Outside

Charging - Charge toy and remote before use - To charge, connect the magnetic charging cable to the back-side of the toy or the top of the remote - When charging, the LED light will flash - When fully charged, the LED light will remain lit Maintenance - Clean your KeyVibe before and after each use with an antibacterial toy cleaner, or warm water and antibacterial hand soap - Air dry or towel dry thoroughly before storing - To prolong the life of your KeyVibe, store away from heat and sunlight, and away from other silicone toys - Use water-based lubricant with this toy. Silicone-based lubricant may damage the toy.	Warranty Details - All Belleza products come with a 1-year warranty from the date of purchase - This toy is designed as a novelty only, not as a medical device. We don't recommend using it for any other purpose. - If you experience any issue with your product, please email care@bellesa.co with your order number and a video of the issue. FCC STATEMENT 1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.	NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. RF warning statement: The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
