

Edyn Water Valve

ED01-001

User manual

Let's Connect

GET THE APP

Download from the App StoreSM or on Google Play.TM

GET CONNECTED

The Edyn app will walk you through connecting your Water Valve to your Wi-Fi network. Having trouble connecting? Visit edyn.com/support.

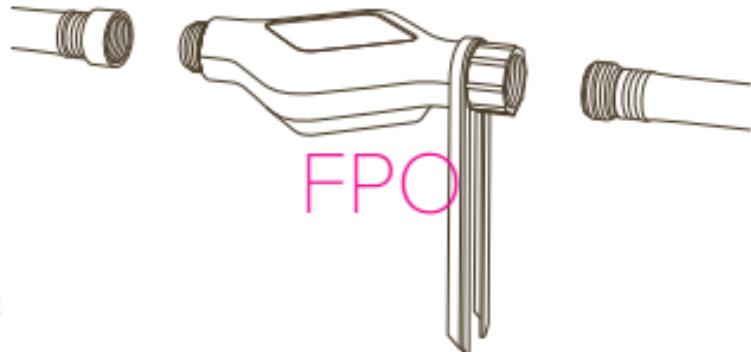

START WATERING

That's it! Attach your Water Valve to your irrigation system and start watering.

Connecting to your Irrigation System

Your Water Valve works with most irrigation systems by attaching to the main garden hose.

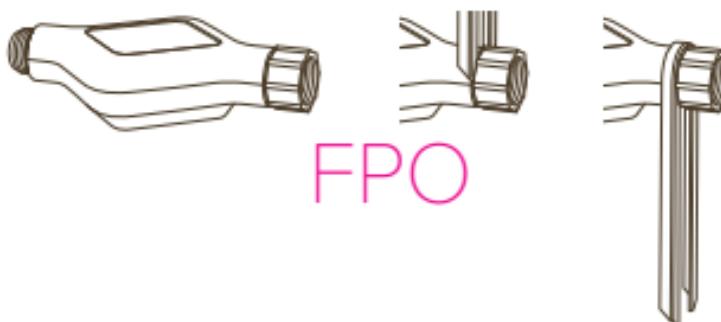

Please visit edyn.com/support for additional tips on specific irrigation system types.

KEEPING YOUR WATER VALVE UPRIGHT

Included in the box is an anchor stake to help make sure the solar panel always stays facing up. Place the stake over one end of Water Valve and into the ground, securing it in place.

Make sure your Water Valve is placed in range of your Wi-Fi router (best up to 300 feet) and has enough sunlight for solar charging.

Batteries and Charging

BATTERY

Your Water Valve is powered by a rechargeable, LFP battery that lasts up to seven years and is charged by solar energy. We recommend making sure your battery stays charged above 50 percent.

You can check your Water Valve's battery level in the Edyn app under **Menu**.

If your battery isn't holding a charge, or you believe it has stopped working, please visit edyn.com/support. Do not open your device to check on the battery.

CHARGING

To keep your Water Valve charged, it will need a decent amount of direct sunlight.

Make sure your Water Valve's solar panel stays facing upwards, clean and unobstructed to maintain proper functionality.

Check how your Water Valve's solar panel is functioning in the Edyn app under **Menu**.

Caring for Your Water Valve

Use water and a soft, nonabrasive cloth to clean your Water Valve. If you have hard water, we recommend isopropyl alcohol or bottled water for cleaning the solar panel.

Your Water Valve is water resistant so that it can live outdoors, but please don't submerge it completely under water.

Do not expose your Water Valve to temperatures below 32°F or above 120°F.

Be careful not to scratch the top solar panel surface. Scratches will impact its ability to charge.

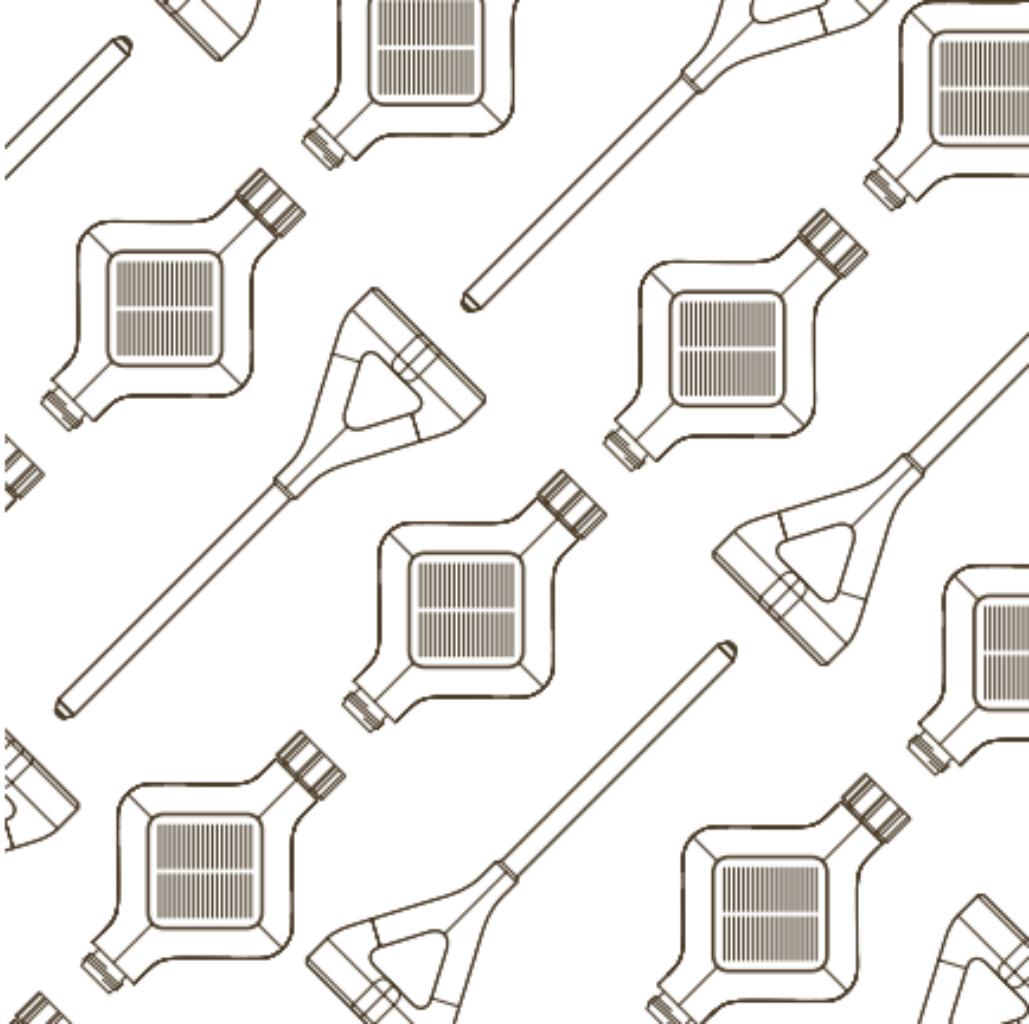

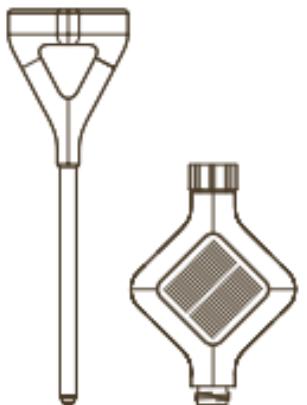

Do not attempt to repair, modify, or disassemble your Water Valve. Doing so will violate your warranty. If you believe something is wrong with your Water Valve, please visit edyn.com/support for help troubleshooting.

PRODUCT DISPOSAL

Please dispose of your Water Valve and product packaging in accordance with local regulations. Do not dispose of your Water Valve with regular household waste.

Complete Your Edyn Smart Garden System

Add an Edyn Garden Sensor to continuously monitor conditions in your garden, including soil moisture. Find out more at edyn.com

FCC Information and Copyright

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,

uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference

to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does

cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

IC warning

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement
