

VPC2100WI Local View Operating Instructions

Local viewing monitor through Mobile phone (Android system)

1. Ensure that the camera is connected to the power supply, install the antenna.
2. Using mobile phone search WIFI hotspot, find out WIFI CAMERA, see figure 1.
3. Connect to WIFI(password is 12345678), mobile phone and camera composition WLAN. see figure 2.

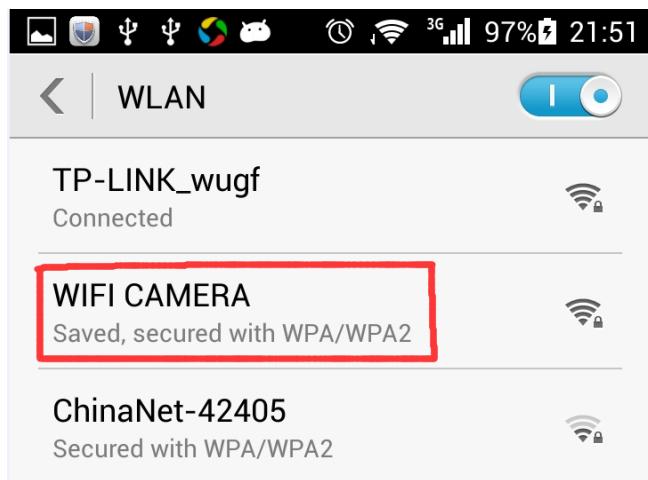

Figure 1

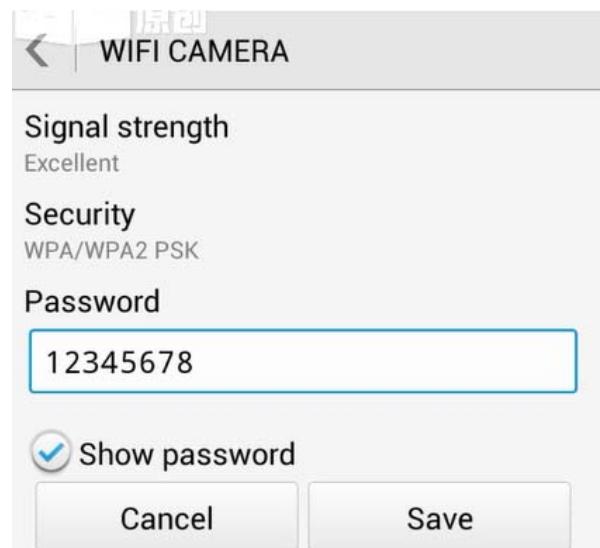

Figure 2

4. Installed APP on your phone, the name of the application is vMEyeSuper, as shown in Figure 3.
5. Open the application vMEyeSuper, interface shown in Figure 4.

Figure 3

Figure 4

6. Click on the device list, enter Figure 5.
7. Click on Search, you can find the camera, as in Figure 6.

Device Detail

DeviceName: My DVR01

Connection: IP/Domain

IP/Domain: (empty, highlighted with an orange box)

TCP Port: 34567

User Name: admin

Password: (empty)

Max Channel: 1 4 8 16 32 (radio buttons, 4 is selected)

Figure 5

Figure 6

8. Click + to add equipment, number of channels, a single camera to select 1 channel, click on the OK button, as in Figures 7 and 8.

Device Detail

DeviceName: My DVR01

Connection: IP/Domain

IP/Domain: 192.168.16.101 (highlighted with an orange box)

TCP Port: 34567

User Name: admin

Password: (empty)

Max Channel: 1 4 8 16 32 (radio buttons, 4 is selected)

Figure 7

Figure 8

9. Select the device and channel to view the real-time monitoring, video, photographs and other operations, as in Figures 9 and 10.

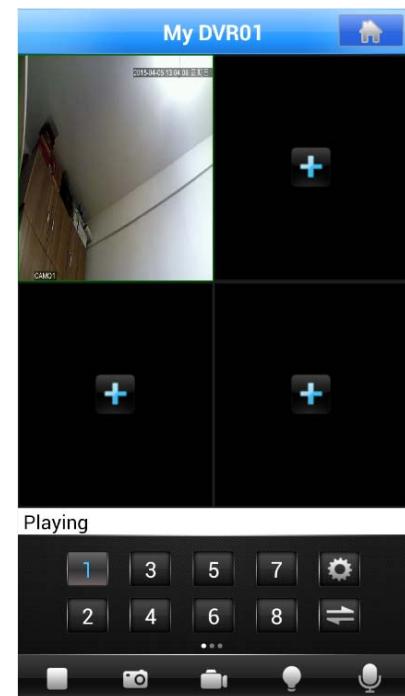

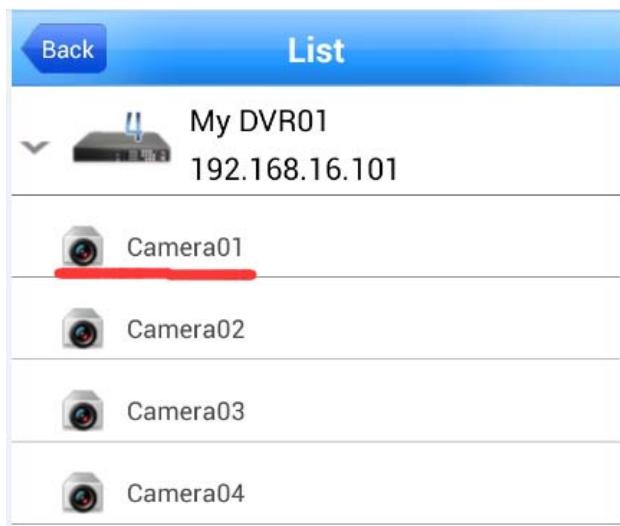

Figure 9

Figure 10

10. Double-click on the monitor screen, full screen view, as shown in Figure 11.

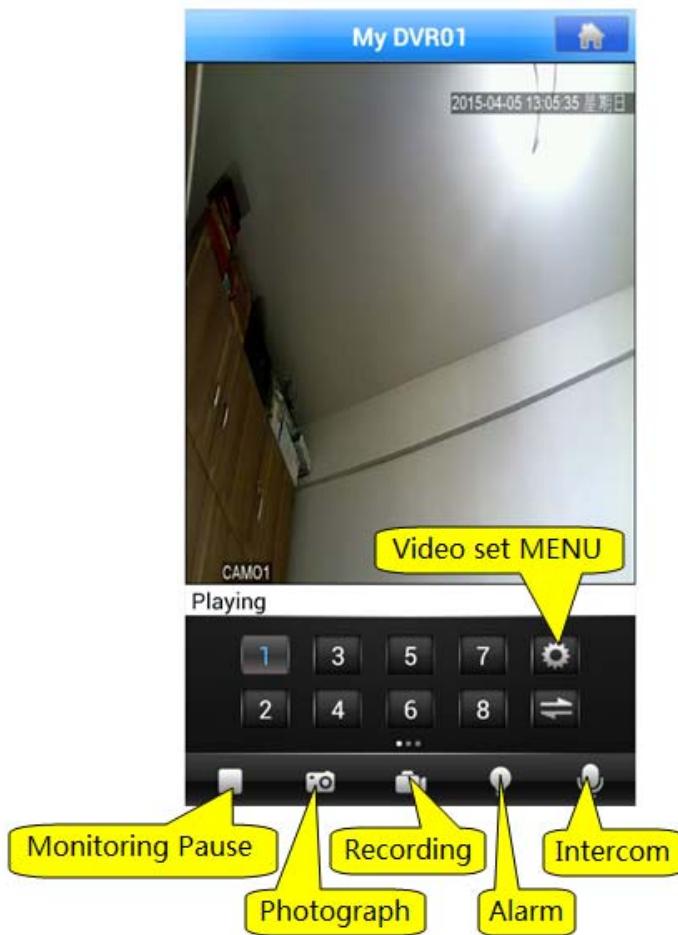

Figure 11

Local viewing monitor through Computer (XP/WIN7 system)

1. Ensure that the camera is connected to the power supply, install the antenna.
2. Connect the camera to your computer with network cable, or connect your computer to camera WIFI hotspot.
3. Make sure that CMS software is installed on your computer (Software name: General_CMS_V3.1.0.2)

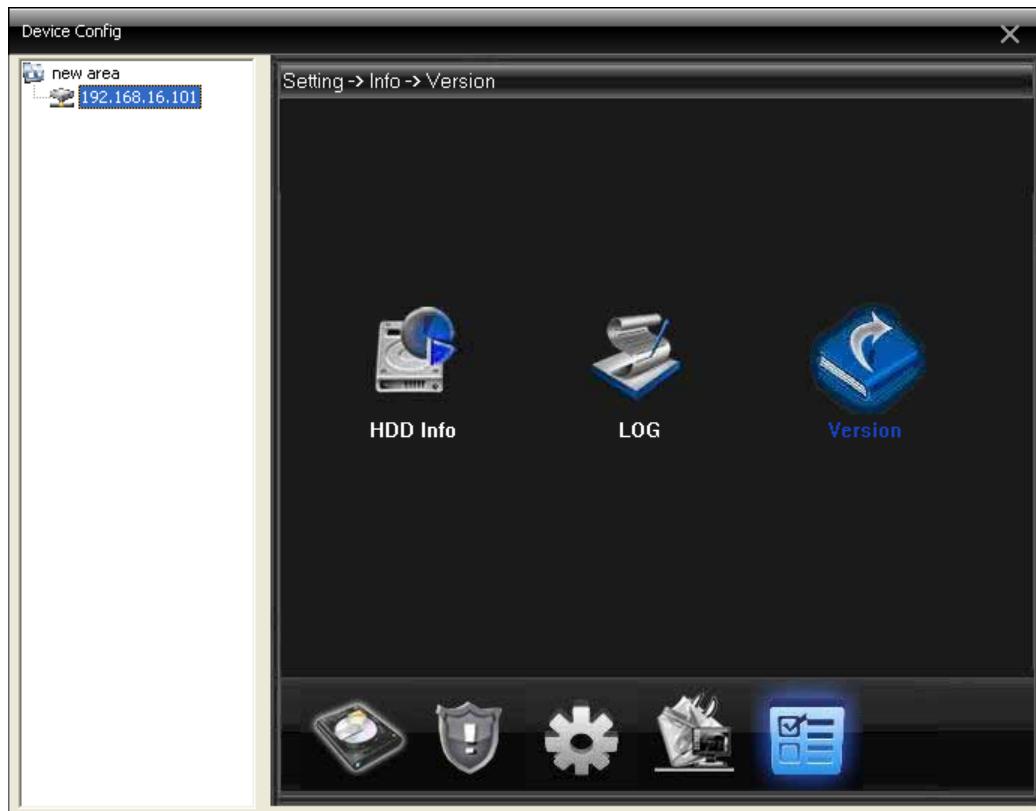

Figure 11

13. In the pop-up menu, you can see the camera's serial number, each camera has only one number, see figure 12.

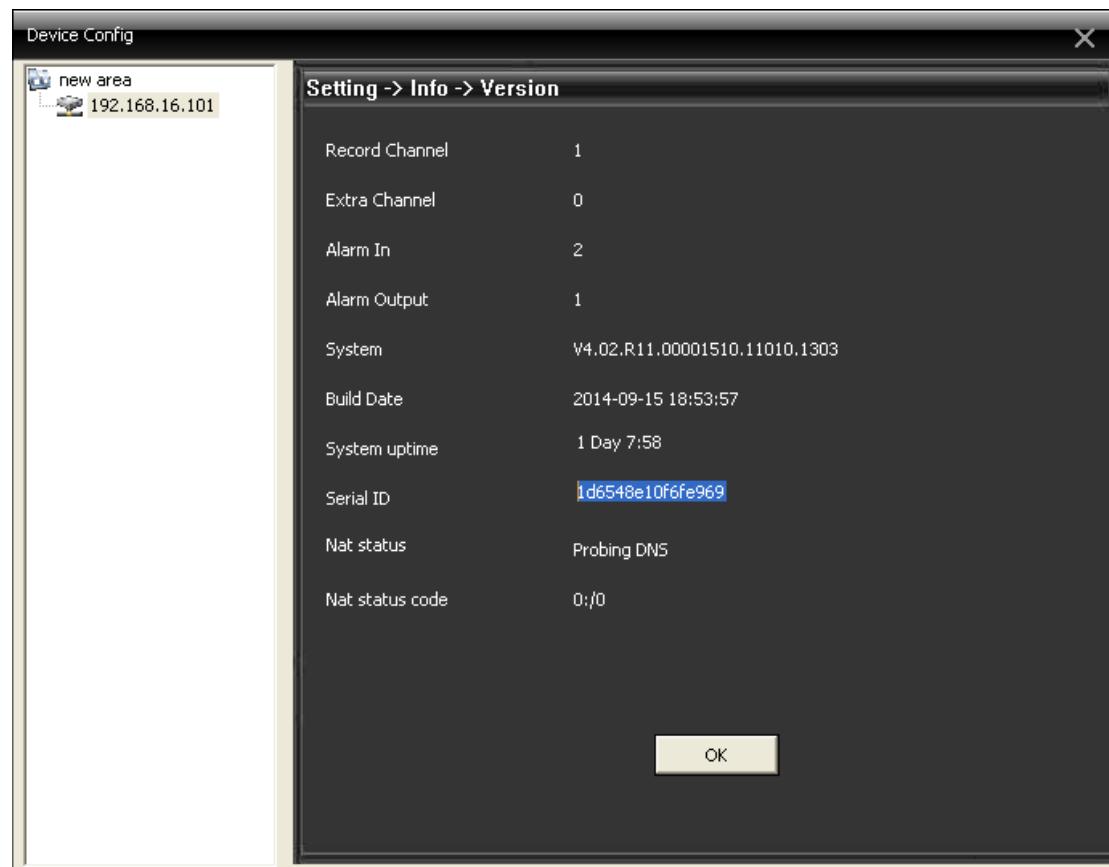

Figure 12

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
