RE: Comments of July 22, 2016
APPLICATION: TPW Innovations ULC
FCC ID: 2AFYM-0142015
IC: 20660-0142015
ATCB019647

From the Operational Description, it appears that the system in which the EUT operates, and with which it is marketed, is also comprised of a vibrator with a stand-alone receiver, subject to certification or DoC, and a wireless charging base, which is apparently a Part 18 device (8CC) and also, potentially, a JBP, due to its USB port and ability to connect to a pc via USB, both of which are also subject to certification or DoC. Please indicate if/how these other devices in the system are being/have been authorized.

WLL: All of the other components of the system have been authorized by DOC as required
