## Lockitron Bolt (TRON201) FCC / CE Label and Size

The Lockitron Bolt (TRON201) label is placed on the rear of the unit. It is not located on any removable component such as a battery cover and permanently affixed to the same body as the transmitting equipment.

Because Lockitron Bolt is narrower than 8cm by 10cm the following statement is included in the Lockitron Bolt user manual:

***This device complies with Part 15 of the FCC Rules.***

***Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.***

The permanently affixed label is 47mm by 10mm and placed approximately 2cm from the top of the unit in a central position on the rear surface of the unit.

The FCC ID of the unit is “2AGC2-TRON201”. CE and WEEE symbols are also present for other certification body requirements.
