Subject: Explanation of relationship between Medtronic MiniMed, Inc. and Companion Medical, Inc.

On September 10, 2020, Medtronic MiniMed, Inc. ("Medtronic") acquired the privately held corporation Companion Medical, Inc., manufacturer of the InPen™ system, the U.S. FDA cleared smart insulin pen system.

Upon acquisition, Medtronic began to promote and process orders for the InPen system. On January 2021, Medtronic centralized the distribution of the InPen system from its Kentucky distribution center in the United States. It will continue to do so for additional products once cleared for market, such as the InPen Basal smart cap (previously called InCap in some of the technical documents).

Concurrently, Companion Medical, Inc. is the legal manufacturer of both the InPen system and the InPen Basal smart cap (once cleared) in the United States. Thus, Companion Medical, Inc. will maintain responsibility to design, validate, manufacture, and package the InPen System and the InPen Basal smart ap (once cleared) from its location in San Diego, California. Furthermore, products will continue to be marketed under the Companion Medical, Inc. brand name.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Mahtab Moberg', with a long horizontal flourish extending to the right.
