

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup for frequencies below 30MHz. The setup is located inside an anechoic chamber with white pyramidal absorbers on the walls. A yellow test table is positioned in the center, with a small grey object on top. A blue metal frame stands in front of the table, and a silver cylindrical object is on a surface in the foreground. Yellow and black striped safety tape is on the floor.
Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for frequencies from 30MHz to 1GHz. The setup is inside an anechoic chamber with white pyramidal absorbers. A yellow test table is in the center. In the foreground, there is a complex metal structure with several vertical silver poles and horizontal bars, likely for antenna positioning. A bright light source is visible in the upper left corner.

Radiation Emission Test Setup (30MHz to 1GHz)	A photograph showing a test setup inside an anechoic chamber. A white, rectangular test object is placed on a yellow wooden stand. The chamber walls are covered with white, square-shaped absorbers. A red antenna is visible on the right side of the chamber.
Radiation Emission Test Setup (Above 18GHz)	A photograph showing a test setup inside an anechoic chamber. A white, rectangular test object is placed on a yellow wooden stand. The chamber walls are covered with white, square-shaped absorbers. A blue cable is visible on the right side of the chamber.
