1 Welcome

Thank you for purchasing Akuvox VP-R47P Multimedia VoIP Phone. The VP-R47P is an innovative smart desk phone loaded with tremendous value for business communications as well as unprecedented power for advanced custom business applications development and personalization. Featuring Android 4.2 system, a 7 inch capacitive touch screen TFT LCD, a 2M CMOS sensor camera, Bluetooth, integrated PoE and Wireless, VP-R47P provides excellent user experiences such as high quality video phone, smooth internet surfing, various 3rd party applications and daily information. Built with advanced security protection for privacy, this Multimedia VoIP Phone also features broad interoperability with most 3rd party SIP based devices, IPPBX and major IMS platforms. The VP-R47P represents the future multimedia terminal in modern Internet age.

This user manual is designed to help you understand how to configure and manage the VP-R47P Multimedia VoIP Phone. Besides demonstrating how to install this unit with ease, this manual will explain how to fully utilize the phone's voice calling features as well as explore all the built-in feature-rich applications.

FCC Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful

interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ✓ Reorient or relocate the receiving antenna.
- ✓ Increase the separation between the equipment and receiver.
- ✓ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

---

2 Product Overview

2.1 Instruction

VP-R47P is an Android-based multimedia terminal with a 7 inch touch screen and a 2M CMOS sensor camera. It supports H.264/H.263 codec with adaptive bandwidth adjustment. The 7 inch touch screen offers excellent user experiences such as high quality videophone, smooth internet surfing, various Android Apps and daily information.

VP-R47P provides 2 Ethernet ports, 1USB, 1HDMI, and one 3.5mm headset/audio port.

2.2 Technical Specification

Model	VP-R47P
Graphic Display	● 7 inch capacitive touch screen TFT LCD, 800x480 pixels, 16:9 wide screen aspect ratio
Camera	● 2 mega pixels CMOS camera, free rotation
Network Protocol	● SIP RFC3261,TCP/UDP/IP,PPPOE,RTP/RTCP
Operation System	● Android 4.2
Voice Codec	● G.711A/U, G.723, G.729a/b, G.722, iLBC， ● AMR-NB, AMR-WB, OPUS
Video Codec	● H.263, H.264
DTMF Modes	● Inband, RFC2833, SIP INFO
Audio Features	● VAD, CNG, Echo Canceller G.165/G.168
Video Features	● QCIF, QVGA, CIF, 4CIF, VGA ● Video bitrate: 64kbps~2Mbps ● PIP ● Full Screen ● local video ON/OFF control
Others	● Download content from the specified server ● Information receiving, storing, and rendering capabilities ● Web browser ● Contacts and Call records management ● Support playing local or online video
Network Interface	● Dual switched 10/100Mbps port, optional PoE
Wi-Fi	● IEEE802.11 b/g/n
Expansion Interface	● USB 2.0, 3.5mm headset jack, HDMI
IP assignment	● Static IP, DHCP, PPPoE
Management	● LCD Menu Configuration,TR069, WebUI
Dimension	● 218×230×93.7mm

2.3 Equipment Appearance And Interface Description

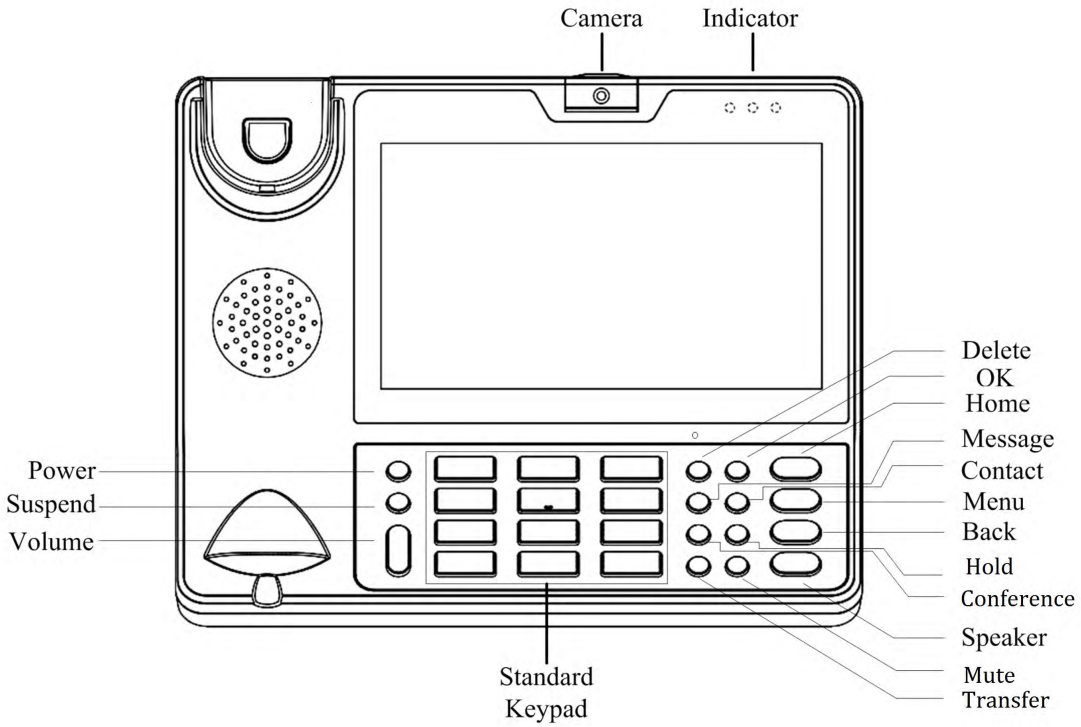

Figure 1-1 R47P Front View

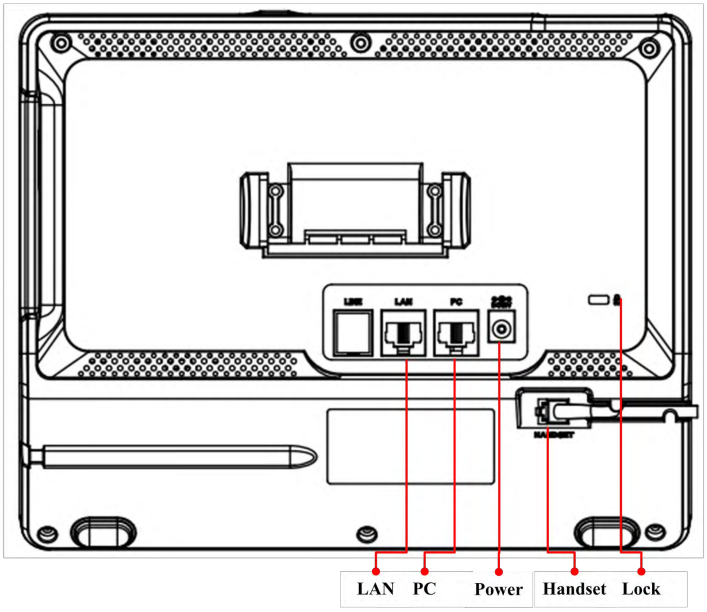

Figure 1-2 R47P Rear View

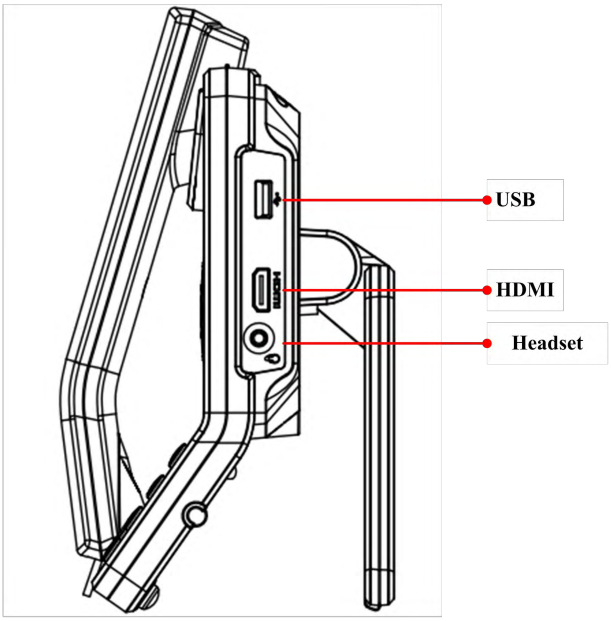

Figure 1-3 R47P Profile View

2.3.1 Interface Description

Interface	Description
Camera	Adjustable camera shooting angle, rotate down the camera to "off" angle.
USB interface	External USB storage device
Headset	Connect to 3.5mm stereo headphone, headset device
HDMI	Use HDMI cable to output the video to a TV screen
LAN	Network interface can be connected to a hub, switch or other network access devices. It also supports POE(Power over Ethernet) .
PC	Share the network access from LAN port, and for PC and other equipment connection
Power	Connect to 12V adapter, Power supply
Handset	Connect to handset
Lock	Lock the video phone with a Laptop lock

Note: If Power over Ethernet is being used, do not plug in the AC adapter.

2.3.2 Keypad Description

Interface	Description
Power	Turn on/off the LCD, Reboot, Silent mode
Suspend	Turn on/off the LCD, Reboot, Silent mode

Volume	Press + or – for the phone volume adjustment	
Standard Keypad	Input the number or symbol	
Function Key	Delete	Delete a character before the cursor
	OK	Same function with soft keyboard "Enter" key
	Message	Optional
	Contact	Enter Into the contacts list, you can view the local contact
	Conference	The first party is held in the case, according to a conference key, the first party can be combined to achieve a tripartite meeting
	Hold	To hold a call during the call
	Transfer	To transfer the current call to the third party
	Mute	The other party cannot heard the voice during the call
Home		Return to the main screen, and long press, it will display recently used applications
Menu		To call up the System or program setup menu
Back		Return to the previous menu
Speaker		Speaker

2.4 Indicators

Indicator Name	Icon	Status	Description
Power		ON	System is under working
		OFF	System is not working
Network Connection		ON	Network（LAN Port）is connected
		OFF	Network（LAN Port）is disconnected
Information		Flashing	Contains Miss Calls or Unread Message
		OFF	Normal status

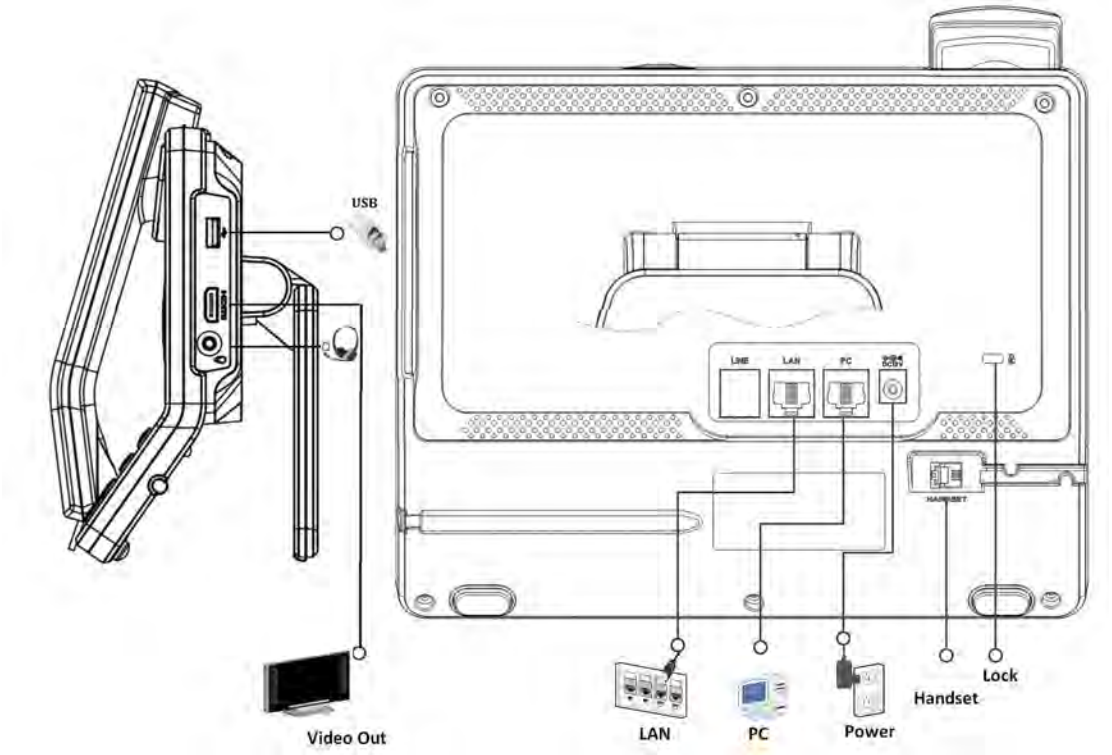
3 Installation

3.1 Equipment Packaging

Name	Quantity
Main Case	1
Handset	1
Phone Cord	1
Power Adapter	1
Ethernet Cable	1
Quick Start Guide	1

3.2 Connecting Video Phone

- **Connection diagram**



- **Connecting to Network**

Use the matched network cable to connect the LAN Port of the video phone to the Router or Switch. Viewing the top right corner of the screen, if the indicator light is on, network cable is connected properly.

- **Connecting to PC**

Use the matched network cable to connect the PC Port of the video phone to the PC's Ethernet port. The PC can access to the internet network via PC Port of the video phone.

3.3 Installation Considerations

This product is a desktop product, and here are some safety recommendations about the installation and the usage:

- Do not use this product near water, such as: bath, washbasin, kitchen sink and other damp places and so on;
- Place the device in a place away from heat;
- Place the device away from traffic areas to prevent collisions;
- Please use the equipment with the matching power adapter or POE;

4 Getting Started

4.1 Basic Operation

4.1.1 Main Screen Instruction

- Status bar, at the top of the screen, displaying the status of system information.
- Do Not Disturb plug-in, When enabled DND, prohibit incoming calls in; Incoming call will be normal when DND is closed
- Favorite contacts plug-in, add more commonly used contacts from the address book, click the plug-in to add a contact, you can choose audio or video call out directly.
- Extended Screen Prompt, Display the location of current screen page; and show how many pages extended.
- Shortcuts, at the bottom of the screen, user can drag a shortcut to this region to achieve the replacement of the shortcut. Supports max four shortcuts.

4.1.2 Status And Notifications Instruction

The status bar in main screen is divided into two zones, notification area and status area, as shown below:

Status Area

Icon	Description
	Network is connected
	Network is not connected
	Mute mode
	Alarm clock is set
	PPPOE is connected
	PPPOE is failed

Notification Area

Icon	Description
	SIP account is registered
	Missed call, number means how many missed calls
	downloading
	uploading
	Receives a new email
	An event is coming

4.1.3 Using The Touchscreen

- **Tap**
  To select items on the screen (e.g., setting options, apps); to press onscreen buttons; to type letters and symbols using the onscreen keyboard.
- **Touch and Hold**
  Touch the item on the screen and hold it without lifting your finger from the screen till an action occurs.
  For example, touch and hold on a picture to bring up operation options.

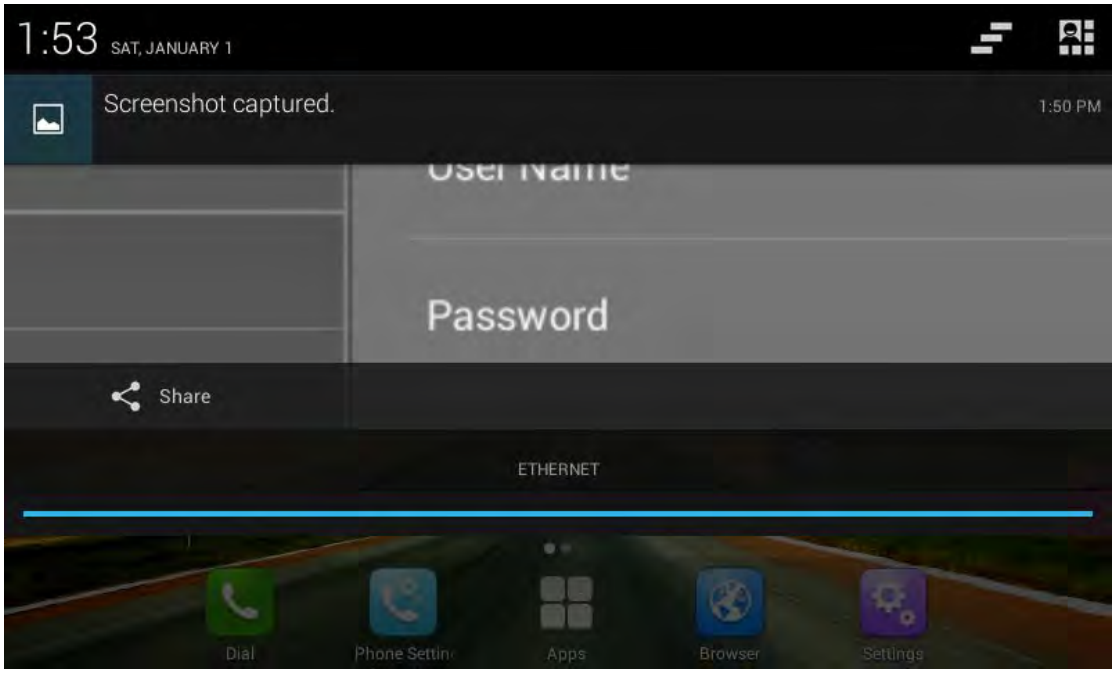
- **Drag**
  Touch and hold an item for a few seconds first. Once the item has a red frame activated, or a move option shows up, keep your finger on the screen and move it until the target position is reached. Then lift your finger up to release.
- **Slide**
  Move your finger fast across the screen to slide. To view different idle screens or menu pages, slide left or right; to view the status bar on top of the screen, place your finger on the bar and slide it down. If your finger stays on the screen for too long, the item may be selected and sliding won't occur.
- **Double-click**
  Click on the screen twice in quick succession, for example, when user surfs in browser, you can quickly click twice on the page, the page can be enlarged.
- **Pinch**
  Place two fingers on the screen, then pinch them together (zoom out) or spread them apart (zoom in). This could be used in a picture.

4.1.4 Startup And Shutdown

- **Startup**
  Connect to the power supply, the system automatically starts up.
- **Shutdown**
  If you do not use the device, directly remove the power supply, to save electricity.
- **Reboot**
  If you need to restart the device, according to the following steps:
  1) Press and hold the "Power" button until the pop-up "Options" menu.
  2) Click the "Reboot"

4.1.5 View / Turn Off Notifications

When viewing notifications, simply press and hold the status bar, drag down, as shown below:



To turn off notifications, simply hold the notice at the bottom of the screen and then drag up or press the "Back" on the hard keyboard. Click on the icon to clear up the notice

4.2 Connecting To Network And Wi-Fi

VP-R47P supports a variety of network connections (Ethernet, Wireless) and device connections Network connections includes four modes, Static IP, DHCP, PPPOE, Wi-Fi access. DHCP is the default configuration. Device connections include EHS headset, USB and Bluetooth device.

4.2.1 Configuring Static IP

You can select one of the following methods to enter the static IP configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks-> Ethernet- > Using static IP.
- Mode 2: In the main screen, tap -> Settings-> Wireless & Networks-> Ethernet -> Using static IP.
- Mode 3: Drag down the status bar, click shortcut icon on the status bar

->SETTINGS-> ->Wireless & Networks-> Ethernet->Use static IP.

- Mode 4: In the main screen, tap ->Network Settings->LAN Connecting->Static IP.

Configuration page is shown as below：

Configuration parameter specification：

Parameter	Specification
IP address	set the IP address of the device
Subnet Mask	set the subnet mask of the device
Default Gateway	set the default gateway
DNS Server	set the DNS address
Alternative DNS Server	set the backup DNS address

4.2.2 Configuring DHCP

You can select one of the following methods to enter the DHCP configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks-> Ethernet- >uncheck Using static IP.
- Mode 2: In the main screen, tap -> Settings-> Wireless & Networks-> Ethernet -> uncheck Using static IP.

- Mode 3: Drag down the status bar, click shortcut icon on the status bar ->SETTINGS> ->Wireless & Networks-> Ethernet-> uncheck Use static IP.
- Mode 4: In the main screen, tap ->Network Settings->LAN Connecting->DHCP.

Configuration page is shown as below：

Note:

1) If DHCP acquired IP, it will display dynamic IP address information on the location of static IP configuration, cannot be modified, and there is a item of Use static DNS at the bottom the alternative DNS server, when checked, you can modify the primary DNS address and Secondary DNS address.

2) If DHCP is failed, the IP address will show as: 0.0.0.0.

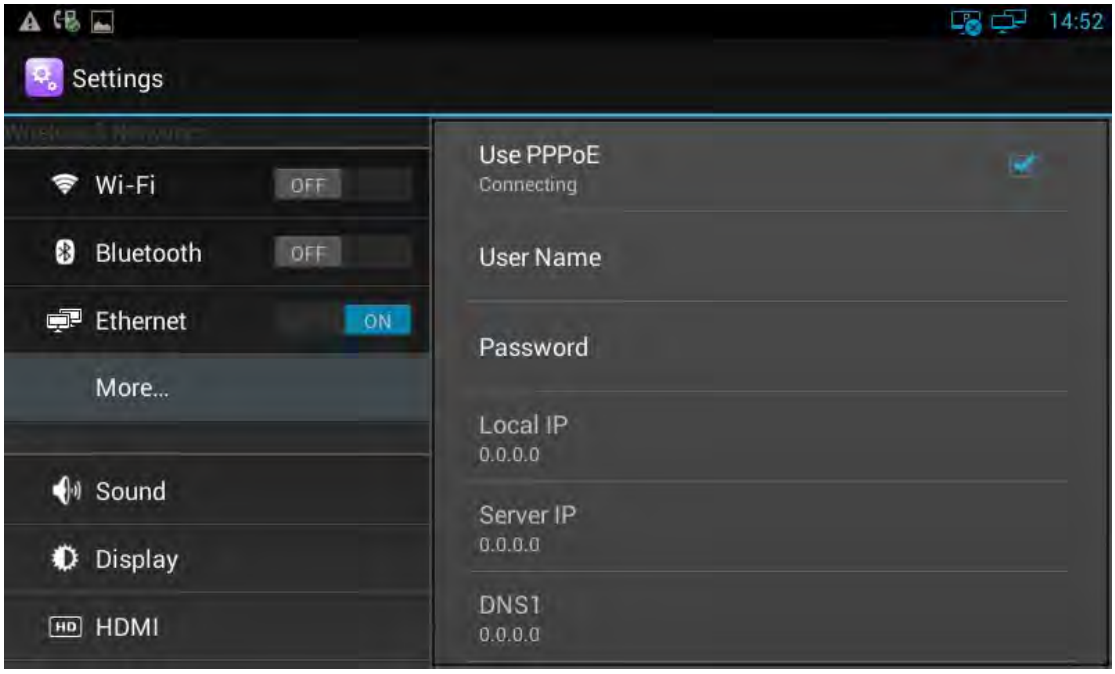
4.2.3 Configuring PPPOE

You can select one of the following methods to enter the PPPOE configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks -> Ethernet ->More ->PPPOE.

- Mode 2: In the main screen, tap -> Settings-> Wireless & Networks-> Ethernet -> More ->PPPOE.
- Mode 3: Drag down the status bar, click shortcut icon on the status bar ->SETTINGS ->Wireless & Networks-> Ethernet-> More ->PPPOE.
- Mode 4: In the main screen, tap ->Network Settings->LAN Connecting->PPPOE

Configuration page is shown as below：



Parameter specification：

Parameter	Specification
Use PPPOE	Check is to enable PPPOE， otherwise, disable.
User Name	PPPOE account, provided by ISP
Password	PPPOE password, provided by ISP

Proceed as follows:

1) Check Use PPPOE

2) Enter the correct user name and password of PPPOE

Note:

1) After dialing, can display the acquired IP address, server IP, the primary DNS, Secondary DNS information, status as connected

2) Not Dial, IP address information will be 0.0.0.0

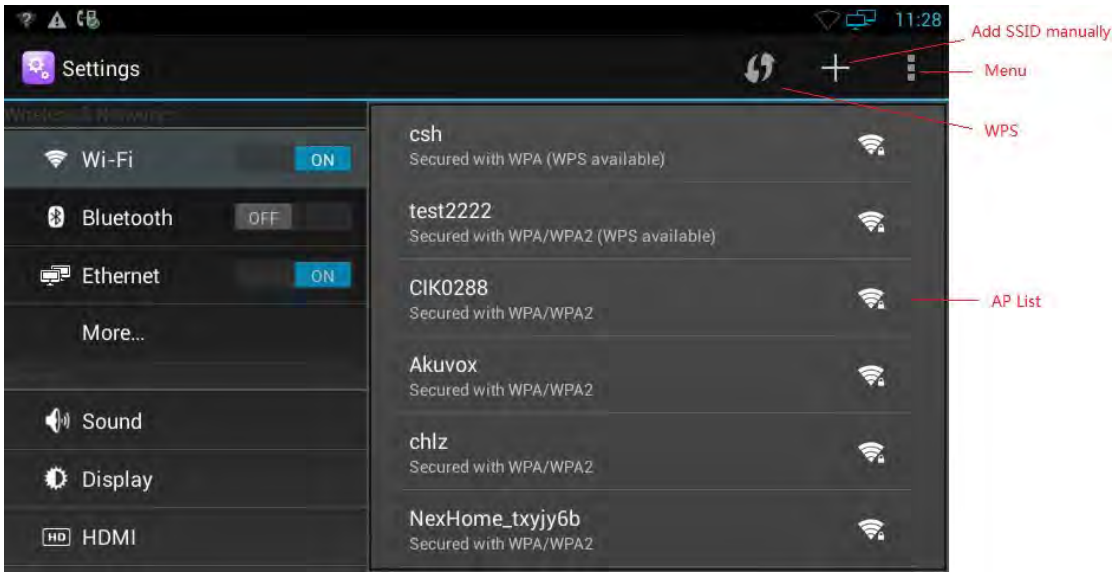
3) There is a redial entry under Alternate DNS, click redial, then re-launch a PPPOE dial-up process, re-dial.

4.2.4 Configuring Wi-Fi

You can select one of the following methods to enter the Wi-Fi configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Wireless & Networks-> Ethernet- >Wi-Fi.
- Mode 2: In the main screen, tap -> Settings-> Wireless & Networks-> Ethernet -> Wi-Fi.
- Mode 3: Drag down the status bar, click shortcut icon on the status bar ->

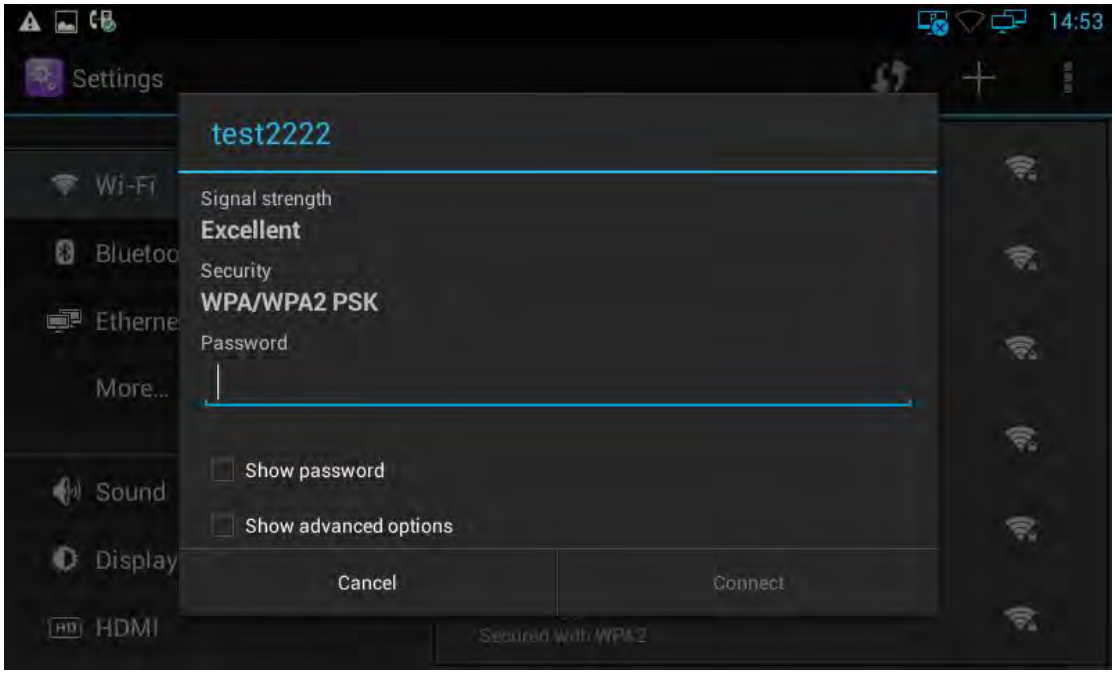
Configuration page is shown as below：



1) When the Wi-Fi switch is turned on, the video phone can list and display all Wi-Fi AP searched in the environment;

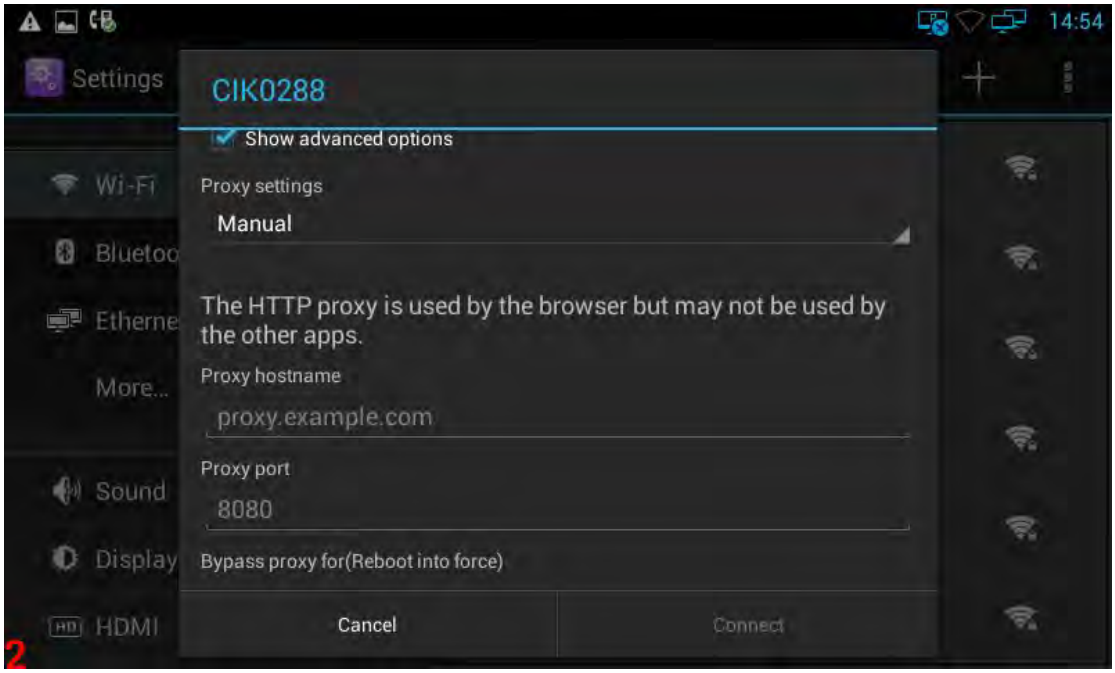
2) When connects to available AP in the environment, if a Wi-Fi AP is without password protection, there is no lock icon on Wi-Fi signal, it will automatically connect when clicked;

3) If a Wi-Fi AP is encryption, Wi-Fi signal will be added the lock icon, and when checked, it will pop up a dialog box to enter a password. If the password is incorrect, the connection will not be successful, as shown below:

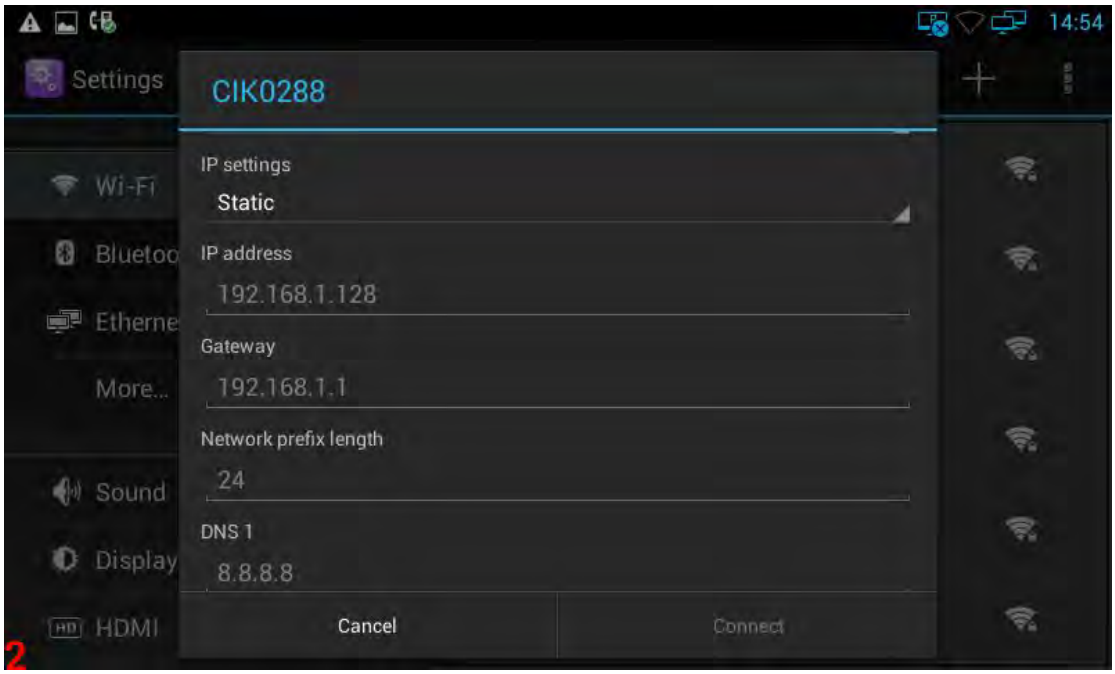


4）check Show advanced options, you can set Proxy server and IP mode.

- Proxy Settings



- IP settings(Static IP):



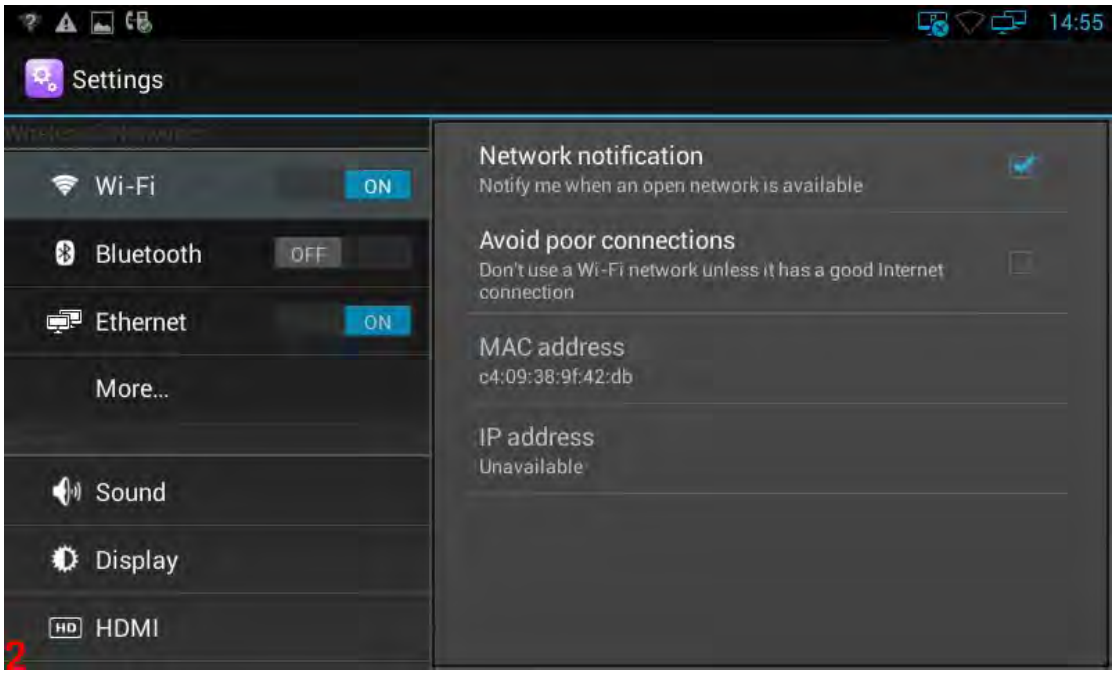
5） Long press on the connected Wi-Fi AP, it will pop-up a dialog box, you can forget the network or modify the network. Long press on the non-connected Wi-Fi AP, it will pop up a dialog box, and you can click and connect to network.

6） Click WPS button, if the wireless router has WPS function, and the router WPS button is pressed, the video phone will be able to connect to the Wi-Fi without entering a password.

7） Press “+ ”symbol， you can add a SSID manually.

8）Click Menu, you can do the operations such as: Scan(scan the new wi-fi AP), WPS Pin Entry(enter the PIN on the Router, the phone will no need to input the wi-fi password), Wi-Fi Direct and Advanced.

9）In Advanced Menu, shown as below:



a. Check Network notification, it will notify you when an open network is available;

b. Check Avoid poor connections, it will prompt that don't use a WiFi network unless it has a good internet connection;

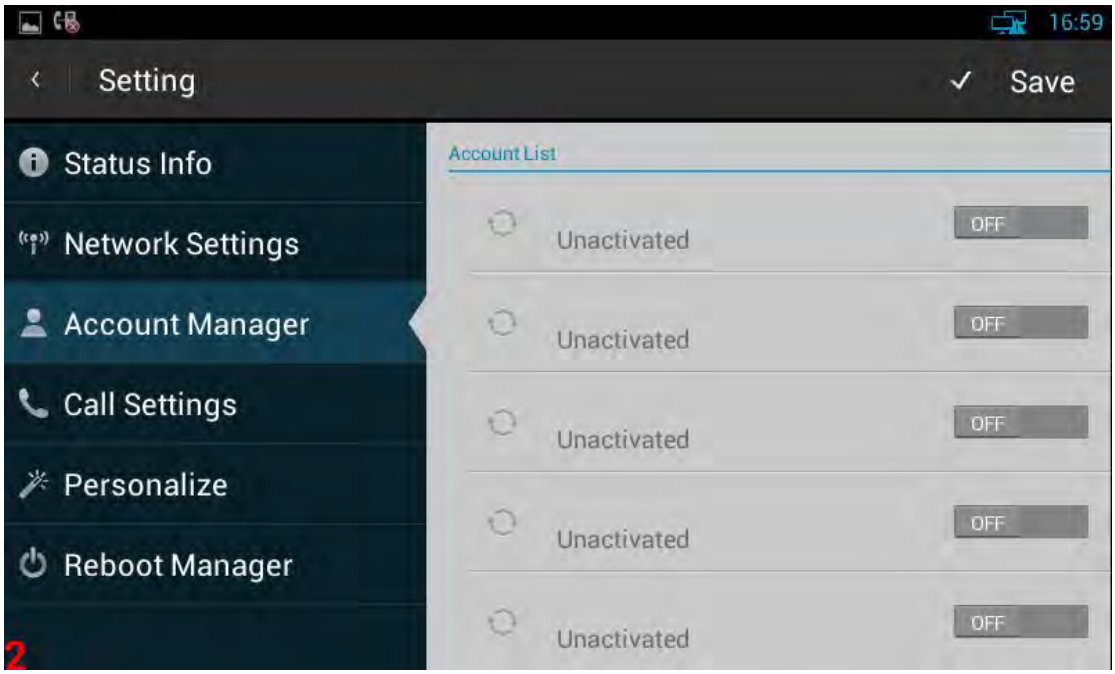
c. View the Wi-Fi Mac address and IP address;

4.3 SIP Account Configuration

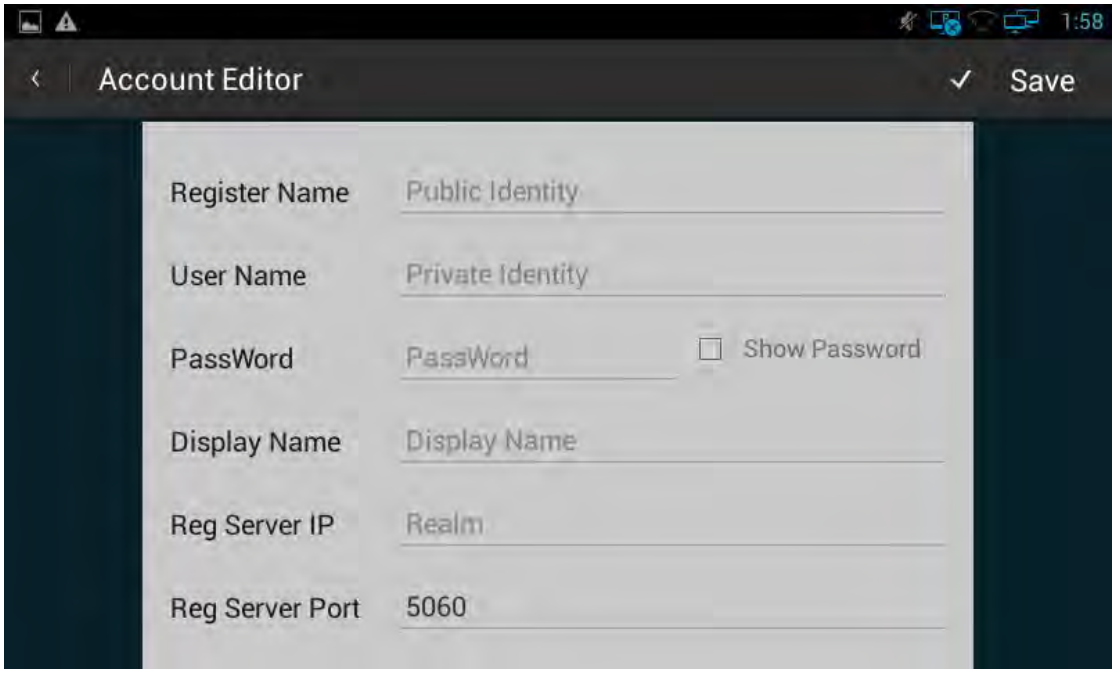
You can select one of the following methods to enter the SIP account configuration:

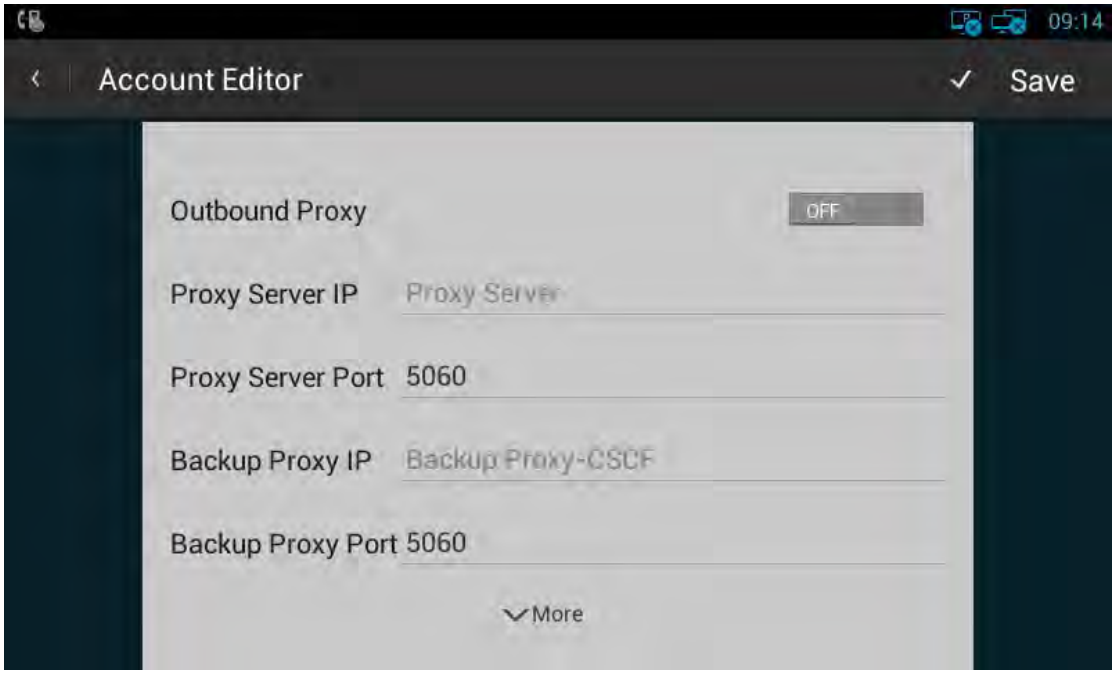
- Mode 1: In the main screen, Click -> then click .
- Mode 2: In the main screen, click ->then Click ->and then click .
- Mode 3: Directly pick up the handset or press Speaker -> then click .
- Mode 4: click Browser, input IP address to enter login interface. Input username: admin, password is admin, click Login into web, then click Account-Basic;

4.3.1 Add Account



Click an account to enter Account Editor





Configuration parameters are described as follows:

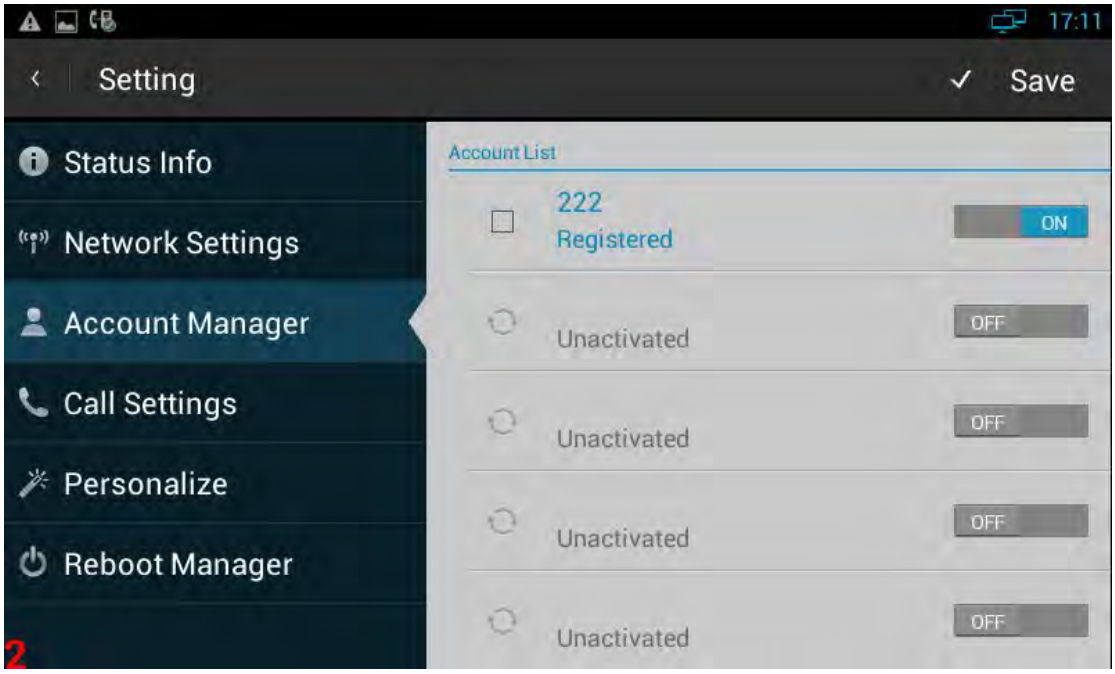
Parameter	Specification
Register Name	SIP Accout ID provided by ISP
User Name	SIP User Name provided by ISP
Password	SIP Password provided by ISP
Display Name	SIP Display name
Reg Server IP	SIP Register Server, format: domain/IP, for example: 194.168.1.2
Reg Server Port	The default port is 5060.
Proxy Server IP	SIP Proxy Server, format: domain/IP, for example: 194.168.1.2
Proxy Server Port	The default port is 5060.
Backup Proxy IP	SIP Backup Proxy Server, format: domain/IP,for example: 194.168.1.2
Backup Proxy Port	The default port is 5060.

After all the parameters are configured, Click "save" button to save the configurations, then the sip account is added successfully. Then active the account.

4.3.2 SIP Account ON/OFF

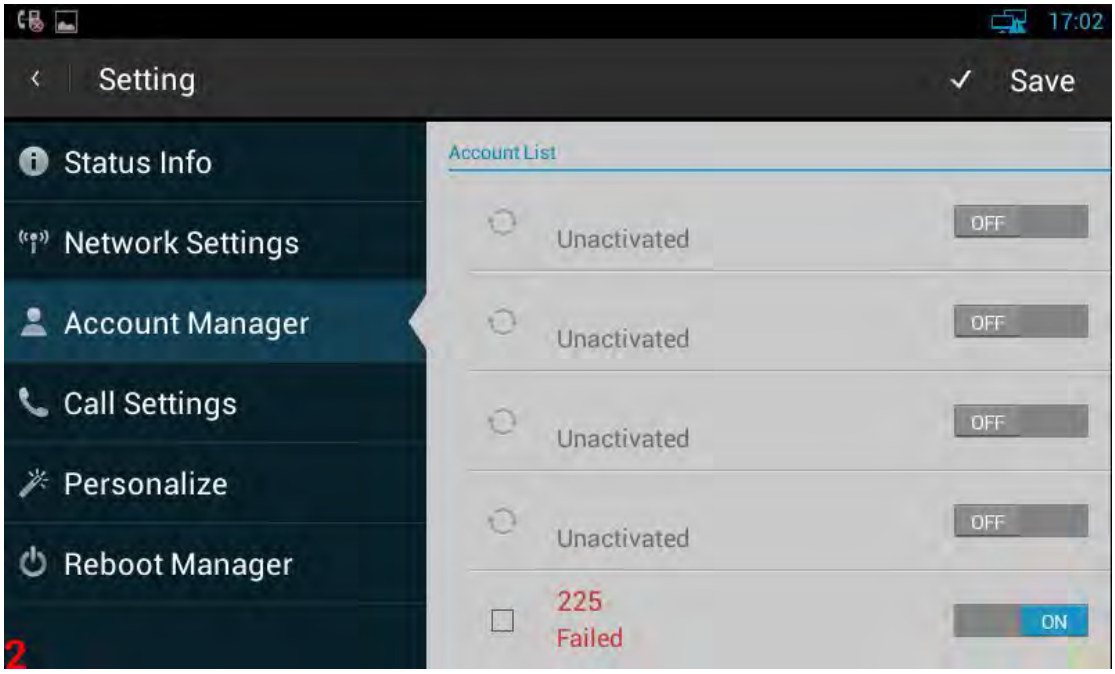
After SIP account is configured and registered successfully, it will display the prompt ”Registered” in the Account Manager, and the icon will be displayed on

the status bar. See the below picture：



a. If you want to disable the account, please click

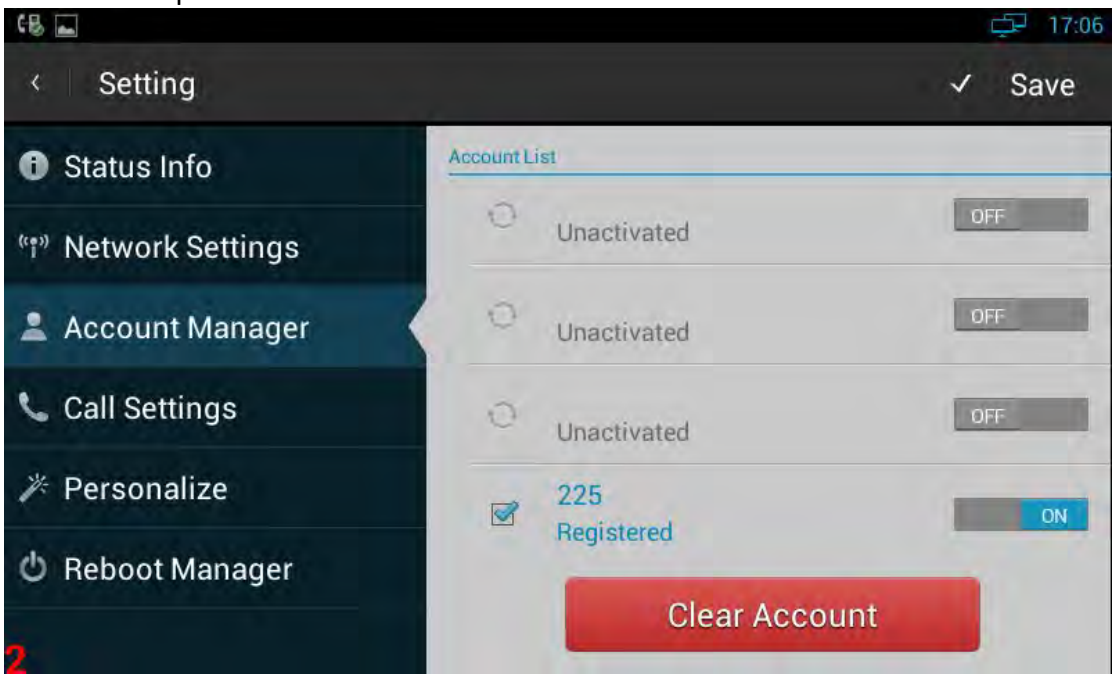
b. If the sip account is failed to register, the failure code will be displayed under the account, and then you can check with the account configuration or network connection. See the below picture:



4.3.3 Modify/Remove SIP Account

1）Modify the sip account: Directly click the account to modify;

2）Remove the sip account: Click the box of the account which you want to delete, and then press “Clear Account”.

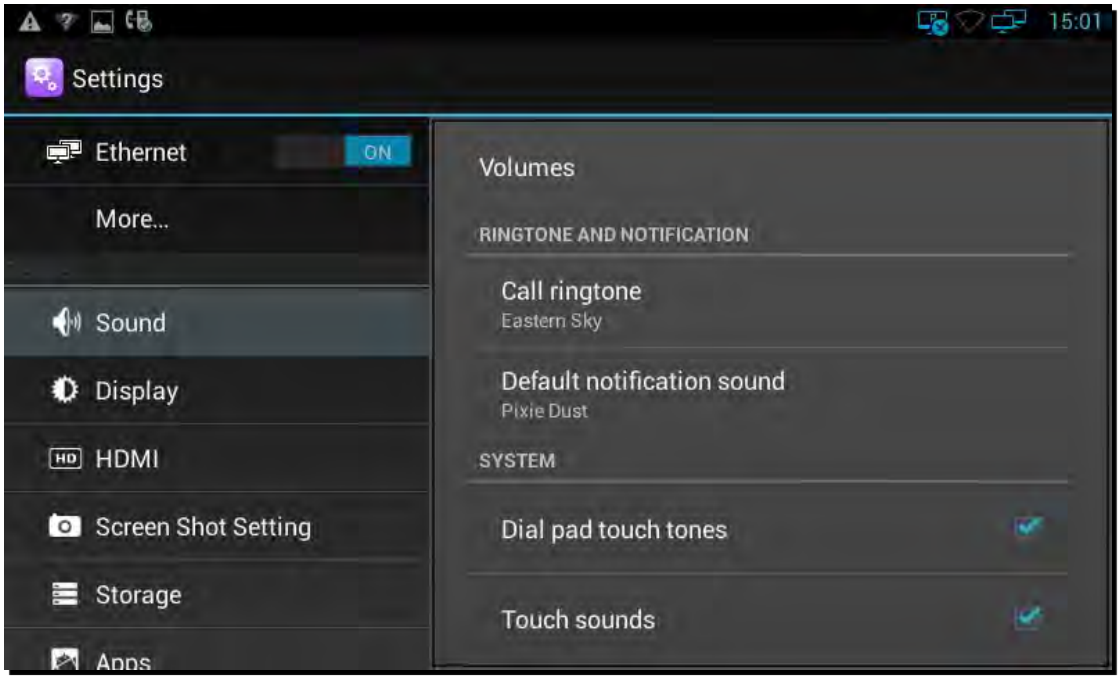


4.4 Sound

You can select one of the following methods to enter the Sound configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Sound.
- Mode 2: In the main screen, click -> Settings -> Sound.
- Mode 3: Drag down the status bar, click shortcut icon on the status bar ->SETTINGS ->Sound.

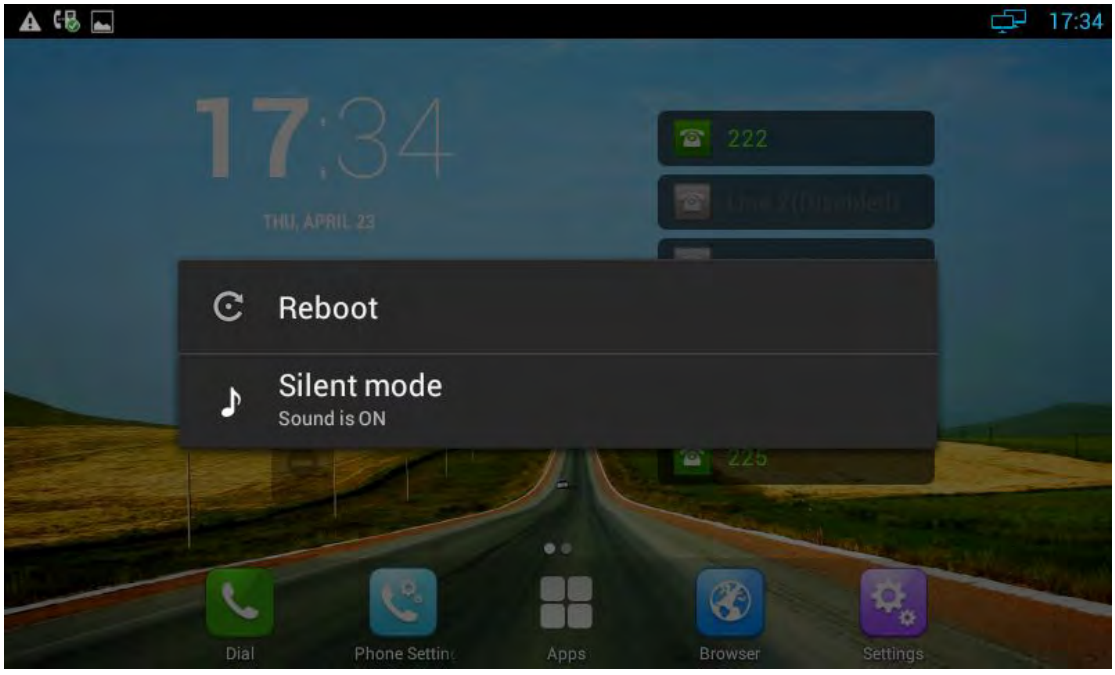
Configuration page is shown as below：



Including Volume, Ringtone and Notification, Dial pad touch tones and Touch sound.

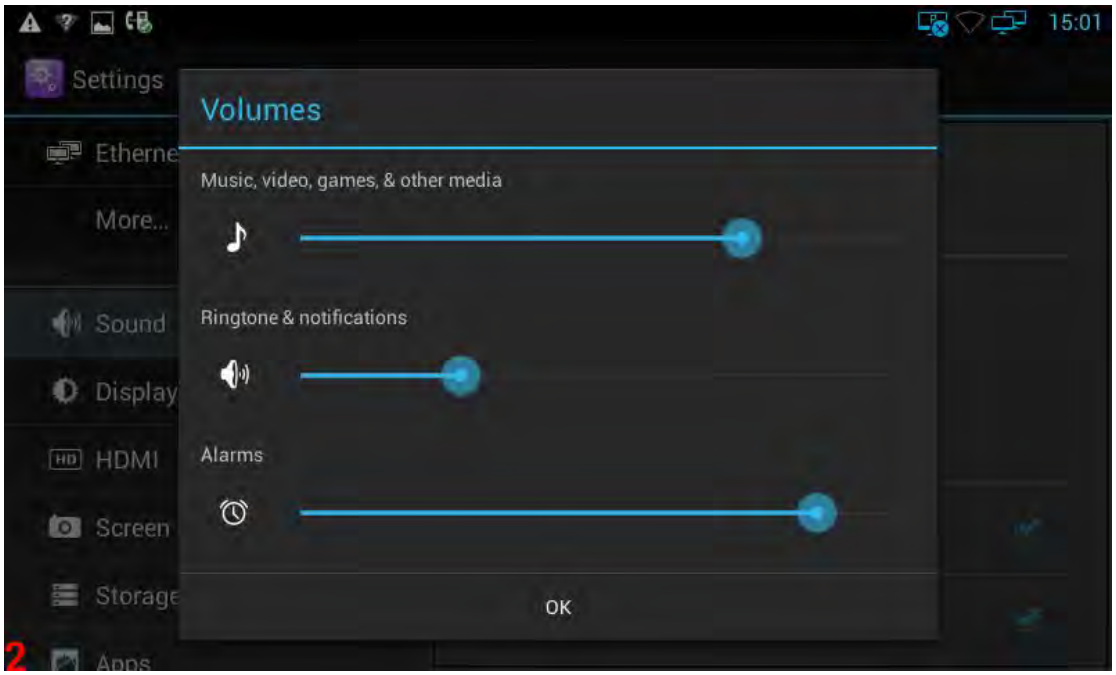
4.4.1 Silent Mode

Long press the Power button, then choose Silent mode in the pop-up menu. In addition to the media and the alarm sound, the rest sound is mute. As shown in the picture below:



4.4.2 Volumes

In Sound configuration page, click “Volumes”, the volume configure is shown as below：



- Volume options include ringtones and notifications, Media, Alarm clock.
- You can hold and drag the slide button or just directly click a volume location to adjust the volume. Finally click "OK" button to save.
- The volume settings, you can also press the keyboard "volume+ -" button to increase or decrease the volume. Usually, "volume + -" button is to adjust for ringtone or notification volume, but in the broadcast media, pressing "volume + -" button is to adjust for media volume.

4.4.3 Ringtone

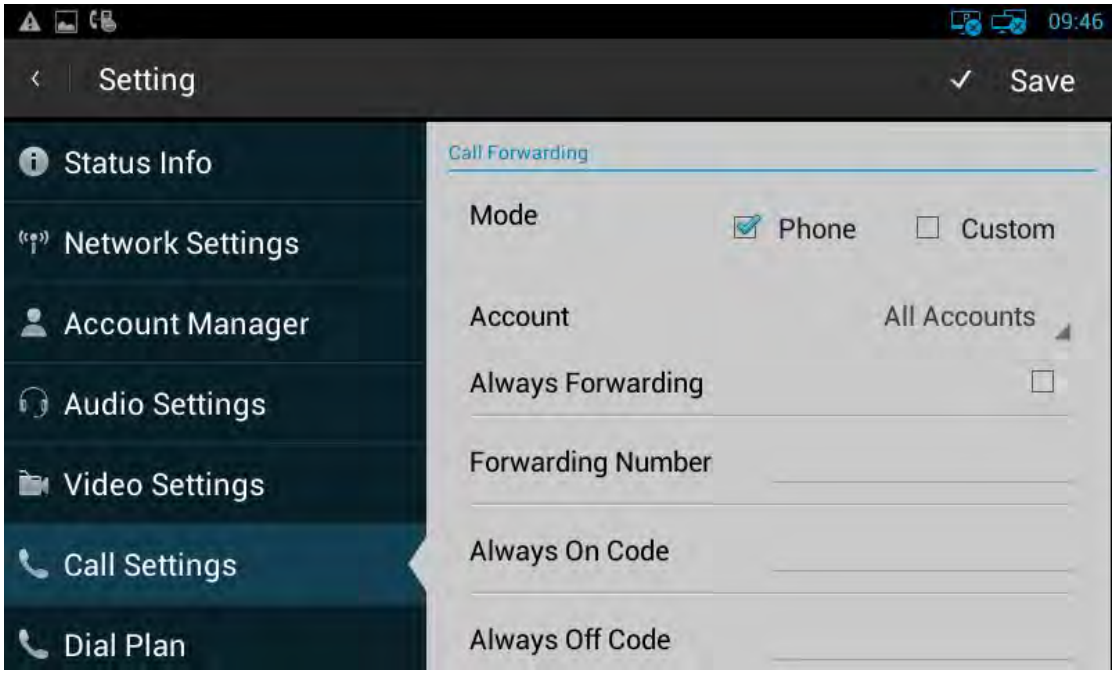
The ringtone settings, including the default ringtone and default notification tone.
In the sound interface, select the default ringtone or default notification tone, and then click the ringtone you want to set, after the selection, it will be a short play ring. Finally, click "OK".

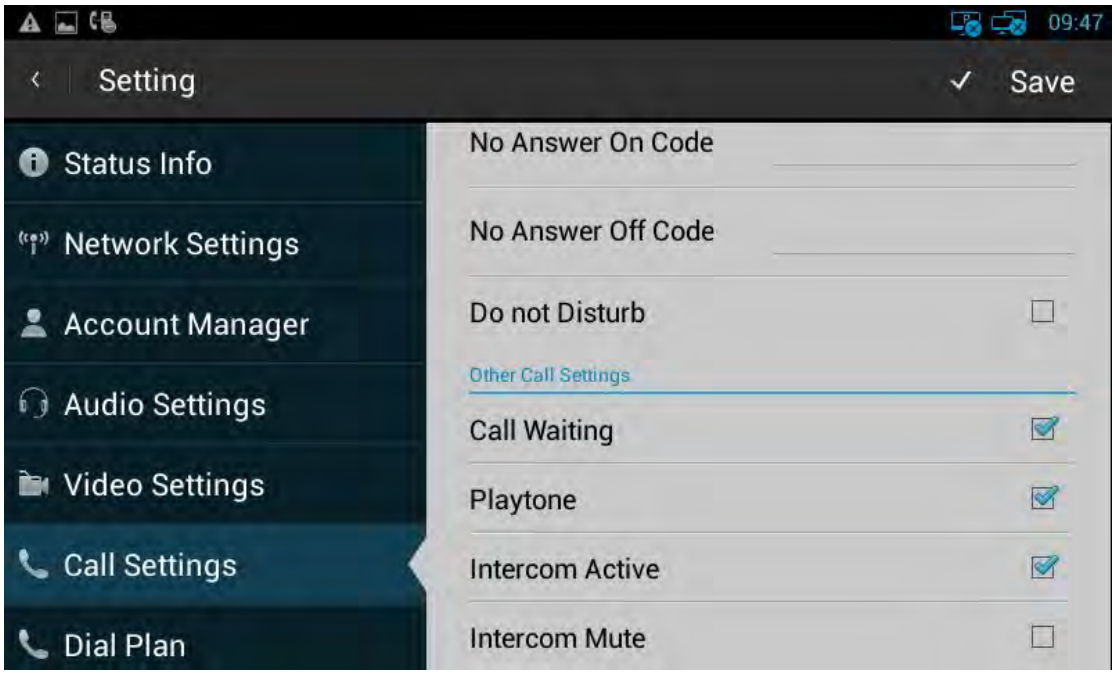
4.4.4 System Sound

If you want to enable Dial pad touch tones and Touch sounds, please go to Sound

configuration page to click the correspond sound. Dial pad touch tones and Touch sounds are enabled in default configuration.

4.5 Call Settings





4.5.1 Do Not Disturb

DND function is to prevent foreign phone from disturbing, if open DND, external

phone call is unable to call in, turned off by default.
Configuration on the phone:
1.Phone Settings->Call Settings->Call Forwarding
2.Select the desired account.
3.Enable Do not Disturb.

4.5.2 Call Waiting

Open call waiting, if enable call waiting, after establishment of a conversation, there are a third party call in, then video phone will have a new call tips, you can choose to answer or reject the call. If you close the call waiting, then the third party cannot call in, will prompt a busy tone, turned on by default.
Configuration on the phone:
1.Phone Settings->Call Settings->Other Call Settings
2.Enable Call Waiting.

4.5.3 Always forwarding&Forwarding Number

All the incoming calls will be the Switched unconditionally to specified number.

Configuration on the phone:
1. Phone Settings->Call Settings->Call Forwarding
2. Select the desired account.
3. Enable Always Number.
4. Input the number you want to forward.

4.5.4 Call forwarding busy&Forwarding Number

The incoming calls will be the Switched to specified number when the phone is busy.

Configuration on the phone:
1. Phone Settings->Call Settings->Call Forwarding.
2. Select the desired account.
3. Enable Call Forwarding Busy.
4. Input the number you want to forward.

4.5.5 No Answer Forwarding&Forwarding Number

The incoming calls will be the Switched to the specified number when the ring tone is time out without answer.
Configuration on the phone:

1. Phone Settings->Call Settings->Call Forwarding.
2. Select the desired account.
3. Enable No Answer Forwarding.
4. Input the number you want to forward.

4.5.6 Time out

Setup the no answer forwarding time. When the call is beyond the time(the default is 30 seconds)without answer ,it will transfer to the target number.

4.5.7 Playtone

The caller will hear the tone when waiting.

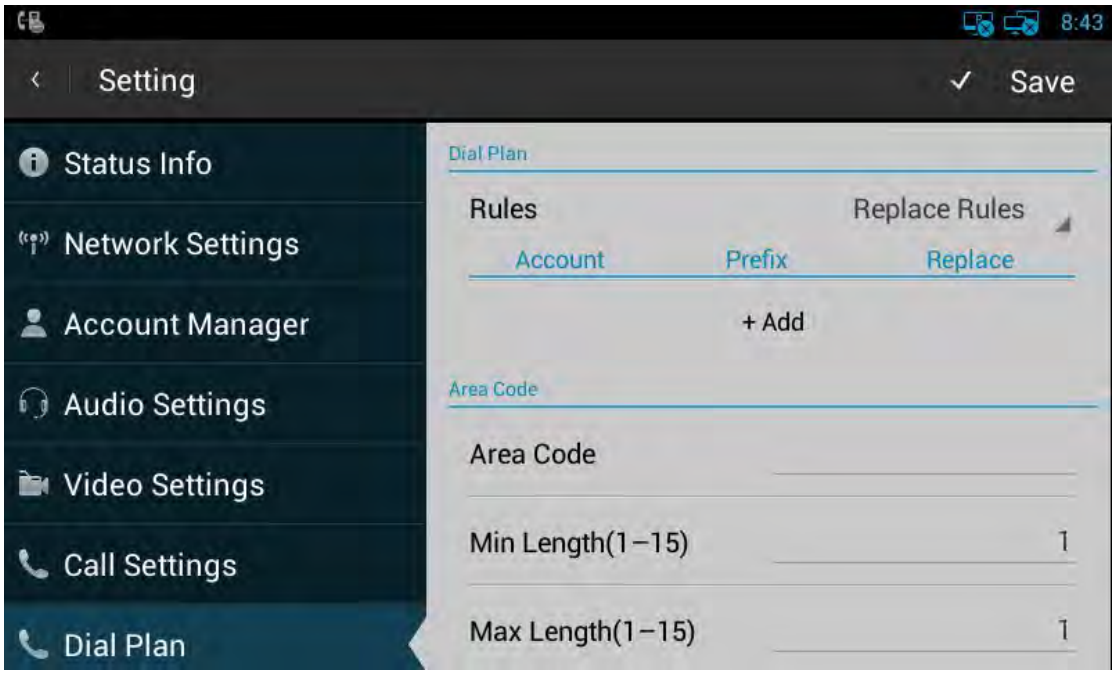
4.5.8 Intercom

It is used to answer the incoming call automatically after users set up the intercom function. In default situation, the IP phone Akuvox R47P will answer the intercom incoming calling automatically and make a noise. You can set the phone to enable silent mode when picking up the intercom call so that the other will not hear you.

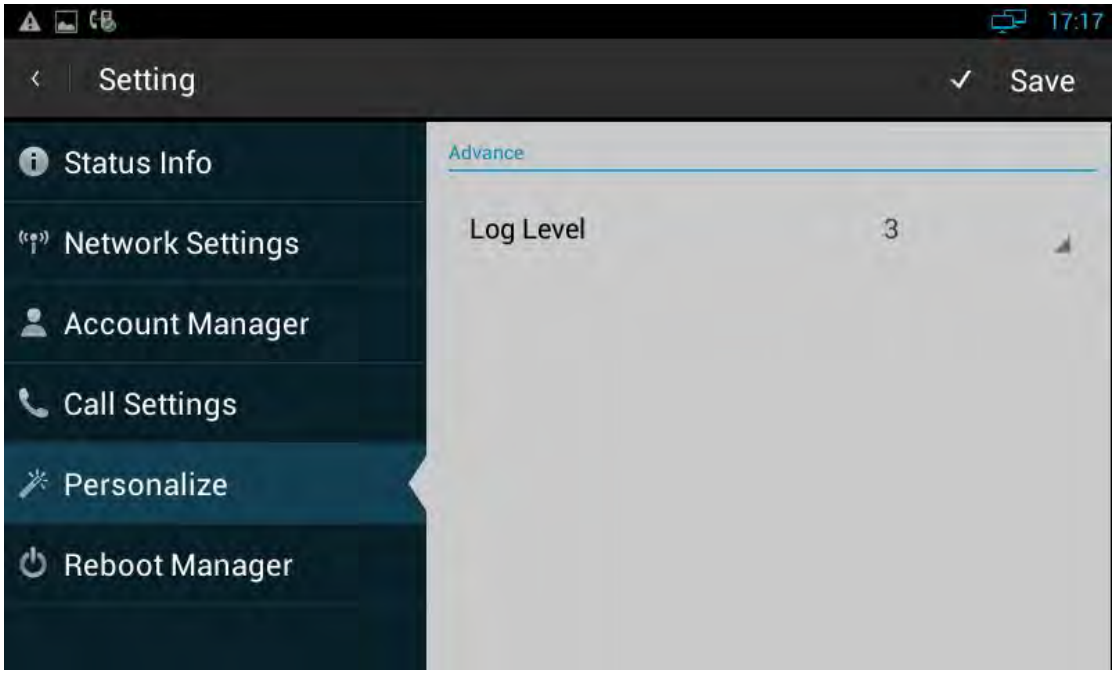
4.6 Dial Plan

Rule: Allow user to select Replace rule or Dial-now to display or edit.
Rules Modify: Allow user to modify selected rules information, for replace rule, you can modify related accounts, prefix and replace.
Area Code: Area codes are also known as NPAs (Numbering Plan Areas). They usually indicate different geographical areas within one country. If entered numbers match the predefined area code rule, the IP phone will automatically prefix outgoing number with area code.

Note: There is only one area code rule supported.



4.7 Personalize



4.7.1 Log Level

The Log level is divided into seven levels: EMERG, ALERT, CRIT, ERR, WARNING, NOTICE, INFO, DEBUG, log class is from low to high. The default setting is EMERG, which is the lowest grade log.

4.8 Reboot Manager

4.8.1 Reboot time

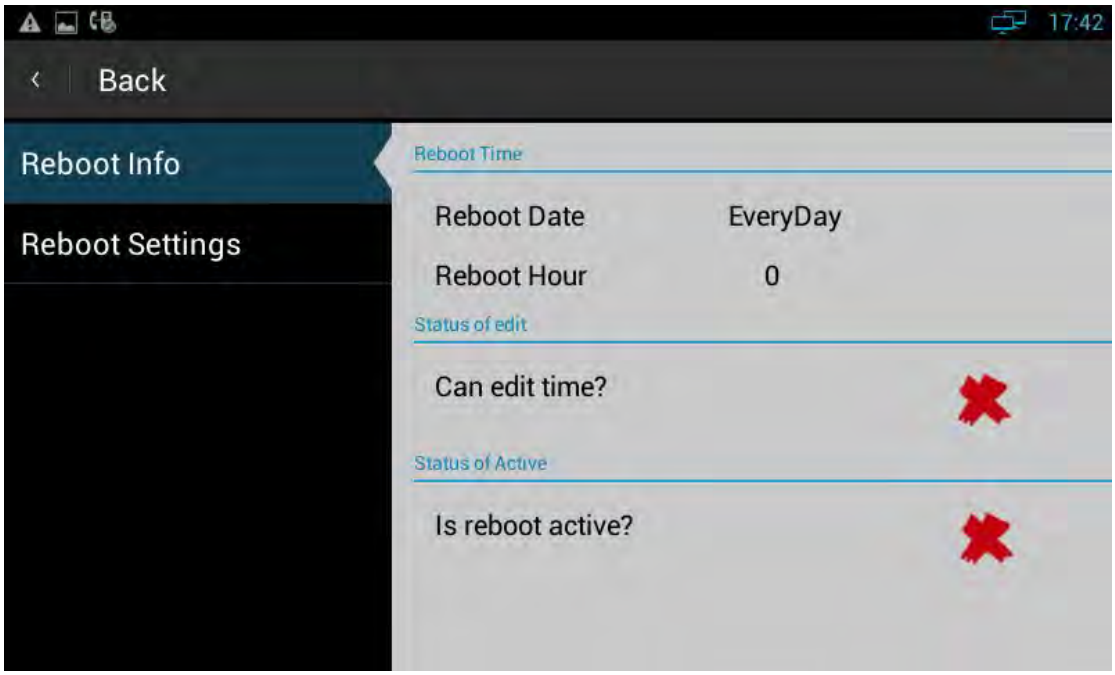
User can setup the reboot date and hour you want .

4.8.2 Status of time

If the status is enable ,users can edit the reboot time you want.

4.8.3 Status of active

Enable/disable the reboot function



4.8.4 Reboot settings

Click the icon to reboot.

4.9 Date & Time

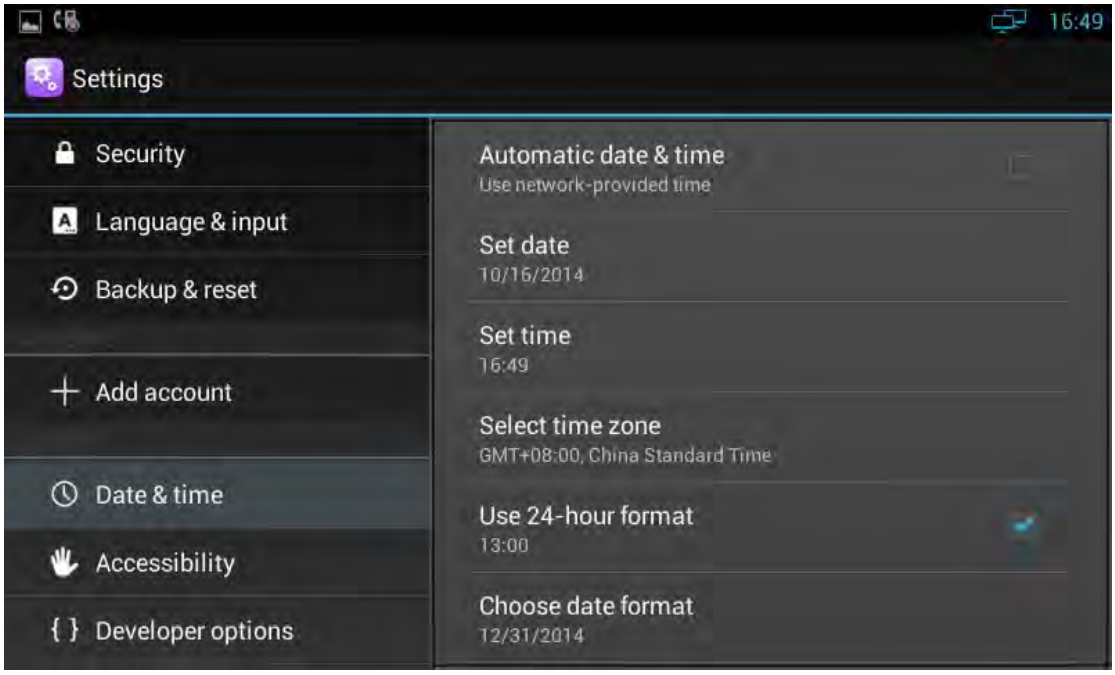
You can select one of the following methods to enter Date & Time configuration:

- Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System

Settings-> Date & time.

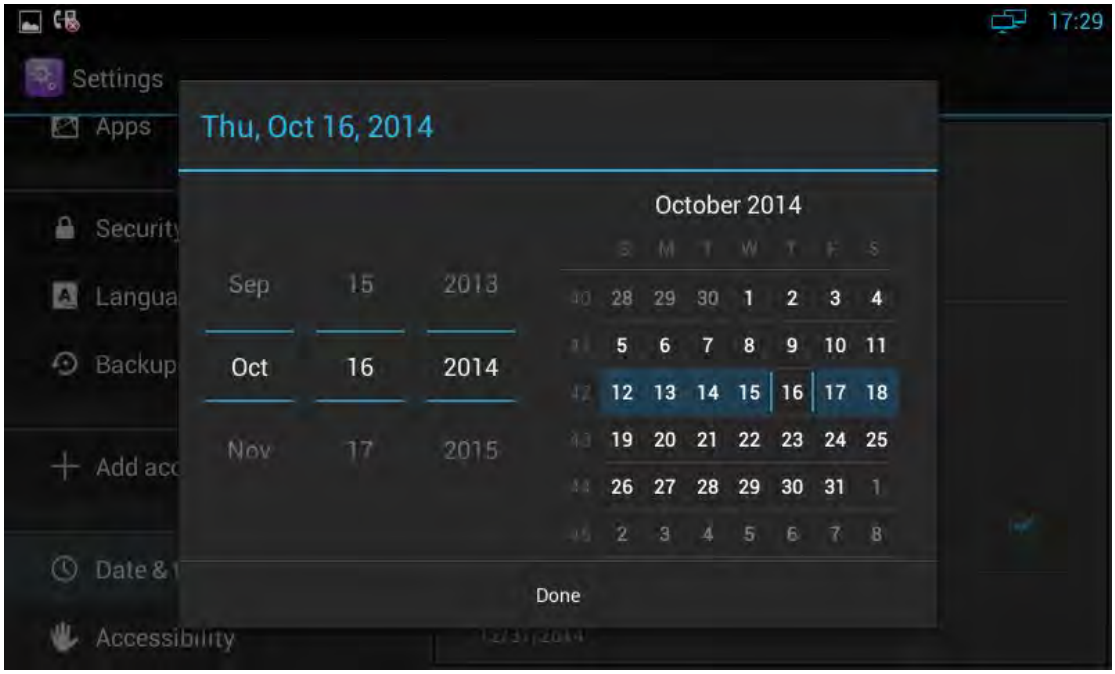
- Mode 2: In the main screen, tap -> Settings-> Date & time.
- Mode 3: Drag down the status bar, click shortcut icon on the status bar ->SETTINGS> -> Date & time.

The configuration page is shown as below:



If you want to manually set the date and time, firstly, remove the click ”Automatic data & time”, and then set the date, time, select a time zone. Check Use 24-hour format, and then “1:00 PM” will change to “13:00”.

Click "Set date", pop-up date set interface, as shown below:



You can increase or decrease the corresponding value by dragging upper or lower, also can directly input corresponding value in input flied, and then click the "Done" button.

Click "Set time, time settings, as shown below:

While viewing photos, you can use two fingers to press on the screen, shrinkage or expansion to shrink or enlarge the image.

5.9 Bluetooth

Bluetooth is a proprietary, open wireless technology standard for exchanging data over short distances from fixed and mobile devices, creating personal area networks with high levels of security. On VP-R47P, users could use Bluetooth to transfer files, share contact information with other Bluetooth portable devices by installing Bluetooth Application, or use Bluetooth headset for making calls.

To connect to a Bluetooth device, turn on VP-R47P's Bluetooth radio first. The first time when using a new Bluetooth device with the VP-R47P, "pair" the device with VP-R47P so that both devices know how to connect securely to each other. After that, users could simply connect to a pared device. Turn off Bluetooth if it's not used.

Bluetooth related settings are under VP-R47P's Settings application → Wireless & networks. Users could access it via the following two ways:

- In the main Screen, press button -> System Settings -> Wireless &

Networks;

- Press on screen and click on -> Wireless & Networks.

5.9.1 Turning Bluetooth On /Off

- Go to VP-R47P's Settings;
- Click on Wireless & Networks;
- Click or untick the option for Bluetooth.

5.9.2 Changing Bluetooth Device Name

The VP-R47P uses "VP-R47P" as Bluetooth device name by default. The device name will be visible to other devices when connecting them. Follow the steps below to change the name:

- Go to VP-R47P's Settings;
- Click on Wireless & networks;
- Click on Bluetooth, and click Bluetooth to turn it on;
- Click on Bluetooth settings → Rename, and enter a new name. Once done, click "OK".

5.9.3 Paring VP-R47P With A Bluetooth Device

Before connecting VP-R47P with other Bluetooth device, users must pare them first. They will stay paired afterwards unless they are unpaired.

- Go to VP-R47P's Settings;
- Click on Wireless & networks;
- Click on Bluetooth, and tick Bluetooth to turn it on;
- Click on SEARCH FOR DEVICE;
- The VP-R47P scans and displays the IDs of all available Bluetooth devices in range. If the device you would like to pair with does not show up in the list,

ensure that the other device is turned on and set to be discoverable;

- If the VP-R47P stops scanning before the other device is ready, touch SEARCH FOR DEVICE;
- The discovered device will show in the available devices list with device ID. If it's unpaired, it will show "Pairing" under the device ID. Make sure the Bluetooth device is active in pairing mode. Then tap on the device ID on the VP-R47P to pair them. Confirm the passkey in the prompted message (if any). Or if PIN is required, please refer to the device's documentation or other procedures to obtain the PIN.

5.9.4 Un-pairing A Bluetooth Device

After successfully pared, the VP-R47P will show item "PAIRED DEVICES" above the Bluetooth device ID in the scan list.

Once it's connected, users could also tap on to the Bluetooth device ID needed to be unpair, then tap on Unpair in the prompted message.

5.10 USB

The video phone supports USB connection for keyboard and USB storage devices. To use USB keyboard, simply plug it into the USB port on the right side of the video phone and it will be ready to use.

To connect and access USB storage device:

- Insert USB storage device into USB port at the right side of video phone;
- It will take a few seconds for the video phone to prepare the connection;
- To access USB storage, click on the screen -> Explorer -> USB, to access and manage your data.

If you need to highlight the log information, please click , select "highlight", and then the log will be showed as different color.

6 Software Upgrade

6.1 Immediate Update

Choose one way below to enter the system upgrade interface:

- In the main screen, press “Menu” on board -> System Settings -> System -> About Multimedia Terminal -> System Upgrade -> System Update Now
- In the main screen, tap on settings icon -> System -> Multimedia Terminal -> System Upgrade -> System Update Now

Update interface as shown:

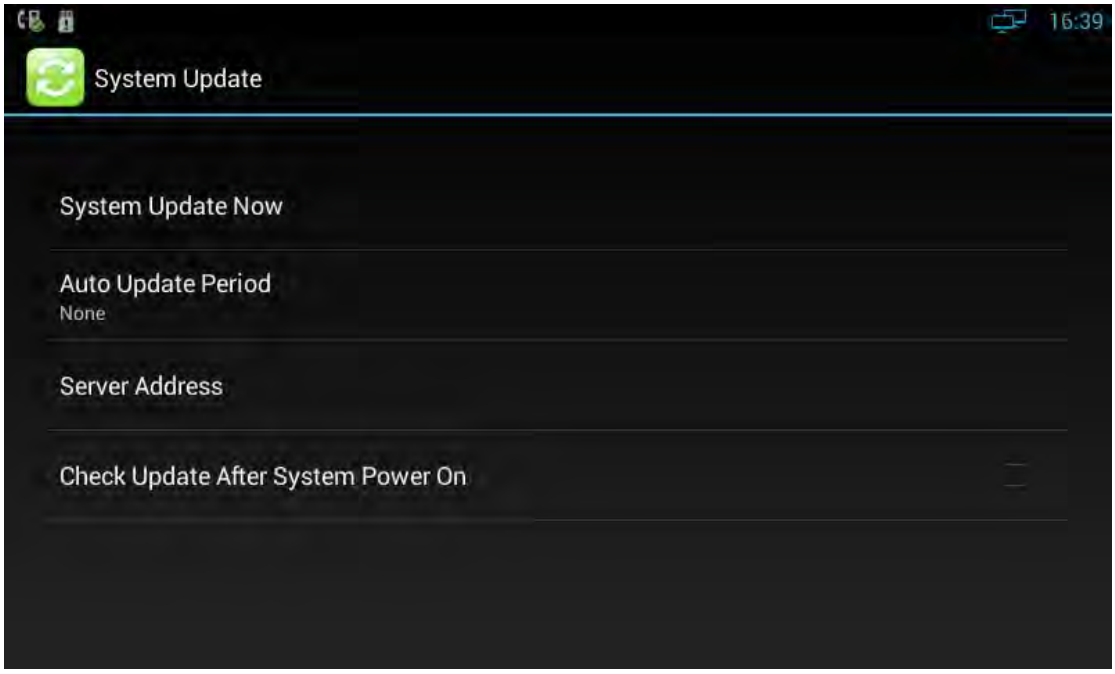

Figure 5-1

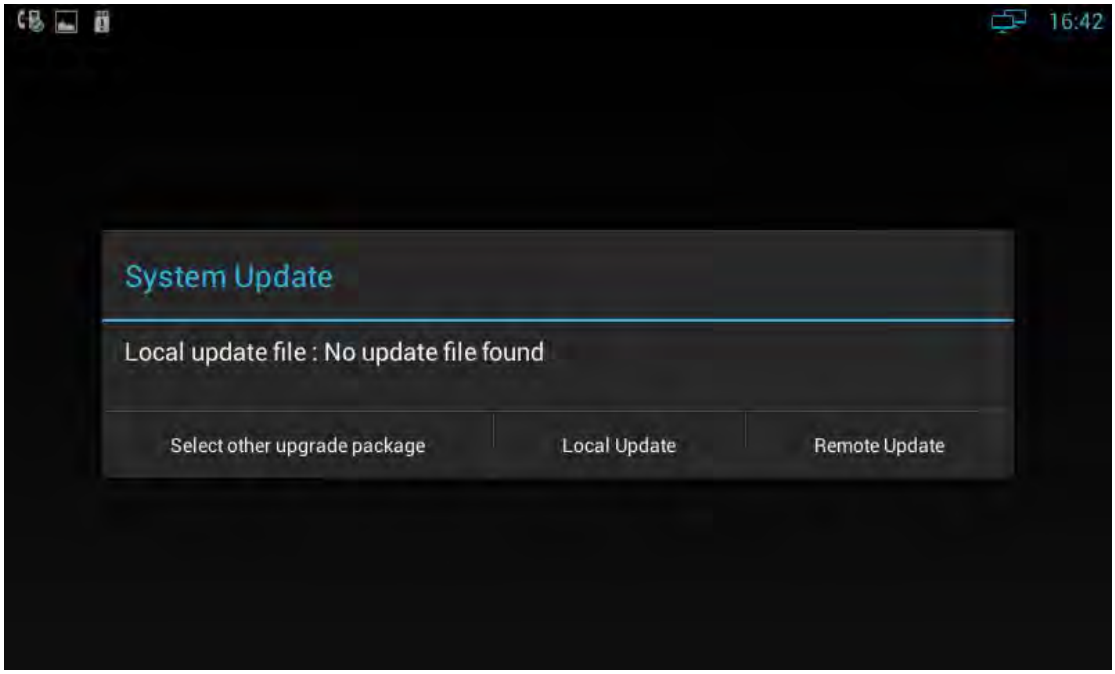
Three ways to update immediately: Select other upgrade package, Local Update, Remote Upgrade, as shown:



6.1.1 Select Other Upgrade Package

1) Via USB to Upgrade

Put upgrade package into USB, insert USB, then click “Select other upgrade package”, find “/mut/usb_storage”, find the upgrade package, then click “OK” to upgrade.

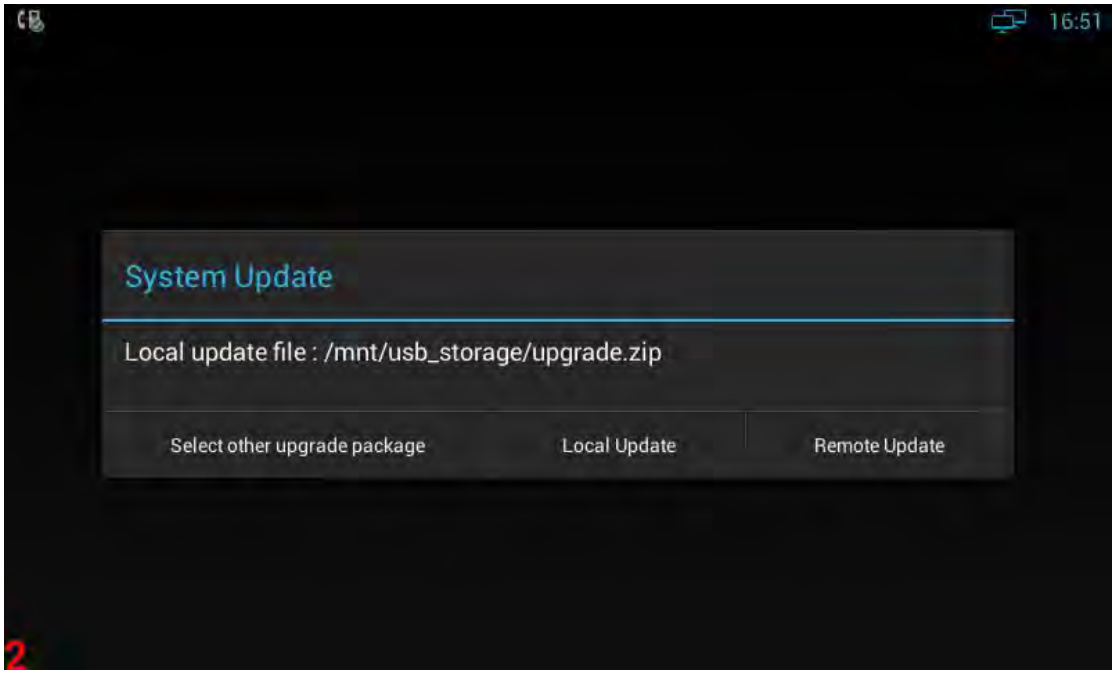
2) Via Internal Memory to Upgrade

Use USB to copy the upgrade package into Internal Memory, then press “Select other upgrade package”, find “/mnt/sdcard”， find upgrade document, then click “OK” to upgrade.

6.1.2 Local Update

1) Via USB to Upgrade

Change the name of upgrade package into upgrade.zip, then copy it into USB, insert USB, enter the upgrade interface, you will find the path of upgrade package, because video phone has searched it automatically, click “Local Update” to start upgrading, as shown:

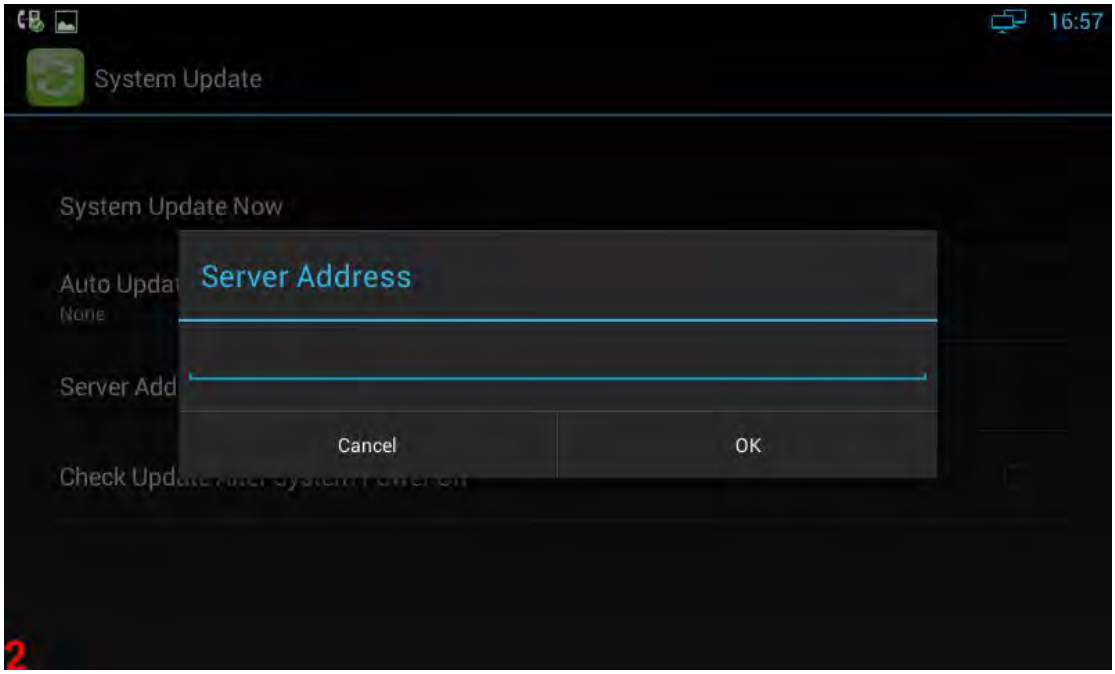


2) Via built-in SD Card to upgrade

First, change the name of upgrade package into upgrade.zip, then copy it into USB, and then use USB to copy the upgrade package into Internal Memory, enter the upgrade interface, you will find the path of upgrade package:/mut/sdcard/upgrade.zip, because video phone has searched it automatically, press “Local Update” to start upgrading.

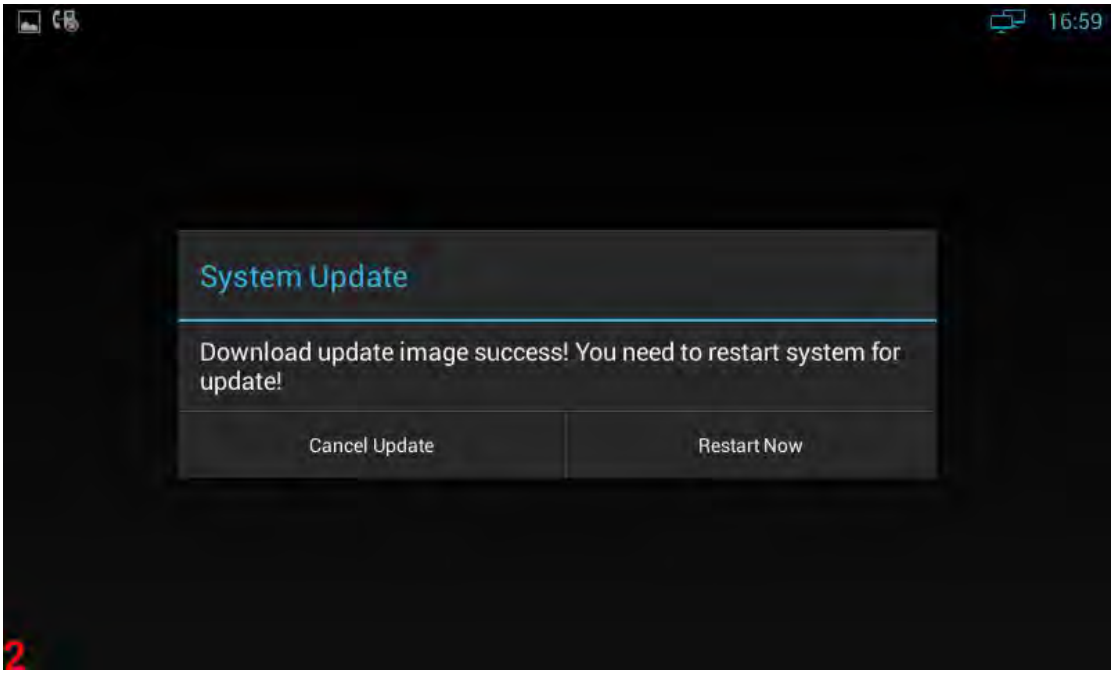
6.1.3 Remote Update

1) Enter the interface in figure 5-1, click “Server Address”, and input the server address that contains upgrade package. As shown:



2) Click “Remote Upgrade”, video phone will check the new version automatically. If exist a new version, it will prompt. Press “OK” to download upgrade document.

3) After finish downloading, it prompts “Download update image success! You need to restart system for update! ”, press reboot now, and then system will upgrade automatically. As shown:

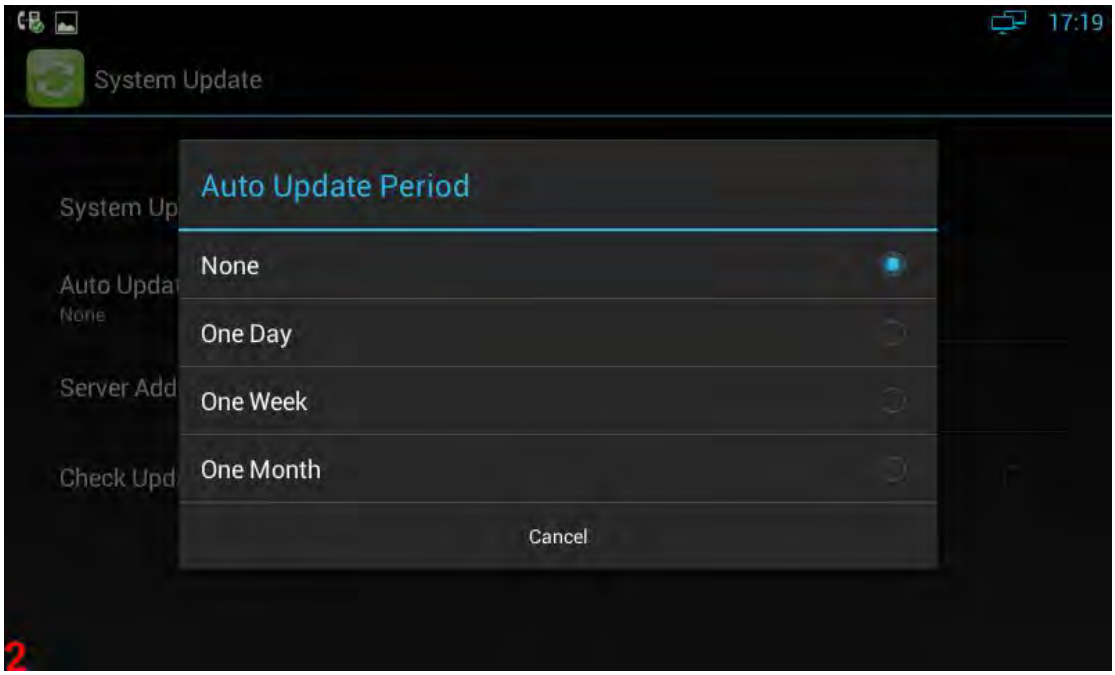


6.2 Auto Update Period

Auto Update Period includes four modes: None, One Day, One Week, and One Month.

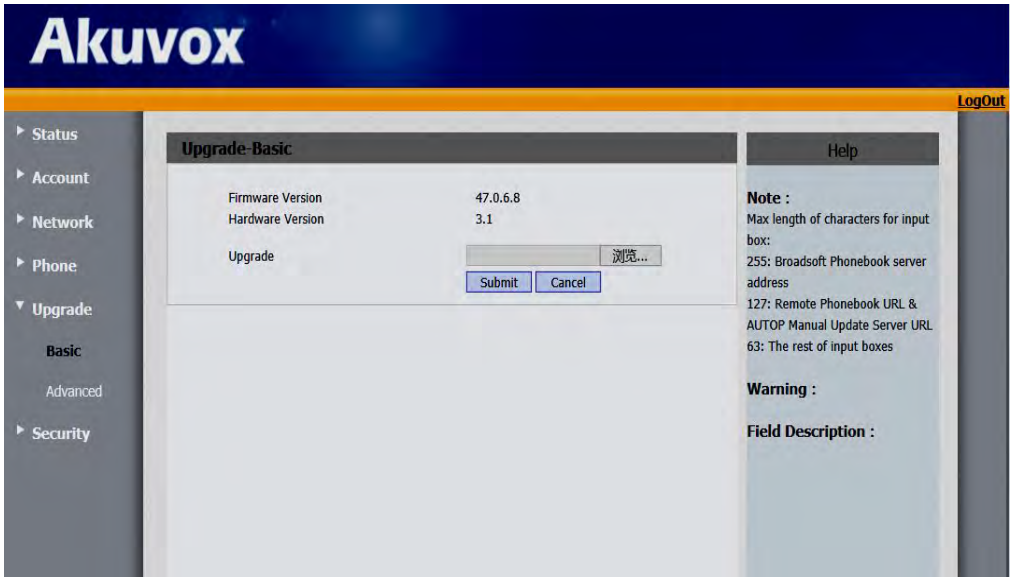
The terminal will detect the new version automatically in time, if there is, the status bar will show “There is a new version, please update!”. Click and download the image for upgrade.

As shown:



6.3 Upgrade on the web

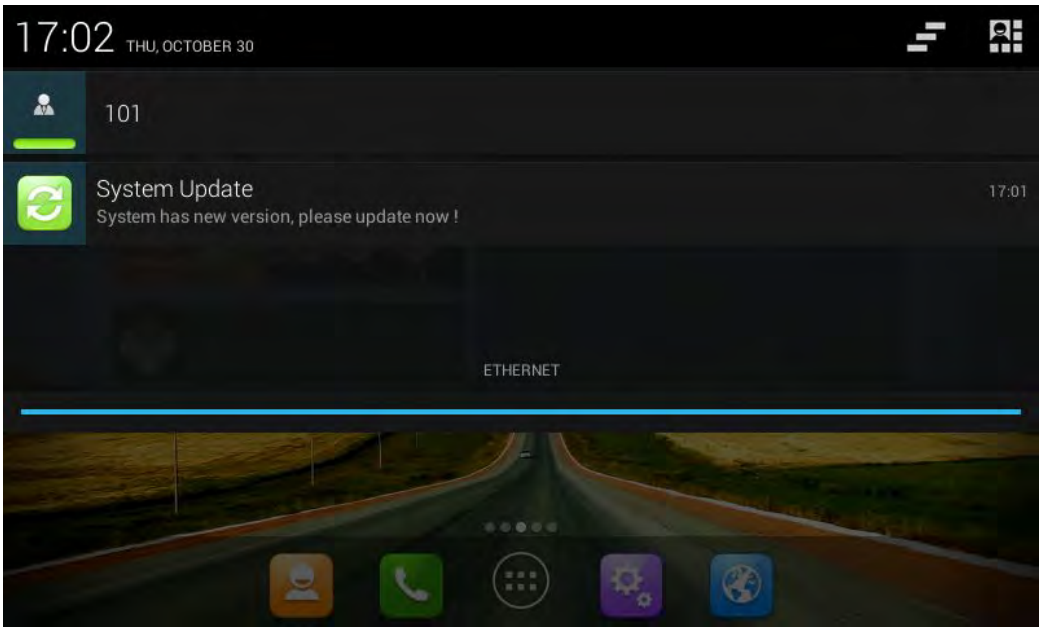
1.Click Upgrade->Basic
2.Choose the software you want to update from the computer.
3.Click Submit.



6.4 Check Update After System Power On

Click “Check Update After System Power On” in figure 5-1. Every time you power on, the system will check the new version automatically. If there is a new one, the status bar will notice: “System has new version, please update now!”, click and download the image for upgrade.

As shown:



7 System Maintenance

7.1 System State Inspection

Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> About Multimedia Terminal

Mode 2: In the main screen, click -> -> About Multimedia Terminal

It will display phone status, software version and hardware version in this item.

7.2 IP Query

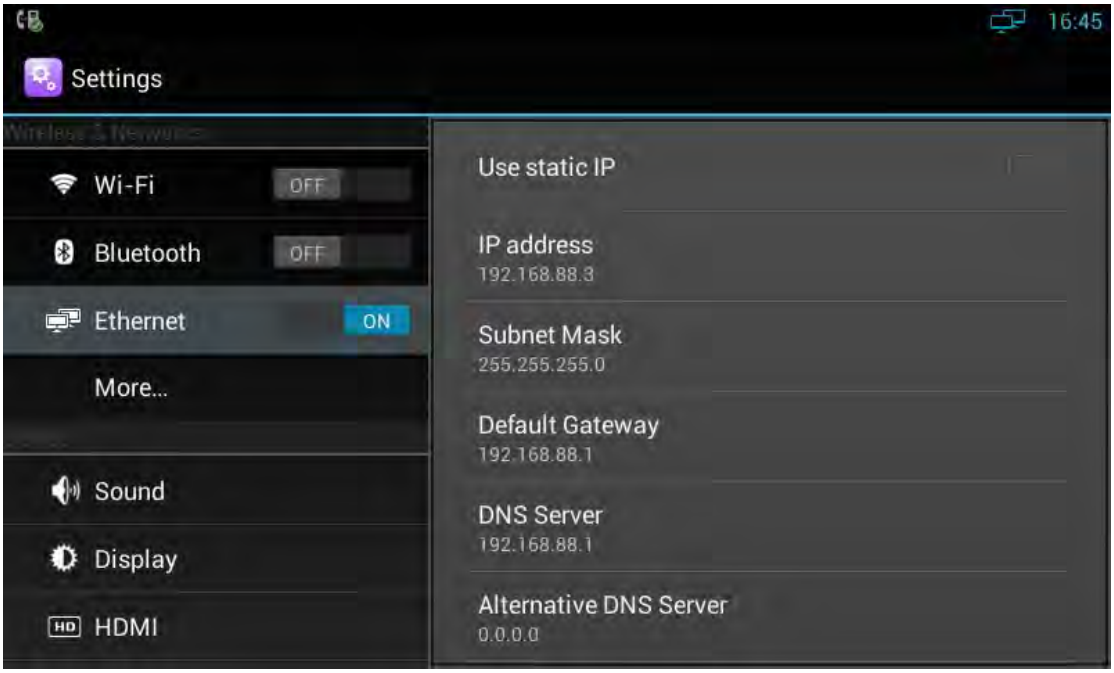
Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Ethernet

Mode 2: In the main screen, click -> -> Ethernet

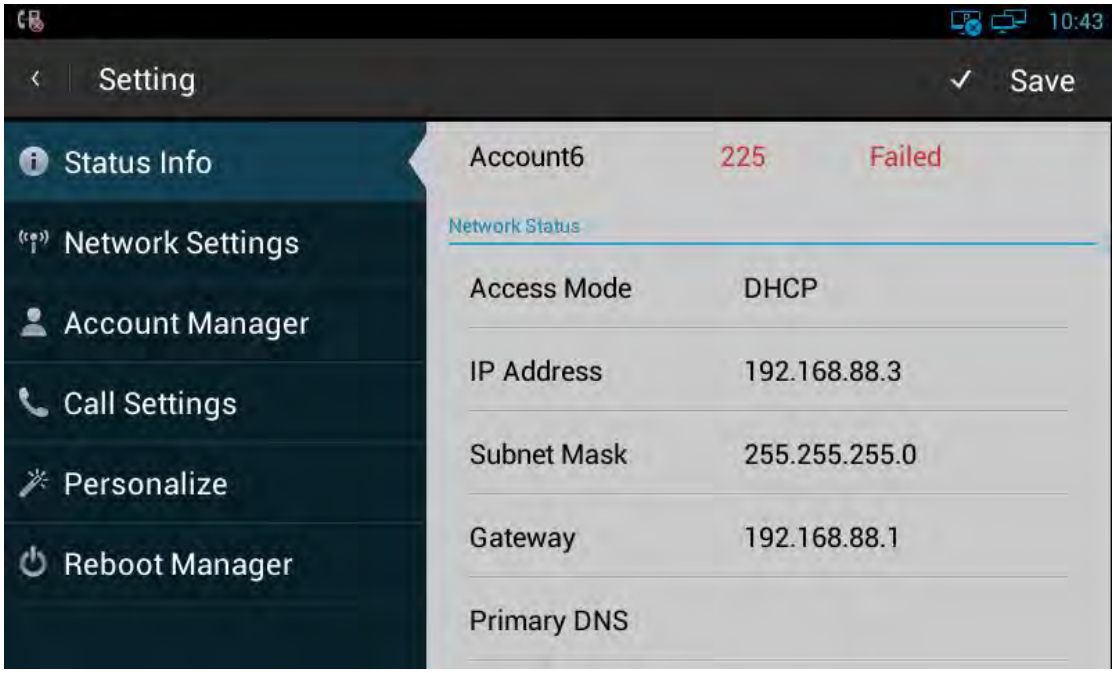
Mode 3: Press Speaker button or pick up to enter the dialing interface, click on upper right corner -> enter the setting interface, check Status Info;

Mode 4: Slide down the top-left , click the account, enter the setting interface, check Status Info;

Mode 1 and Mode 2 can check IP address, subnet mask, gateway, DNS server etc. in Ethernet:



Mode 3 and Mode 4 can check the corresponding network information in setting interface.



7.3 SIP Account Registration Query

You can choose one of the following methods to enter the SIP account registration query: If the account is successfully registered, the icon will be light up in notification area of phone.

Mode 1: Press Speaker button or pick up to enter the dialing interface, click on upper right corner, check Account Manager.

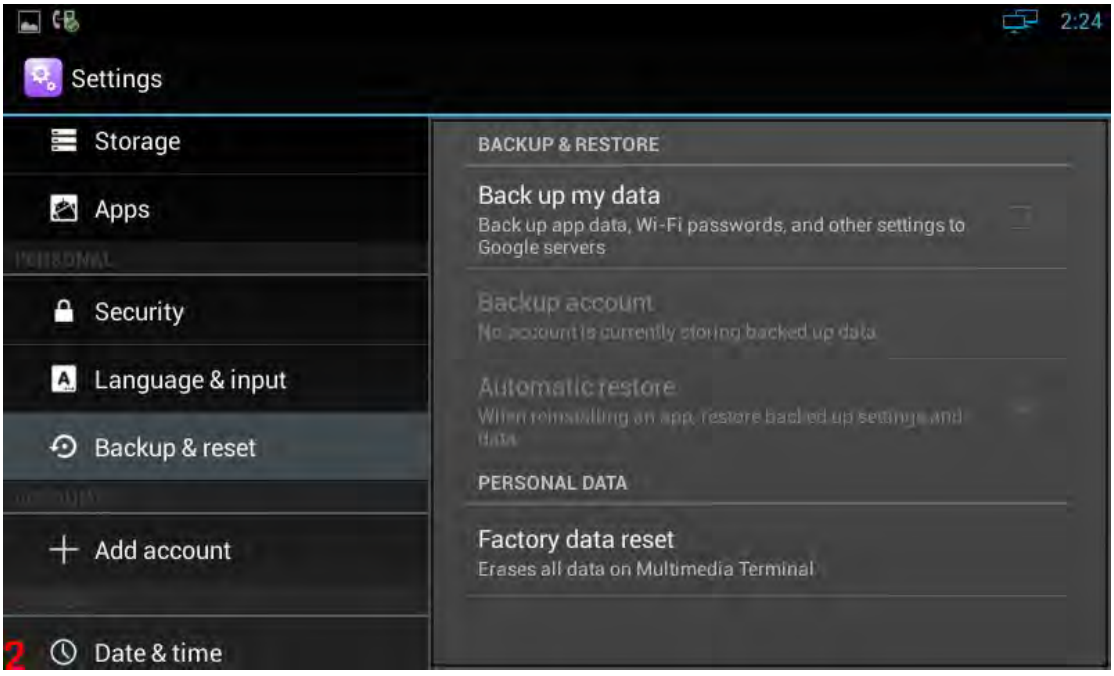
Mode 2: Slide down the top-left , click the account, enter the setup interface, check Account Manager.

7.4 Backup & Reset

Mode 1: In the main screen, press "Menu" key on the hard keyboard-> System Settings-> Backup & reset

Mode 2: In the main screen, click -> -> Backup & reset

Click “Factory data reset”, click “Reset Multimedia Terminal”, then the phone will restore to factory settings.



7.5 Failure Process

Failure 1: Power LED is off

- Please check whether the adapter fits this product requirement;
- Please check whether the outlet is working properly.

Failure 2: No voice when pick up the handle

- Please check whether the connection of handset and base is working properly;
- Please adjust the volume + key on keyboard when off-hook the phone, Observe the display of “volume” prompt. Please pay attention that the volume key in on-hook and off-hook situation is to adjust the ring volume and media volume (call volume) separately. These two adjustments are unrelated. Adjust the volume won’t change call volume when on-hook the phone.

Failure 3: Phone can’t dial properly

- Please check whether there is at the top-right of screen. If not, please check whether the cable in LAN port is loose;
- Please check the IP address of phone via configuration (go to 5.2, “network configuration”);
- If it’s now in LAN, please check whether the IP address of phone is conflict with other IP address in LAN.
- If the network connection is properly, please check whether the icon of successful registration is in the notification area. If there is no explanation of configuration failure, please contact network administrator to recover it.

Failure 4: No ringing when incoming a call

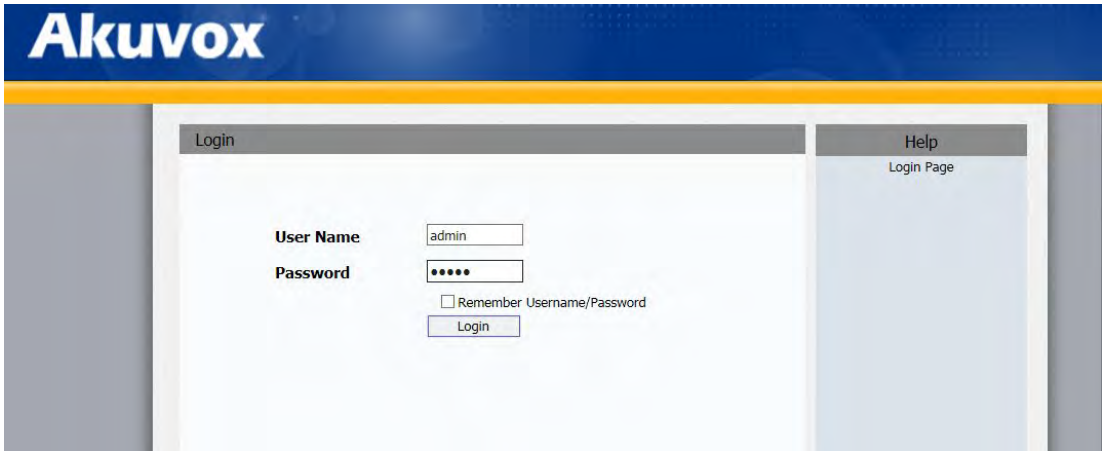
- Please make sure the handle is completely hung on the base
- Please adjust the volume + key on keyboard when on-hook the phone, Observe the display of “volume” prompt. Please pay attention that the volume key in on-hook and off-hook situation is to adjust the ring volume and media volume

(call volume) separately. These two adjustments are unrelated. Adjust the volume won’t change ring volume when off-hook the phone.

8 Web Interface

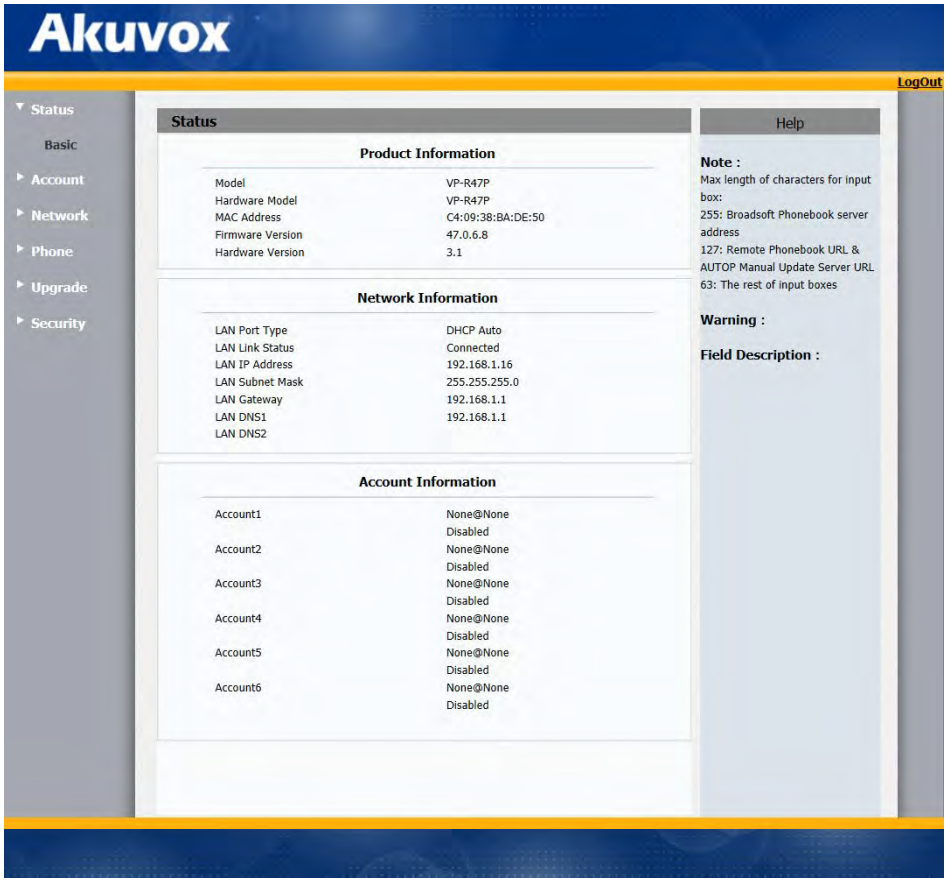
8.1 Web login

1. Open the browser on your computer.
2. Input the IP address in the address bar.
3. Enter the user name and password (user name: admin, password: admin), then click Login.



8.2 Status->Basic

Click Status->Basic to check the phone information.



Sections	Description
Product Information	To display the device's information such as Model name, MAC address (IP device's physical address),Hardware Model, Firmware version and Hardware firmware.
Network Information	To display the device's Networking status(LAN Port),such as Port Type(which could be DHCP/Static/PPPoE), Link Status, IP Address, Subnet Mask, Gateway, Primary DNS server, Secondary DNS server.
Account Information	To display device's Account information and Registration status (account username, registered server's address, Register result).

8.3 Account->Basic

1.Click Account->Basic.

2.Select the desired account(from account 1 to account 6),then enable the Account Active.

3.Filled the registration parameters you need.

4.Click Submit.

Sections	Description
SIP Account	To display and configure the specific Account settings. ● Status: To display register result. ● Display Label: Which is displayed on the phone's LCD screen. ● Display Name: Which is sent to the other call party for displaying. ● Register Name: Allocated by SIP server provider, used for authentication. ● User Name: Allocated by your SIP server provide, used for authentication. ● Password: Used for authorization.
SIP Server 1	To display and configure Primary SIP server settings. ● Server IP: SIP server address, it could be an URL or IP address. ● Registration Period: The registration will expire after Registration period, the IP phone will re-register automatically within registration period.
SIP Server 2	To display and configure Secondary SIP server settings. This is for redundancy, if registering to Primary SIP server fails, the IP phone will go to Secondary SIP server for registering. **Note**: Secondary SIP server is used for redundancy, it can be left blank if there is not redundancy SIP server in user's environment.
Outbound Proxy Server	To display and configure Outbound Proxy server settings. An outbound proxy server is used to receive all initiating request messages and route them to the designated SIP server. **Note**: If configured, all SIP request messages from the IP phone will be sent to the outbound proxy server forcefully.
Transport Type	To display and configure Transport type for SIP message ● UDP: UDP is an unreliable but very efficient transport layer protocol. ● TCP: Reliable but less-efficient transport layer protocol.

8.4 Account->Advanced

1. Click Account->Advanced.

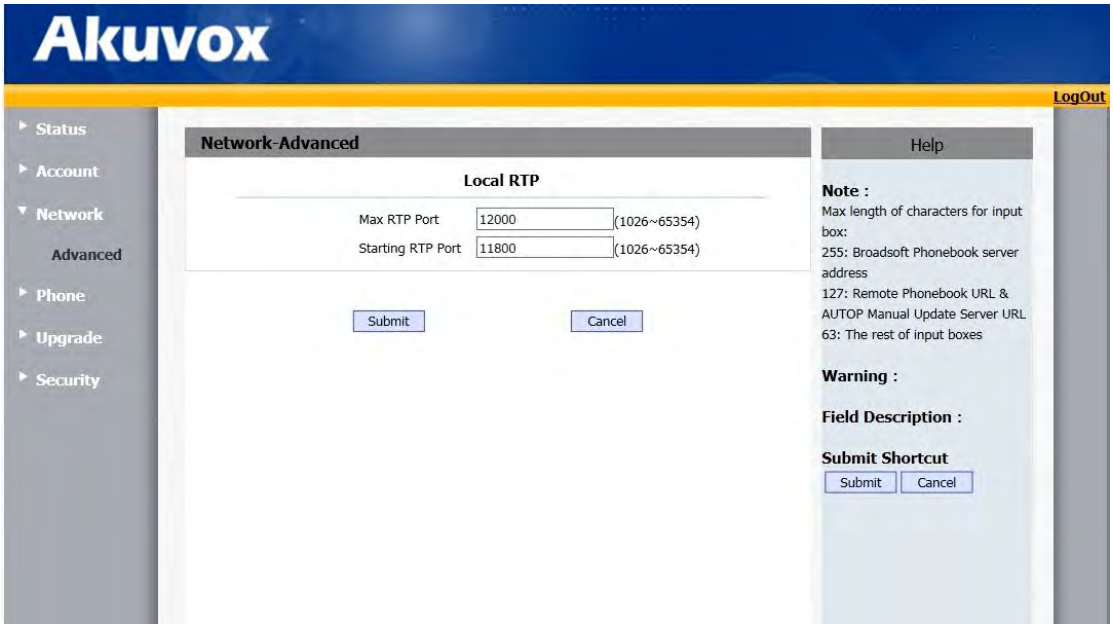
Sections	Description
SIP Account	To display current Account settings or to select which account to display.
Codecs	To display and configure available/unavailable codecs list. Codec means coder-decoder which is used to transfer analog signal to digital signal or vice versa. Familiar codecs are PCMU(G711U), PCMA(G711A), G722 (wid-bandth codecs),G729 and so on.
DTMF	To display and configure DTMF settings. ● Type: Support Inband,Info,RFC2833 or their combination. ● How To Notify DTMF: Only available when DTMF Type is Info/Info+Inband/Info+RFC2833. ● DTMF Payload: To configure payload type for DTMF. **Note**: By default, DTMF type is RFC2833 which is the standard. Type Inband uses inband frequency to indicate DTMF tone which is most used to be compatible to traditional telephone server. Type Info use SIP Info message to indicate DTMF message.
Call	To display and configure call-related features. ● Max Local SIP Port: To configure maximum local sip port for designated account. ● Min Local SIP Port: To configure minimum local sip port for designated account. ● Caller ID Header: To configure which Caller ID format to fetch for displaying on Phone UI. ● Auto Answer: If enabled, IP phone will be auto-answered when there is an incoming call for designated account. ● Provisional Response ACK: 100% reliability for all provisional message, this means it will send ACK every time the IP phone receive a provisional SIP message from SIP server. ● User=phone: If enabled, IP phone will send user=phone within SIP message. ● Anonymous Call: If enabled, all outgoing call for the designated account will ben anonymous number. ● Anoymous Call Rejection: If enabled, all incoming anonym-out call for the designated account will be rejected. ● Missed Call Log: To display the miss call log. ● Prevent SIP Hacking: Enable to prevent SIP from hacking.
Session Timer	To display or configure session timer settings. ● Active: To enable or disable this feature, If enable, the

	ongoing call will be disconnected automatically once the session expired unless it's been refreshed by UAC or UAS. ● Session Expire: Configure session expire time. ● Session Refresher: To configure who should be response for refreshing a session. **Note**: UAC means User Agent Client, here stands for IP phone. UAS means User Agent Server, here stands for SIP server.
User Agent	One can customize User Angent field in the SIP message; If user agent is set to specific value, user could see the information from PCAP. If user agent is not set by default, user could see the company name, model number and firmware version from PCAP

8.5 Network ->Advanced

1. Click Network->Advanced
2. Filled the corresponding parameters you need.

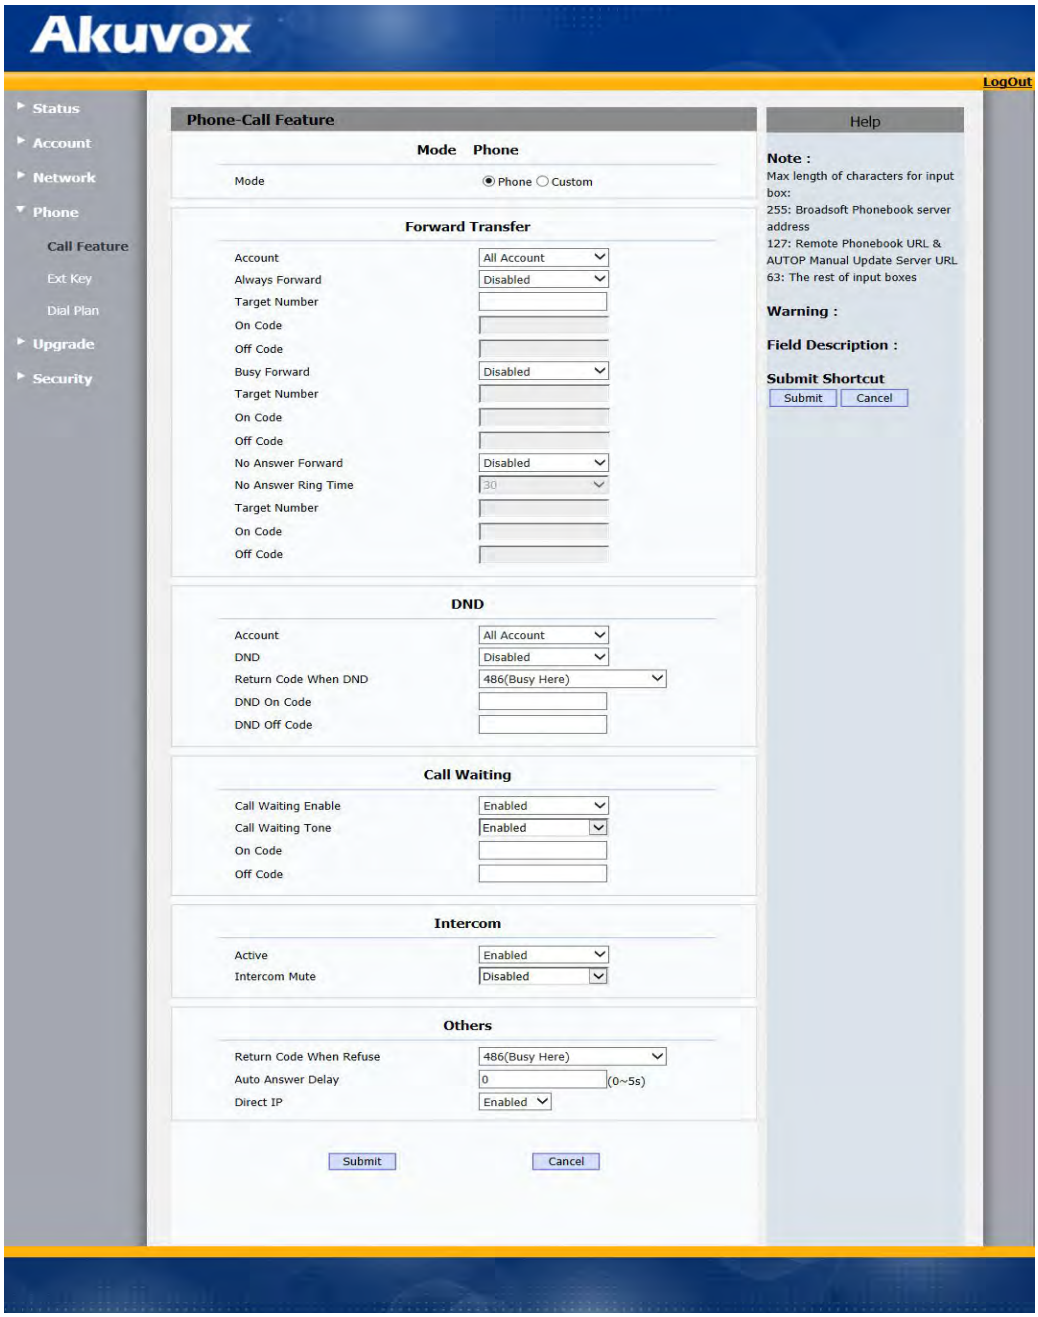


Sections	Description
Local RTP	To display and configure Local RTP settings. ● Max RTP Port: Determine the maximum port that RTP

	stream can use. ● Min RTP Port: Determine the minimum port that RTP stream can use.

8.6 Phone ->Call Feature

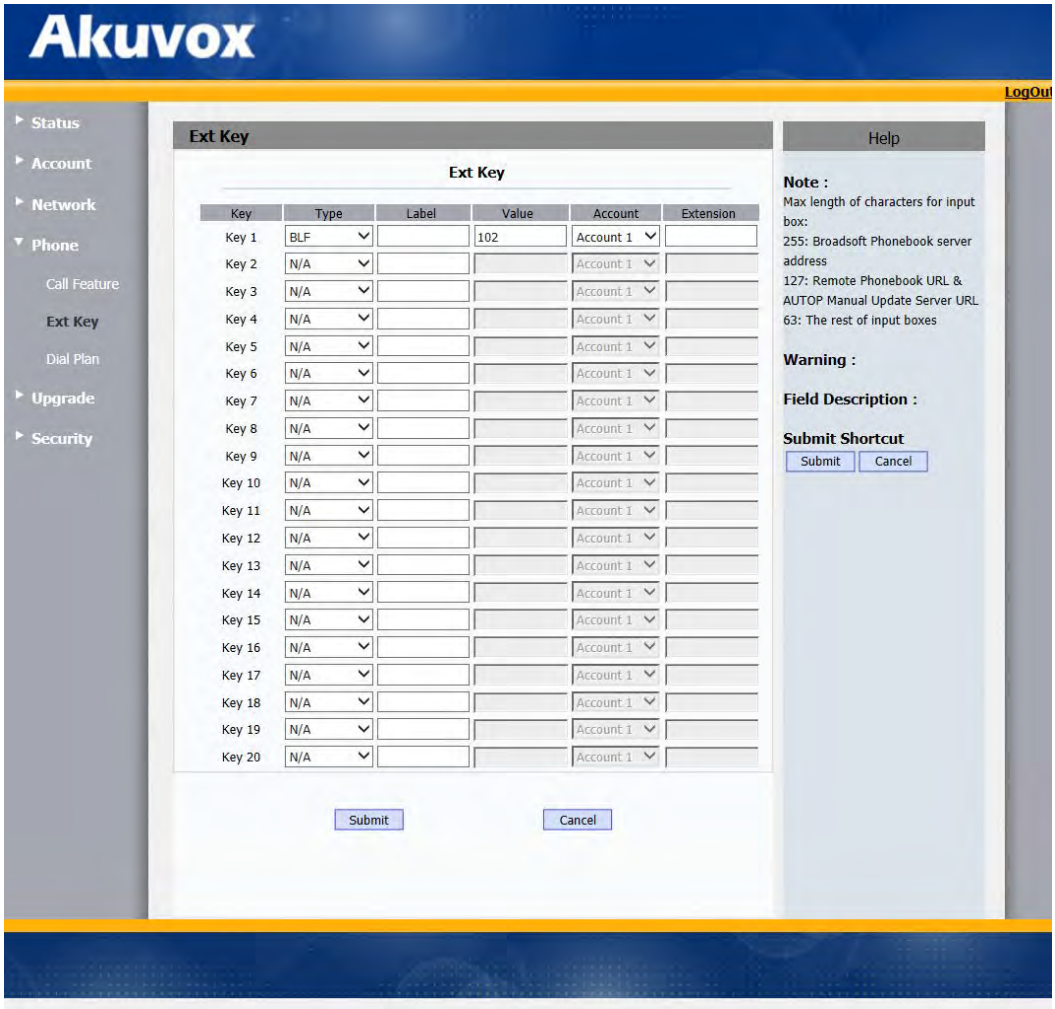
1. Click Phone->Call Feature
2. Filled the corresponding parameters you need.



Sections	Description
Forward Transfer	To display and configure Forward setting. **Note**: There are three types of forward: Always Forward, Busy Forward and No answer Forward. ● Always Forward: Any incoming call will be forwarded in any situation. ● Busy Forward: An incoming call will be forwarded if IP phone is busy. ● No answer Forward: An incoming call will be forwarded if it's no answer after a specific time.
Call Waiting	To enable or disable Call Waiting. ● Call Waiting Enable: If enabled, it allows IP phones to receive a new incoming call when there is already an active call. ● Call Waiting Tone: If enabled, it allows IP phones to play the call waiting tone to the waiting callee.
DND	● DND(Do Not Disturb) allows IP phones to ignore any incoming calls. ● Return Code when DND: Determine what response code should be sent back to server when there is an incoming call if DND on. ● DND On Code: The Code used to turn on DND on server's side, if configured, IP phone will send a SIP message to server to turn on DND on server side if you press DND when DND is off. ● DND Off Code: The Code used to turn off DND on server's side, if configured, IP phone will send a SIP message to server to turn off DND on server side if you press DND when DND is on.
Intercom	Intercom allow user to establish a call directly with the callee. ● Active: To enable or disable Intercom feature. ● Intercom Mute: If enabled, once the call established, the callee will be muted.
Others	● Return Code When Refuse: Allows user to assign specific code as return code to SIP server when an incoming call is rejected. ● Auto Answer Delay: To configure delay time before an incoming call is automatically answered.

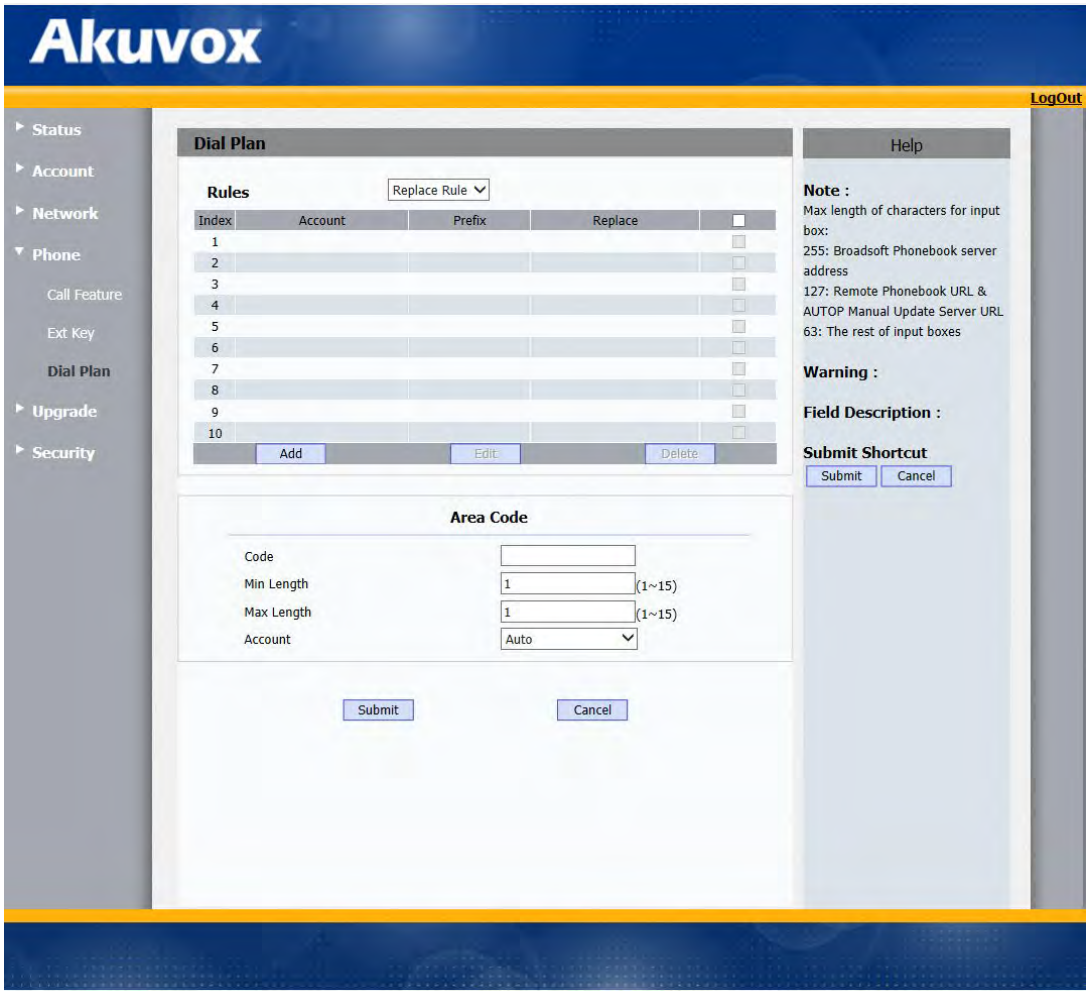
8.7 Phone-> Ext Key

1. Click Phone-> Ext Key
2. Select the Type, Account, input the Lable, Value.
3. Click Submit



8.8 Phone->Dial Plan

Click Phone-> Dial Plan



Sections	Description
Rules	Allow user to select Replace rule or Dial-now to display or edit.
Dial Now Delay	Allow user configure dial now delay time for dial now. It means user can configure the IP phone to dial out the phone number automatically after the designated delay time if it match any dial now rule.
Rules Modify	Allow user to modify selected rules information, for dial-now rule, user can modify related accounts, Dial now Rule itself.
Area Code	Area codes are also known as NPAs(Numbering Plan Areas). They usually indicate different geographical areas within one country. If entered numbers match the predefined area code rule, the IP phone will automatically prefix outgoing number with area code.

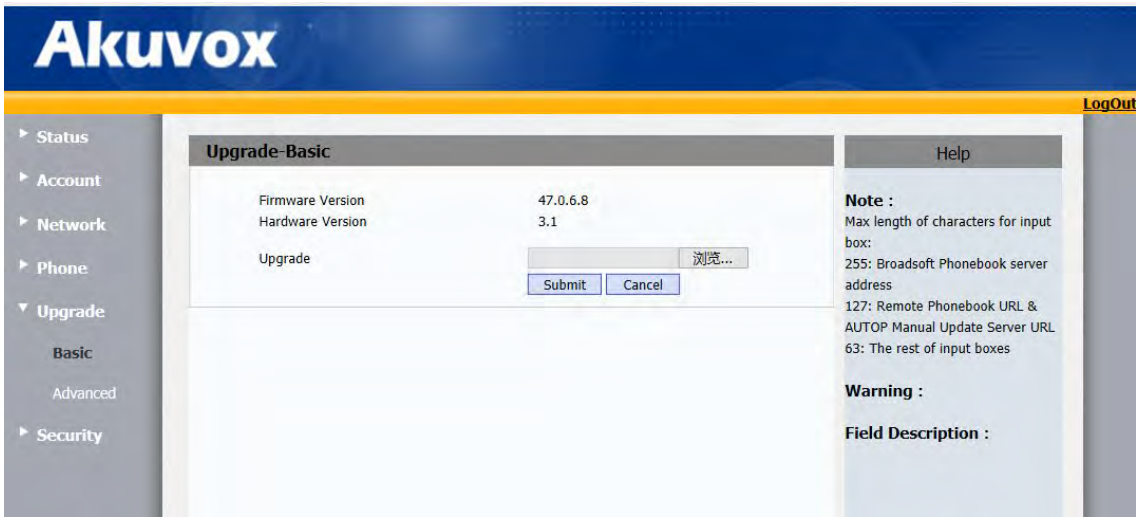
	Note: There is only one area code rule supported.

8.9Upgrade->Basic

1.Click Upgrade->Basic

2.Choose the software you want to update from the computer.

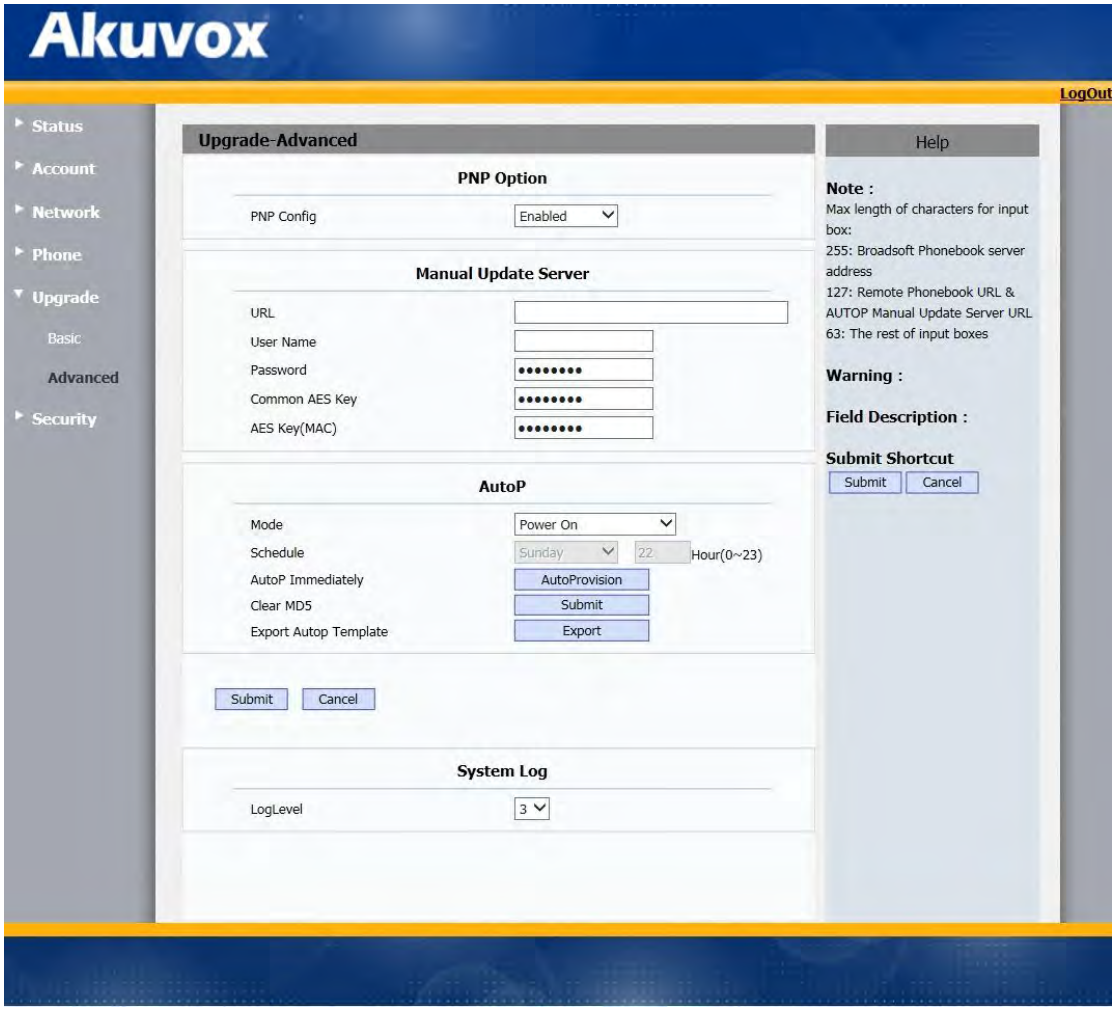
3.Click Submit



Sections	Description
Firmware version	To display firmware version, firmware version starts with MODEL name.
Hardware Version	To display Hardware version.
Upgrade	To select upgrading rom file from local or a remote server automatically. Note: Please make sure it's right file format for right model.

8.10 Upgrade->Advanced

1. Click Upgrade->Advanced
2. Filled the corresponding parameters you need.

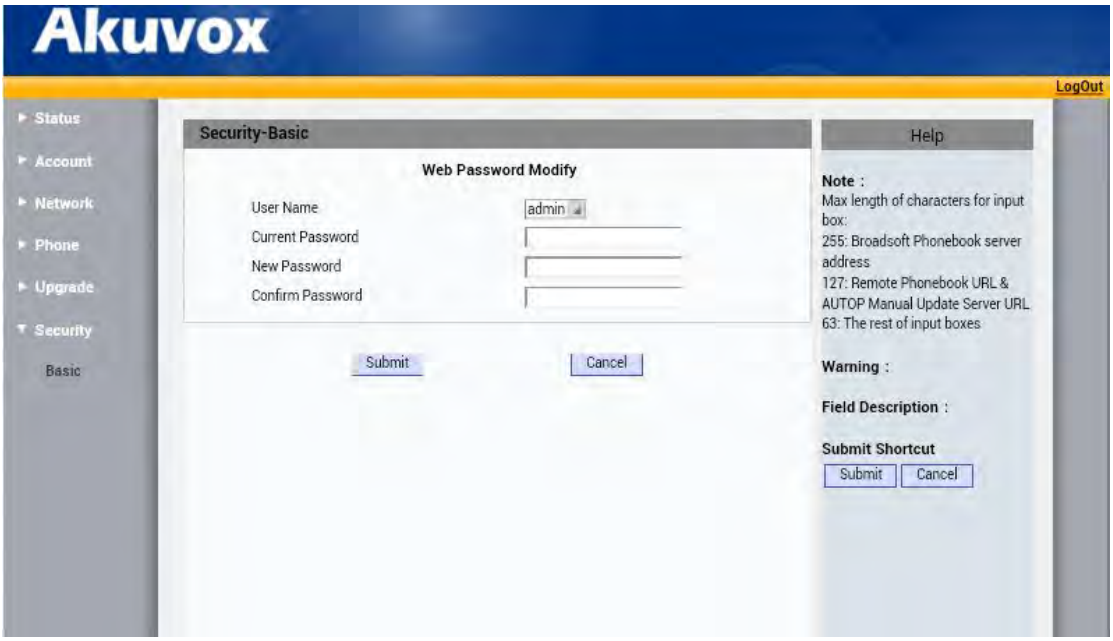


Sections	Description
PNP Option	To display and configure PNP setting for Auto Provisioning. ● PNP: Plug and Play, once PNP is enabled, the phone will send SIP subscription message to PNP server automatically to get Auto Provisioning server's address. By default, this SIP message is sent to multicast address 224.0.1.75(PNP server address by standard).
Manual Update Server	To display and configure manual update server's settings. ● URL: Auto provisioning server address. ● User name: Configure if server needs an username to access, otherwise left blank. ● Password: Configure if server needs a password to access, otherwise left blank.

	● Common AES Key: Used for IP phone to decipher common Auto Provisioning configuration file. ● AES Key (MAC): Used for IP phone to decipher MAC-oriented auto provisioning configuration file(for example, file name could be 0c1105888888.conf if IP phone's MAC address is 0c1105888888). Note: AES is one of many encryption, it should be configure only configure filed is ciphered with AES, otherwise left blank.
AutoP	To display and configure Auto Provisioning mode settings. This Auto Provisioning mode is actually self-explanatory. For example, mode "Power on" means IP phone will go to do Provisioning every time it powers on.
System Log	To display syslog level and export syslog file. Syslog level: From level 0~7.The higher level means the more specific syslog is saved to a temporary file. By default, it's level 3. Export Log: Click to export temporary syslog file to local PC.

8.11 Security->Basic

1.Choose the user name (admin or user).
2.Enter the current password.
3.Enter the new password.
4.Confirm the new password.
Note: Security is configurable via web only.



Sections	Description
Web Password Modify	To modify user's password. ● User Name: Choose the character you are.(admin or user) ● Current Password: The current password you used. ● New Password: Input new password you intend to use. ● Confirm Password: Repeat the new password.
