

Device Security Attestation Letter

8/21/2025

ATTN.: Reviewing Engineer

FCC ID: 2AFZZRP43G

We, Xiaomi Communications Co., Ltd, attest that this device under FCC ID: 2AFZZRP43G complies with device protocol requirements and operational restrictions: for Dual Client 6CD.

Dual Client (6CD):

1. Device Protocol Attestation Statement:

a. This device will only associate and connect with a low-power indoor Access Point, subordinate device, or standard access point and never directly link to other client devices.

b. Statement that this device will always initiate transmission under the control of a low-power indoor AP, subordinate, or standard AP, except for brief communications before joining a network. These quick messages will only occur if the client has detected an indoor AP, subordinate, or standard access point operating on a channel. These brief messages will have a time-out mechanism such that they will not continually repeat the request if they do not receive a response from an AP.

c. Statement that this device, when associated and connected with a low-power indoor access point, subordinate or standard access point device, will operate at a power lower as advertised by the indoor access point, subordinate, or standard access point (In addition to the attestation testing is required):

i. lower or equal to the power advertised by the low-power indoor access point or subordinate and never above the maximum output power allowed by the FCC grant for clients associated with indoor clients or subordinates.

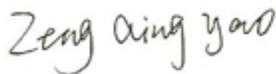

ii. lower than 6 dB below the power of the standard access point advertised.

d. Statement for modules only: Contention-based protocol, as demonstrated in the test report, is permanently embedded in the module and is not host-dependent protocol shown in the test report.

2. Statement acknowledging device restrictions:

a. Control of or communications with unmanned aircraft systems is prohibited, including drones.
