn on your ClipTooth™ place it in your ear and run your app.

13. Voice Prompts of Your ClipTooth™

Your ClipTooth™ has voice prompt features which make it really easy to use such as:

- "power on"
- "pairing"
- "your headset is connected"
- "power off"
- "your headset is disconnected"
- "beyond the range of connections"
- "battery full"
- "battery level high"
- "battery level medium"
- "battery level low"
- "recharge headset"
- "incoming call"

14. Safety, Tips and How to Take Care of Your ClipTooth™

- **High volume** – We highly recommend adjusting your ClipTooth™ volume to a comfortable level and to avoid higher volumes than necessary as it can lead to a loss of hearing after long term use
- **Cleaning** – Clean your ClipTooth™ with a soft dry cloth
- **Water** – Keep your ClipTooth™ away from water. Any contact with water will damage your ClipTooth™
- **Storage** – Do not store or use your ClipTooth™ in temperatures below 15°C or higher than 55°C otherwise battery life will be reduced
- **Charging cable** – Charge your ClipTooth™ with its original charging cable
- **Removal of Battery** – Do not attempt to remove the battery from your ClipTooth™, it is a built-in rechargeable battery and any attempts to remove this will void the warranty

15. Battery Level Indicator

The battery level of your ClipTooth™ can be seen on the top right corner of your iPhone. Note that this feature is not available on Android or other mobile devices

16. How to Reset Your ClipTooth™

You can reset your ClipTooth™ by pressing the **volume +/-** button continuously for 5 – 7 seconds. After resetting your ClipTooth™ please follow the instructions and steps specified in this manual so that you can pair it with your mobile devices and start using it again. We suggest that you reset your ClipTooth™ in the following cases:

- You have new mobile devices and want to erase all prior pairing of your ClipTooth™ with your old mobile devices so that you can pair successfully with your new mobile devices
- Your ClipTooth™ is not functioning correctly or as specified in this manual
- Your second mobile device is not successfully pairing or connecting with your ClipTooth™

17. Technical Specifications

- Supports HSP, HFP, A2DP, AVRCP
- Transmitting power : class 2
- Working distance: <= 10m
- Frequency range: 2.402 GHz – 2.480GHz
- Charging time <= 2 hours
- Talk time <= 5 hours
- Music time <= 4 hours
- Standby time when switched ON : <=70 hours,
standby time 1 year in OFF TO TALK IN 2sec mode
- Weight 10g

NOTES

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.
