

Solder Board-Component View 3	 A photograph of a red printed circuit board (PCB) labeled 'DUC398-Main_V2.0' placed on a blue surface next to a black ruler. The ruler has white markings in millimeters (0 to 100) and centimeters (0 to 10). The PCB is populated with various electronic components, including a large black integrated circuit, several smaller chips, and surface-mount components. A small black component is also visible to the right of the main board.
Solder Board-Component View 4	 A close-up photograph of a small black integrated circuit (IC) labeled 'ESPRESSIF ESP8266-WROOM-32' placed on a blue surface next to a black ruler. The ruler has white markings in millimeters (0 to 100) and centimeters (0 to 10). The IC is a small, rectangular component with gold-colored pins.

Solder Board-Component View 5	 A photograph of a small, rectangular electronic component, likely a microcontroller or sensor, mounted on a blue solder mask. The component is positioned on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component has a black body with a silver-colored square in the center and various markings, including a circular logo with a triangle and the number '9338'.
Solder Board-Component View 6	 A photograph of a small, rectangular electronic component, likely a microcontroller or sensor, mounted on a blue solder mask. The component is positioned on a black surface with a white ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component has a black body with a silver-colored square in the center and various markings, including a circular logo with a triangle and the number '9338'.
