Getting Started 20B

To use your 20B stereo Bluetooth headphone, please follow the steps below:

- 1) Ensure your Bluetooth headphone is fully charged.
- 2) Pair your charged Bluetooth headphone with a Bluetooth-enabled mobile phone prior to use on the 1st time. Please fully charge your new headphone before first use.

Charging Your Headphone

Connect the USB charging cable to charging USB socket of the headphone. The LED indicator keeps red while charging; it will turn off once it is fully charged.

Turning Your Headphone On and Off

Turning on the headphone

Press and hold the MFB for around 2seconds until the LED indicator flashes solid blue for 1 second and then flashes blue and red alternatively with an ascending “beep” sound heard. The headphone enters into pairing

mode automatically.

About pairing function, please refer to "Pairing Your Headphone".

Turning Off the headphone

Press and hold the MFB for approximately 5 seconds until the LED indicator flash solid red then turn off with a decreasing "beep" sound heard.

Attention: If you will not use the headphone for a while, you should consider turning off the Bluetooth function on your mobile phone as well.

Pairing Your Headphone

The headphone works with Bluetooth-enabled phones, prior to using and pairing your headphone for the first time, please check if your mobile phone is Bluetooth-enabled.

The pairing instructions for typical Bluetooth-enabled mobile phone are explained in "Pairing Your Headphone". The headphone pairing procedure may vary depending on the setting of your mobile phone. Please contact the manufacture of your mobile phone or its agent for further information.

Pairing Your Headphone

- 1) Place the headphone and the mobile phone where they are easily viewable and no more than one meter apart.
- 2) Ensure the headphone is turned off.
- 3) Press and hold the MFB for 3seconds until the connection LED indicator flashes red and blue alternatively.
- 4) Activate your mobile phones' Bluetooth function; please refer to your mobile phone user guide for details.
- 5) Set the mobile phone to search for Bluetooth devices within range and select "20B"from the list of devices shown.
- 6) Enter pass code "0000" and press "OK" to pair your headphone with mobile phone, when the pairing is completed, the LED indicator will flash blue once every 3 seconds and the headphone in standby mode.
- 7) Go back your mobile phone's main menu.

After initial pairing is established, the headphone will automatically reconnect to the last paired device upon turning ON.

Answering / Rejecting call

When a call is coming, the ring tone will be heard by headphone. Press the MFB once to accept the call or answer the call via your mobile phone in normal way.

To reject the incoming call, press and hold the MFB for around 2 seconds until a "beep" sound is heard then release it.

Ending a call

While speaking, press the MFB once to end the call or end the call via your mobile phone in normal way.

Voice Dialing from Your Headphone

If your mobile phone is equipped with voice dialing function, simply press the MFB for around3 seconds until a "beep" sound heard then release, and please say the voice tag according to mobile phone tips.

Attention: For voice dialing, you must record the voice tag (the person name) into your mobile phone prior to

using the voice dialing function on the headphone, please refer to your mobile phone's guide on how to record the voice tag.

Last Number Re-dialing From Your Headphone

In standby status, double press the MFB on your headphone.

IMPORTANT: The above function is only applicable to mobile phone with Bluetooth hands free profile. Functionality varies depends on the mobile phone model you have. Please refer to your mobile phone user guide for additional information.

Adjusting the Volume

When you are on the phone or listen to the music, long pressing "+" is for volume up, long pressing "-" is for volume down.

Play / Pause Music

Press the "MFB" to play when the device is pausing and press the "MFB" to pause when the device is playing. When music is playing, the LED keeps in solid blue.

Next/ Previous track

Press the "+" once is for previous track

Press the "-" once is for next track

Cancel the pairing Status

In standby status, turn off the Bluetooth function of your mobile phone. The headphone needs to be re-paired with your mobile phone after power on again.

Transferring a Call

While speaking, press the MFB button for 3 seconds till a beep sound is heard to transfer a call from your headphone to your mobile phone. (Please check if your mobile phone has this function), repeat the above procedure to transfer the call from your mobile phone to your headphone.

Connect with the Last Paired Device

The headphone will connect with the last paired mobile phone, if the pairing is successful, the LED indicator will flash blue every 3 seconds and in standby mode, if the pairing cannot be completed within 10 minutes after the pairing mode has been activated, the headphone will turn into standby mode.

Troubleshooting

If you are unable to connect your headphone and your mobile phone, please try the following:

- Ensure your headphone is turned off and is properly charged.
- Ensure the headphone is paired with your mobile phone.
- Ensure your mobile phone's Bluetooth feature is activated. Please refer to your mobile phone user guide for specific instruction.
- Ensure the headphone is within a 10 meter range of your mobile phone and there are no obstructions, such as walls or other electronic devices in between.

If the above steps do not solve your problem, please recharge the headphone and remove your mobile phone battery for a short time.

Safety Information

- Check local laws regarding the use of mobile phones and headphones while driving. If you use the headphone while driving, ensure your attention and focus remains on the road and you drive in a responsible and safe manner.
- Never allow children to play with the headphone small parts may be a choking hazard.
- Observe all signs that require an electrical device or RF radio products to be switched off in designated areas. These could include hospitals, blasting areas, and potentially explosive environments.
- Turn off your headphone prior to boarding an aircraft.
- Never mount or store your headphone over any air bag development area as serious injury may result when the air bag deploys.
- Do not open or mutilate the built-in battery.
- Dispose of batteries according to local regulations. Do not dispose as household waste.

Care and Maintenance Headphone

- Consider turning your headphone off before placing it in your pocket or bag. If the MFB is accidentally activated. Your mobile phone may place an unintended call.
- Do not expose the headphone to liquid, moisture or humidity, as it is not waterproof.
- Do not use abrasive cleaning solvents to clean the headphone.
- Do not expose the headphone to extreme temperature conditions .The best store temperature range is from - 0 to + 60, otherwise the life of the headphone will be influenced.
- Do not dispose the headphone of a fire as this may result in an explosive.
- Do not bring your headphone into contact with sharp objects as this will cause scratched and damage.
- Do not attempt to disassemble the headphone, as it does not contain serviceable components.
- If you do not use the headphone for long periods, be sure to store it in a dry place, free from extreme temperature conditions and dust.

Charging

- Incorrect reassembly can cause electronic shock when the headphone is subsequently used.
- Only charge the headphone's built-in battery in accordance with the instructions contained in the user guide.
- Avoid charging the headphone in extreme temperature conditions.

Built-in Battery

- Do not attempt to replace the headphone's battery yourself as it is built into the headphone and is non-rechargeable.
- Charge the battery in accordance with the instructions supplied with this user guide.

Compatibility

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
